

# 2

# Contemporary Perspectives on Abnormal Behavior

### **Multiple-Choice Questions**

#### Chapter Introduction

1.	In the case study of "Jessica's Little Secret," Jessica's bulimia is maladaptive in the sense that it can lead to all of the following consequences EXCEPT		
			M,A,O
	<ul><li>a. extreme loss of weight</li><li>b. serious medical problems</li></ul>	<ul><li>c. social problems</li><li>d. decaying teeth</li></ul>	a
2.	·	"Jessica wanted to stop her bulimic symptoms before	37 M,F,O
		c. she got married	с
	b. she obtained a job	d. she had to go into a hospital	
3.		ling of abnormal behavior has been largely	37
	approached from each of the following	g perspectives EXCEPT the	E,F,O
	a. biological perspective	<ul><li>c. sociocultural perspective</li><li>d. demonological perspective</li></ul>	d
	b. psychological perspective	d. demonological perspective	
4.	Some scholars first began looking for natural causes to abnormal behavior in		
	a. prehistoric times	c. the Dark Ages	M,F,N
	b. ancient times	d. the Renaissance	b
The I	<b>Biological Perspective</b>		
5.	The medical model represents a	perspective on abnormal behavior.	38
	a. phenomenological	c. biological	E,F,O
	b. behavioral	d. cognitive	c
6.	Our understanding of the biological un	nderpinnings of abnormal behavior has in recent	38
	years.		E,F,N
	a. been eliminated	c. remained unchanged	d
	b. declined	d. grown	
7.	The nervous system is made up of cell	ls called	38
	a. somas	c. axons	E,F,O
	b. neurons	d. synapses	b
		v 1	

8.	Neurons arecells. a. glial b. connective	c. adipose d. nerve	38 E,C,N
	b. connective	d. nerve	b
9.	The part of the neuron that receives message a. nucleus b. axon	es from other neurons is called the c. dendrite d. soma	38 M,C,O c
			C
10.	The part of the neuron that transmits messag		38
	a. nucleus b. axon	c. dendrite d. soma	M,C,O b
		u. sonia	U
11.	Terminals are located in the		38
	a. nucleus	c. dendrite	M,F,O
	b. axon	d. soma	b
12.	Neurons transmit messages to other neurons known as	by means of chemical substances	38 E,F,O
	a. precursors	c. neurotransmitters	с
	b. hormones	d. peptides	
13.	Neurotransmitters inducein receivin	g neurons.	38
101	a. dendrites	c. chemical changes	E,F,O
	b. somas	d. structural changes	с
14.	The junction between a transmitting neuron	and a receiving neuron is called the	38
14.	a. sheath	c. hillock	58 E,C,O
	b. synapse	d. knob	b.
1.5			20
15.	The proper sequence of structures a neural n neuron to the next is	nessage passes through as it moves from one	38 M,F,N
15.	neuron to the next is a. dendrite, cell body, axon	c. axon, cell body, dendrite	эв M,F,N a
15.	neuron to the next is		M,F,N
	<ul><li>neuron to the next is</li><li>a. dendrite, cell body, axon</li><li>b. dendrite, axon, cell body</li></ul>	c. axon, cell body, dendrite	M,F,N a
15. 16.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> </ul>	c. axon, cell body, dendrite	M,F,N a 40
	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> </ul>	<ul><li>c. axon, cell body, dendrite</li><li>d. cell body, dendrite, axon</li></ul>	M,F,N a
	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron</li> </ul>	<ul><li>c. axon, cell body, dendrite</li><li>d. cell body, dendrite, axon</li><li>c. dendrite</li></ul>	M,F,N a 40 M,F,N c 40
16.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> </ul>	M,F,N a 40 M,F,N c
16.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N
16. 17.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b
16.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b
16. 17.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O
16. 17.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b
16. 17.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>b. quasisynaptic</li> <li>Each kind of neurotransmitter</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40
16. 17. 18.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>b. quasisynaptic</li> <li>Each kind of neurotransmitter</li> <li>a. is unique and will fit into only one type</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> <li>of receptor site</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40 M,F,O
16. 17. 18.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>Each kind of neurotransmitter</li> <li>a. is unique and will fit into only one type</li> <li>b. will fit into several types, but not most the</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> <li>of receptor site</li> <li>types of receptor sites</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40
16. 17. 18.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>b. quasisynaptic</li> <li>Each kind of neurotransmitter</li> <li>a. is unique and will fit into only one type</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> <li>of receptor site</li> <li>types of receptor sites</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40 M,F,O
16. 17. 18. 19.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>b. quasisynaptic</li> <li>Each kind of neurotransmitter</li> <li>a. is unique and will fit into only one type</li> <li>b. will fit into several types, but not most to</li> <li>c. will fit into every type of receptor site</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> <li>of receptor site</li> <li>types of receptor sites</li> <li>ceptor sites</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40 M,F,O a
16. 17. 18.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>b. quasisynaptic</li> <li>Each kind of neurotransmitter</li> <li>a. is unique and will fit into only one type</li> <li>b. will fit into several types, but not most to</li> <li>c. will fit into every type of receptor site</li> <li>The process of neurotransmitters being readomination.</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> <li>of receptor site</li> <li>types of receptor sites</li> <li>ceptor sites</li> <li>sorbed by the axon terminal is called</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40 M,F,O a
16. 17. 18. 19.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>b. quasisynaptic</li> <li>Each kind of neurotransmitter</li> <li>a. is unique and will fit into only one type</li> <li>b. will fit into several types, but not most to</li> <li>c. will fit into every type of receptor site</li> <li>The process of neurotransmitters being reable</li> <li>a. diffusion</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> <li>of receptor site</li> <li>types of receptor sites</li> <li>ceptor sites</li> <li>sorbed by the axon terminal is called</li> <li>c. reuptake</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40 M,F,O a 40 M,F,O
16. 17. 18. 19.	<ul> <li>neuron to the next is</li> <li>a. dendrite, cell body, axon</li> <li>b. dendrite, axon, cell body</li> <li>A receptor site is part of the</li> <li>a. endocrine system</li> <li>b. axon</li> <li>The part of a dendrite on a receiving neuron is the</li> <li>a. terminal</li> <li>b. receptor site</li> <li>A neuron receiving a message from another</li> <li>a. presynaptic</li> <li>b. quasisynaptic</li> <li>Each kind of neurotransmitter</li> <li>a. is unique and will fit into only one type</li> <li>b. will fit into several types, but not most to</li> <li>c. will fit into every type of receptor site</li> <li>The process of neurotransmitters being readomination.</li> </ul>	<ul> <li>c. axon, cell body, dendrite</li> <li>d. cell body, dendrite, axon</li> <li>c. dendrite</li> <li>d. cell body</li> <li>that is structured to receive a neurotransmitter</li> <li>c. myelin sheath</li> <li>d. hillock</li> <li>neuron is called</li> <li>c. synaptic</li> <li>d. postsynaptic</li> <li>of receptor site</li> <li>types of receptor sites</li> <li>ceptor sites</li> <li>sorbed by the axon terminal is called</li> </ul>	M,F,N a 40 M,F,N c 40 E,C,N b 40 M,C,O d 40 M,F,O a

