## PREFACE

*Instructor's Solutions Manual* is designed to be used with the text *Statistical Reasoning for Everyday Life* by Jeffrey Bennett, William Briggs, and Mario Triola. It provides solutions to every exercise in Chapters One through Ten of the text. The solutions are more than just answers -- intermediate steps in the process of solving the exercises are also presented. A *Student's Solutions Manual* is also available with solutions for the odd-numbered exercises, review exercises, and quiz questions in the text.

I want to express my thanks to my wife, Judy, for her support and patience throughout this project, and to Sara Gordus and Joe Vetere at Addison Wesley who have been such a great help in bringing this work to completion.