21.	Depression and eating disorders have bee			40 D.F.O
	<ul><li>a. acetylcholine</li><li>b. dopamine</li></ul>	с. d.		D,F,O c
22.	Two popular antidepressants, Prozac and			40 D,F,O
	a. acetylcholine	c.	serotonin	D,1',0 c
	b. dopamine	d.	cortisol	
23.	Alzheimer's disease has been associated v a. acetylcholine	vith de c.		40 D,F,O
	a. acetylcholine b. dopamine	с. d.		a
	er oppannie	c.		u
24.	Schizophrenia has been linked to increase			40
	a. acetylcholine	c.	1 1	D,F,O
	b. dopamine	d.	serotonin	b
25.	A neurotransmitter linked to anxiety diso	rders a	and depression is .	40
	a. thyroxin	c.		D,F,O
	b. acetylcholine	d.	serotonin	d
26.	The two major parts that comprise the ner a. sympathetic and parasympathetic ner b. central and peripheral nervous system c. brain and spinal cord	vous s		40 M,F,O b
	d. autonomic and somatic nervous syste	ems		
27.	The brain and spinal cord make up the			40
	a. central b. somatic	с. d	sympathetic parasympathetic	E,F,O
	b. somate	u.	parasympaticue	а
28.	The nervous system is made up o messages to the brain.	f nerv		40 M,F,O
	a. central	c.		b
	b. peripheral	d.	limbic	
29.	Each of the following is a part of the hind	lbrain	EXCEPT .	41
	a. the pons		the medulla	M,F,O
	b. the thalamus	d.	the cerebellum	b
30.	The medulla, pons, and cerebellum are al	-		41 M C N
	a. forebrain b. prebrain	с. d.		M,C,N d
	o. predram	u.	lindorani	u
31.	The plays a role in vital functions a. pons	s like h c.	neart rate, respiration, and blood pressure. medulla	41 D,F,O
	b. reticular activating system	d.	cerebellum	c
32.	The transmits information about to attention, sleep, and respiration.	body r	novement and is involved in functions related	41 D,F,O
	a. pons	c.	medulla	а
	b. thalamus	d.	cerebellum	
33.	The is located behind the pons an	d is in	volved in balance and motor behavior.	41
	a. cerebrum	c.	medulla	M,F,O
	b. reticular activating system	d.		d

34.		in inju	ce and coordinating her muscle movements. ry, one would first examine her medulla	41 D,A,O d
	b. thalamus	d.	cerebellum	
35.	The lies just above the hindbrain to the upper regions of the brain. a. forebrain b. prebrain	and co c. d.		41 M,F,N c
	-			
36.	Theextends from the hindbrain to			41 M E O
	a. pons b. medulla		reticular activating system cerebellum	M,F,O c
	o. modulu	u.		C
37.	The plays vital roles in sleep, atte	ention,	and arousal.	41
	<ul><li>a. limbic system</li><li>b. reticular activating system</li></ul>	С.	medulla	D,F,O
	b. reticular activating system	a.	cerebellum	b
38.	The relays messages to the corte	x that h	neighten alertness.	41
	a. thalamus		reticular activating system	M,F,O
	b. hypothalamus	d.	limbic system	c
39.	Depressant drugs, such as alcohol, lower	activit	y in the	41
57.	a. reticular activating system		cochlea	D,F,O
	b. amygdala		optic chiasm	a
10			,	4.1
40.	The reticular activating system is NOT p a. forebrain		me midbrain	41 M,C,N
	a. forebrain b. prebrain		hindbrain	b
	o. problam	u.	midoram	0
41.	Each of the following is in the forebrain			42
	a. cerebellum		limbic system	D,F,O
	b. cerebrum	d.	basal ganglia	а
42.	The relays sensory information for to the cortex.	rom th	e sense organs (i.e., the eyes and ears)	42 D,F,O
	a. thalamus	с.	00	а
	b. hypothalamus	d.	cerebellum	
43.	The is involved in such functions	s as sle	ep and attention.	42
	a. cingulate nucleus		medulla	D,F,R
	b. thalamus	d.	cerebellum	b
44.	Theis a tiny structure located betw	ween th	ne thalamus and the nituitary gland	42
	a. cingulate gyrus		hippocampus	 D,F,O
	b. cerebellum		hypothalamus	d
4.5				10
45.	The is vital in regulating body te concentrations, and motivation and emot	mperat	ture, storage of nutrients, fluid	42 D,F,O
	a. thalamus	юп. с.	basal ganglia	b,1,0
	b. hypothalamus	d.		-
				10
46.	The is involved in a range of mo			42 M E O
	hunger, thirst, sex, parenting behaviors, a a. thalamus		basal ganglia	M,F,O b
	b. hypothalamus		cerebellum	U

47.	The hypothalamus is part of the			42	
	a. limbic system	c.	basal ganglia	M,F,O	
	b. endocrine system	d.	hindbrain	а	
48.	The plays a role in memory and i	in regul	lating basic drives involving hunger, thirst	42	
	and aggression.			D,F,O	
	a. basal ganglia	c.	reticular activating system	d	
	b. cerebellum	d.	limbic system		
49.	The regulate(s) postural movement	ents and	l coordination.	42	
	a. basal ganglia		pons	D,F,O	
	b. thalamus	d.	limbic system	а	
50.	The is your "crowning glory" and	d is res	ponsible for most of your logical thought	42	
	processes.			D,F,O	
	a. cerebrum	с.	corpus callosum	а	
	b. cerebellum	d.	limbic system		
51.	The cerebral cortex makes up the surface	e of the	·	42	
	a. cerebrum	с.	corpus callosum	E,F,O	
	b. cerebellum	d.	limbic system	а	
52.	The deterioration of the basal ganglia is a	associa	ted with	42	
	a. Alzheimer's disease		Huntington's disease	D,F,O	
	b. Schizophrenia	d.	Autism	c	
53.	The has been implicated in certain	in types	s of sleep disorders.	42	
	a. medulla	• •	hippocampus	D,F,N

209.	Harlen suffers from bizarre hallucinations and delusions o that demons are tormenting him. He often babbles aimless grotesque positions, claiming the demons are doing it to h	ly and contorts his body into	51 M,A,N c
	has a. a neurosis c. a psycho	sis	
		s of free association	
210.	For Freud, psychological health was related to		51
210.	a. the abilities to love and work		M,F,O
	b. differentiation of the self		a
	c. compensation for feelings of inferiority		
	d. positive outcomes of resolving life crises		
211.	For both Jung and Adler, psychological health was related	to .	51
	a. the abilities to love and work	·	D,F,O
	b. differentiation of the self		b
	c. compensation for feelings of inferiority		
	d. positive outcomes of resolving life crises		

212.	<ul> <li>Adler, but not Jung, felt that psychological health was related to</li> <li>a. the abilities to love and work</li> <li>b. differentiation of the self</li> <li>c. compensation for feelings of inferiority</li> <li>d. positive outcomes of resolving life crises</li> </ul>	51 D,F,O c
213.	Maureen is feeling increasingly anxious. Her therapist suggests to Maureen that she has not psychologically separated herself from her mother. Maureen's therapist most likely agrees with the theories ofa. Erik Ericksonc. Carl Jung d. Margaret Mahler	50-51 D,A,O d
214.	<ul> <li>Each of the following is true of psychodynamic theory EXCEPT</li> <li>a. it fails to adequately account for the effects of sexual and aggressive impulses</li> <li>b. it has pervaded the general culture</li> <li>c Freud's ideas of childhood sexuality were both illuminating and controversial</li> <li>d. it increased awareness that people may be motivated by hidden drives of a sexual or aggressive nature</li> </ul>	51 D,F,N a
215.	<ul> <li>Each of the following is a criticism of Freud's theory EXCEPT</li> <li>a. many of his concepts cannot be scientifically proved or disproved</li> <li>b. he underemphasized the importance of unconscious processes on behavior</li> <li>c. he underemphasized the role of social relationships in shaping personality</li> <li>d. he placed too much emphasis on sexual and aggressive impulses</li> </ul>	51 D,F,O b
The P	sychological Perspective Learning Models	
216.	The first major psychological theories of abnormal behavior werea. phenomenological theoriesc. organic theoriesb. behavioral theoriesd. psychodynamic theories	52 E,F,O d
217.	The American psychologist who is known as the "father of behaviorism" isa. John B. Watsonc. William Jamesb. B. F. Skinnerd. Carl Rogers	52 M,F,O a
218.	Who discovered the conditioned reflex?a. John B. Watsonc. Ivan Pavlovb. B. F. Skinnerd. Albert Bandura	52 M,F,O c
219.	<ul> <li>The behavioral perspective views abnormal behavior as</li> <li>a. symptomatic of underlying psychological problems</li> <li>b. symptomatic of underlying biological problems</li> <li>c. the incurable result of a person's genetically inherited traits</li> <li>d. learned in much the same way as normal behavior</li> </ul>	52 E,C,O d
220.	<ul> <li>A behavior therapist would attribute abnormal behavior to each of the following EXCEPT</li> <li>a. a learning history that is different from the learning histories of most people</li> <li>b. inconsistent discipline</li> <li>c. neglectful or abusive parents</li> <li>d. conflicts between the id and superego</li> </ul>	52 M,C,O d
221.	Each of the following scientists is associated with the psychological theory of behaviorism EXCEPTa. John B. Watsonc. B. F. Skinner d. Ivan Pavlov	52 M,F,O b

222.	Each of the following rejected concepts of personal freedom, free choice, and self- direction EXCEPT	
	a. Freud c. Watson	b
	b. Adler d. Skinner	
223.	Classical conditioning was discovered by	53
	a. Bandura c. Skinner	E,F,O
	b. Watson d. Pavlov	d
224.	According to classical conditioning, learning occurs when stimuli are	53
	a. associated c. generalized	M,C,O
	b. reinforced d. discriminated	а
225.	To a behaviorist, a change in the environment, like putting meat on a dog's tapping beneath the knee, is referred to as a(n)	tongue or 53 E,C,O
	a. reflex c. stimulus	с
	b. parameter d. antecedent	
226.	To a behaviorist, a reflex, such as a knee-jerk when your knee is tapped by a rubber mallet, is called $a(n)$	a physician's 53 E,C,O
	a. stimulus c. parameter	d
	b. antecedent d. response	
227.	In conditioning, responses are elicited by stimuli.	53
	a. operant c. introjective	M,C,O
	b. classical d. reactive	b
228.	A scientist rings a bell just prior to presenting meat to the dogs in his labora several pairings, the dogs begin salivating when the bell is rung, even when presented. In this study, the meat is the a. unconditioned stimulus c. conditioned stimulus	
	b. unconditioned response d. conditioned response	
229.	A scientist rings a bell just prior to presenting meat to the dogs in his labora several pairings, the dogs begin salivating when the bell is rung, even when presented. In this study, the bell is the	
	a. unconditioned stimulus c. conditioned stimulus	
	b. unconditioned response d. conditioned response	
230.	A scientist rings a bell just prior to presenting meat to the dogs in his labora several pairings, the dogs begin salivating when the bell is rung, even when presented. In this study, salivation to the meat is the a. unconditioned stimulus c. conditioned stimulus b. unconditioned response d. conditioned response	
231.	A scientist rings a bell just prior to presenting meat to the dogs in his labora several pairings, the dogs begin salivating when the bell is rung, even when presented. In this study, salivation to the bell is the a. unconditioned stimulus c. conditioned stimulus b. unconditioned response d. conditioned response	
232.	A scientist rings a bell just prior to presenting meat to the dogs in his labora several pairings, the dogs begin salivating when the bell is rung, even when presented. This experiment utilizes a. classical conditioning c. aversive conditioning b. operant conditioning d. systematic desensitization	no meat is E,A,O a

233.	A little boy is allowed to play with a laboratory rat and shows no fear of it. Then, a scientist makes a scary noise by banging an iron bar whenever the little boy reaches for the rat. Soon, the boy begins crying whenever the rat comes near him. This experiment utilizesa. classical conditioningc. aversive conditioning d. systematic desensitization	53 E,A,O a
234.	A little boy is allowed to play with a laboratory rat and shows no fear of it. Then, a scientist makes a scary noise by banging an iron bar whenever the little boy reaches for the rat. Soon, the boy begins crying whenever the rat comes near him. In this study, the scary noise is the a. unconditioned stimulus c. conditioned stimulus b. unconditioned response d. conditioned response	53 D,A,O a
235.	A little boy is allowed to play with a laboratory rat and shows no fear of it. Then, a scientist makes a scary noise by banging an iron bar whenever the little boy reaches for the rat. Soon, the boy begins crying whenever the rat comes near him. In this study, the rat is the a. unconditioned stimulus c. conditioned stimulus b. unconditioned response d. conditioned response	53 D,A,O c
236.	A little boy is allowed to play with a laboratory rat and shows no fear of it. Then, a scientist makes a scary noise by banging an iron bar whenever the little boy reaches for the rat. Soon, the boy begins crying whenever the rat comes near him. In this study, the boy's fear of the noise is the a. unconditioned stimulus c. conditioned stimulus b. unconditioned response d. conditioned response	53 D,A,O b
237.	A little boy is allowed to play with a laboratory rat and shows no fear of it. Then, a scientist makes a scary noise by banging an iron bar whenever the little boy reaches for the rat. Soon, the boy begins crying whenever the rat comes near him. In this study, the boy's fear of the rat is the a. unconditioned stimulus c. conditioned stimulus b. unconditioned response d. conditioned response	53 D,A,O d
238.	Flinching at the sound of the dentist's drill as you are sitting in the waiting room is an example ofa. classical conditioningc. cue-controlled desensitization d. negative reinforcement	53 M,C,O a
239.	Ashley is riding on an elevator when the lights suddenly go off and the elevator stops, trapping her inside. After an hour, electricity is restored and Ashley is able to safely exit the elevator. Ashley subsequently refuses to ride on an elevator because she is "afraid." Ashley's fear is the result ofa. operant conditioningc. classical conditioning d. aversive conditioning	53 M,A,O c
240.	A disorder that may be acquired by classical conditioning isa. bipolar disorderc. obsessive compulsive anxiety disorderb. hysteriad. phobia	53 M,F,O d
241.	The person who conducted the "Little Albert" study wasa. Watsonc. Bandurab. Skinnerd. Pavlov	54 M,F,N a

242.	<ul> <li>The "Little Albert" study was important because it proved that</li> <li>a. animals could be classically conditioned</li> <li>b. animals could be operantly conditioned</li> <li>c. humans could be classically conditioned</li> <li>d. humans could be operantly conditioned</li> </ul>			54 M,F,N c
243.	In the "Little Albert" study, an 11-month-old a. observational learning b. classical conditioning		y was taught to fear a rat through cognitive retraining operant conditioning	54 M,F,N b
244.		c.	y was conditioned to fear a psychologist rat	54 E,F,N d
245.	1	c.		54 D,A,O a
246.		c.	-	54 M,F,O b
247.	1	fre c. d.		54 M,C,O c
248.	A stimulus or event that increases the frequent is called a. an unconditioned response b. a punishment	c.	-	54 M,F,R d
249.	A scientist gives a rat a food pellet every time a. positive reinforcement de b. negative reinforcement de	c.	presses a bar. This is an example of classical conditioning aversive conditioning	54 E,C,O a
250.	reinforcers. a. manifest		requency of the preceding behavior, are called negative latent	54 M,C,N b
251.	÷		punishment	54 M,A,O b
252.	···· ··· ··· ··· ··· ··· ··· ··· ··· ·	c. d.		54 E,F,R c
253.	÷		punishers	54 D,C,O b

254.	Nagging someone to do something for you, then stopping the nagging once they've done it, isan example ofa. positive reinforcementc. punishmentb. negative reinforcementd. aversive conditioning	54 M,A,N b
255.	Painful or aversive stimuli that decrease or suppress the frequency of the preceding behaviorare known asa. positive reinforcersc. extinguishersb. negative reinforcersd. punishments	55 M,F,R d
256.	<ul> <li>Each of the following statements regarding punishment is true EXCEPT</li> <li>a. people may withdraw from learning situations when punishment is used</li> <li>b. punishment may generate anger and hostility rather than constructive learning</li> <li>c. punishment eliminates undesirable behavior</li> <li>d. "punishment" may actually reward undesirable behaviors if it is the only way the person can get attention</li> </ul>	55 M,F,R c
257.	Learning theorists recommend that adults emphasize for teaching and training children.a. positive reinforcersc. punishmentb. negative reinforcersd. classical conditioning	55 D,C,O a
258.	Which of the following persons has contributed to the development of social-cognitive theory?a. Albert Bandurac. Heinz Hartmannb. Carl Rogersd. Harry Stack Sullivan	55 D,F,R a
259.	Each of the following theorists EXCEPTis associated with social-cognitive theory.a. Bandurac. Rotterb. Maslowd. Mischel	55 M,F,N b
260.	Social-cognitive theorists emphasize the role of and modeling in shaping personality.a. biological influencesc. classical conditioningb. self-actualizationd. thinking	55 E,F,O d
261.	The process of acquiring new behaviors and knowledge by imitating others is calleda. conditioningc. modelingb. abreactiond. implementing	55 E,F,O c
262.	<ul> <li>A learning-based theory that emphasizes observational learning and incorporates roles for cognitive variables in determining behavior is</li> <li>a. Gestalt theory c. social-cognitive theory</li> <li>b. humanistic theory d. sociocultural theory</li> </ul>	55 E,C,R c
263.	Which of the following would be MOST important to a social-cognitive theorist?a. rewardsc. expectanciesb. unconditioned stimulid. inherited traits	55 M,C O c
264.	Personal beliefs about outcomes of engaging in particular behaviors are calleda. expectanciesc. encoding strategiesb. competenciesd. antecedents	55 E,C,R a

265.	Gloria goes to a therapist for treatment of her test anxiety. Her therapist says that her test anxiety is a learned reaction to the extreme demands for achievement placed on her by her parents while she was growing up. The therapist says that Gloria can learn to correct her test anxiety by learning to relax in test-taking situations. Gloria's therapist is using the model of treatment.	55 E,A,O c
	a. psychoanalyticc. behavioralb. humanisticd. sociocultural	
266.	<ul> <li>Frank's father was a criminal and Frank becomes a criminal. Whose theory of learning would best explain Frank's behavior?</li> <li>a. Pavlov</li> <li>b. Skinner</li> <li>c. Watson</li> <li>d. Bandura</li> </ul>	55 D,A,O d
267.	<ul> <li>Social-cognitive theorists would attribute a phobia of spiders to</li> <li>a. being stung by a spider as a baby</li> <li>b. oedipal rejection by the mother</li> <li>c. a mother's fear of spiders</li> <li>d. parental punishment for playing with insects</li> </ul>	55 D,C,O c
268.	The learning perspective has spawned therapy.a. behaviorc. classical conditioningb. reinforcementd. vicarious	55 E,F,O a
269.	<ul> <li>Which of the following is NOT a criticism of learning models of behavior?</li> <li>a. They have not put enough emphasis on measuring observable behaviors.</li> <li>b. They cannot explain the richness of human experience.</li> <li>c. They ignore the fact that humans experience thoughts and dreams and formulate goals and aspirations.</li> <li>d. They do not pay adequate attention to the influence of genetic factors.</li> </ul>	56 M,F,O a
270.	<ul> <li>Learning models of behavior, in contrast to psychodynamic approaches,</li> <li>a. focus on the importance of self-direction</li> <li>b. emphasize observable behaviors</li> <li>c. focus on the experiences of dreams, goals and aspirations</li> <li>b. emphasize the genetic contributions to behavior</li> </ul>	55-56 M,C,O b
271.	The "third force" in modern psychology that emerged during the mid-20th century is psychology.a. psychodynamicb. behavioralc. cognitived. humanistic	56 M,F,O d
272.	Humanistic psychology emerged as a major force in psychology in the century.a. late 19thc. mid-20thb. early 20thd. late 20th	56 M,F,O c
273.	A leader of the humanistic movement in American psychology wasa. Albert Ellisb. Carl Rogersc. B. F. Skinnerd. Albert Bandura	56 M,F,O b
274.	A leader of the humanistic movement in American psychology wasa. Aaron Beckc. Fritz Perlsb. John B. Watsond. Abraham Maslow	56 M,F,O d

275.	Which of the following theorists is most likely to see human beings as "actors" ratherthan "reactors"?a. Freudb. Pavlovc. Maslowd. Skinner	56 M,F,O c
276.	According to humanistic psychologists, the tendency to strive to become all that we arecapable of becoming is calleda. self-potentiationc. self-actualizationb. transcendental reformationd. catharsis	56 M,C,O c
277.	Gloria goes to a therapist for treatment of her test anxiety. Rather than tell Gloria thatsomething is wrong with her, the therapist helps Gloria find her own explanation ofwhat is wrong and focuses on how various events in her life, including her test anxiety,have kept her from becoming self-actualized. Gloria's therapist is most likea. Sigmund Freudc. Harry Stack Sullivanb. Albert Ellisd. Abraham Maslow	56-57 E,A,O d
278.	Maria goes to a therapist for treatment of her test anxiety. Rather than tell Maria that something is wrong with her, the therapist helps Maria find her own explanation of what is wrong and focuses on how various events in her life, including her test anxiety, have kept her from living authentically. Maria's therapist is using the treatment model. a. psychoanalytic c. behavioral b. cognitive d. humanistic	56-57 M,A,O d
279.	<ul> <li>For Rogers, a child's distorted self-concept can come from parents'</li> <li>a. sexual abuse</li> <li>b. favoritism of one sibling over another</li> <li>c. conditional positive regard</li> <li>d. qualified negative regard</li> </ul>	56 M,F,O c
280.	When parents accept children only when they behave in an approved manner, they are showing their childrena. unconditional positive regardc. low self-esteemb. conditional positive regardd. unrealistic self-ideals	56 M,C,O b
281.	Children who see themselves as worthwhile only when they behave in certain approved ways have developed, according to Rogers.a. negative self-efficacyc. unconditional positive regard d. conditions of worth	56 D,C,O d
282.	<ul> <li>According to Rogers, our self-esteem is most likely to plummet when</li> <li>a. we have no conditions of worth</li> <li>b. we experience unconditional positive regard</li> <li>c. we have no self-ideals</li> <li>d. our ideals are based on the demands of others</li> </ul>	56-57 M,F,O d
283.	According to Rogers, parents help children develop self-esteem and actualizethemselves when they show thema. unconditional positive regardc. conditions of worthb. conditional positive regardd. strict rules and discipline	56 M,F,O a
284.	According to Rogers, when parents accept children as having intrinsic merit regardlessof their behavior at a particular moment in time, they are showing thema. unconditional positive regardc. perceived self-efficacyb. conditional positive regardd. unrealistic self-ideals	56 M,C,O a

285.	Paul visits a therapist for treatment of his depression. His therapist helps Paul recognizethat his depression arises from his failure to meet various conditions of worth heinternalized as a child. Throughout the therapy process, Paul discovers and developshis own unique potential. Paul's therapist most resemblesa. Beckc. Hartmannb. Rogersd. Horney	57 D,A,O b
286.	Rogers's method of psychotherapy is calleda. person-centered therapyc. rational-emotive behavior therapyb. logotherapyd. Gestalt therapy	57 M,F,O a
287.	According to the text, the humanistic model's primary strength and possibly its primaryweakness is itsa. naivetéc. ignoring of defense mechanismsb. focus on conscious experienced. failure to develop a narrow therapy style	57 D,C,O b
288.	<ul> <li>Each of the following is a strength or contribution of humanistic psychology EXCEPT</li> <li>a. the innovation of therapy methods to help people along the pathways to self-acceptance and self-discovery</li> <li>b. a focus on conscious experience</li> <li>c. bringing the concepts of free choice, inherent goodness, responsibility, and authenticity to modern psychology</li> <li>d. the formulation of valid and testable concepts and theories</li> </ul>	57-58 M,F,O d
289.	A cognition is most similar toa. an emotionc. an urgeb. a thoughtd. an experience	58 E,C,O b
290.	Theorists who focus on abnormal thought patterns, attitudes, and expectationsassociated with abnormal behavior are theorists.a. psychodynamicc. Gestaltb. humanisticd. cognitive	58 M,C,O d
291.	Cognitive psychologists conceptualize human behavior in terms ofa. existentialist modelsc. information-processing modelsb. organic modelsd. sociocultural models	58 M,F,O c
292.	Albert Ellis and Aaron Beck are most closely associated with psychology.a. social learningc. humanisticb. psychodynamicd. cognitive	58 M,F,O d
293.	The view that abnormality results from faulty storage, input, or retrieval of information iscentral to psychology.a. eclecticb. cognitivec. Skinneriand. humanistic	58 M,C,O b
294.	Cognitive psychologists view psychological disorders as disturbances in all of the following processes EXCEPT a. interpreting or transforming information b. accessing ideas from memory c. psychosexual development d. acting on information	58 M,F,O c

295.	<ul> <li>According to cognitive psychology, "input" is</li> <li>a. accessing information from memory</li> <li>b. interpreting or storing information</li> <li>c. acting on information</li> <li>b. based on perception</li> </ul>	58 M,F,O d
296.	According to cognitive psychology, information is based on perception.a. inputc. manipulationb. storaged. retrieval	58 M,F,O a
297.	<ul> <li>According to cognitive psychology, "manipulation" refers to</li> <li>a. the way in which information is perceived</li> <li>b. the way in which information is stored</li> <li>c. the way in which information is interpreted or transformed</li> <li>d. the way in which information is retrieved</li> </ul>	58 M,C,O c
298.	According to cognitive psychology, the process by which information is interpreted ortransformed is referred to asa. outputc. storageb. manipulationd. retrieval	58 M,C,O b
299.	Placing information in memory is known as, according to cognitive theory.a. inputc. storageb. repressiond. awareness	58 E,C,O c
300.	Donald is struggling with his studies. It appears that no matter how hard he tries to remember certain facts, he is unable to do so. A cognitive psychologist would say that Donald is having difficulty witha. inputc. effortb. outputd. storage	58 M,A,O d
301.	If a person has difficulty remembering information they once knew, a cognitive psychologist would say the difficulty was due to a problem with a. retrieval c. input b. output d. manipulation	58 M,A,O a
302.	Accessing information from memory is known asa. manipulationc. retrievalb. storaged. input	58 E,C,O c
303.	According to cognitive theory, acting on information is known asa. inputc. manipulationb. outputd. retrieval	58 M,C,O b
304.	According to cognitive therapists, errors in thinking are known asa. cognitive manipulationsc. cognitive distortionsb. cognitive encodingd. cognitive catharsis	58 E,C,O c
305.	<ul> <li>Social-cognitive theorists focus on</li> <li>a. behaviors in general</li> <li>b. the ways in which behaviors are elicited</li> <li>c. the ways in which behaviors are encoded</li> <li>d. the ways in which behaviors are demonstrated</li> </ul>	58 D,F,O c

306.	Albert Ellis is aa. psychologistb. psychiatristc. social workerd. philosopher	58 E,F,O a
307.	A leader in the field of cognitive theory isa.L. Ron Hubbardb.Abraham Maslowc.Fritz Perlsd.Albert Ellis	58 M,F,O d
308.	Albert Ellis uses a(n) approach to explain abnormal behavior.a. personal constructc. A-B-C approachb. self-actualizationd. behavioral	59 M,F,O c
309.	In Ellis's A-B-C approach, A stands fora. analyzing the relevant experienceb. acuteness of the situationc. actuality of the circumstanced. activating event	59 D,F,O d
310.	In Ellis's A-B-C approach, B stands fora. beliefsc. behavioral cuesb. borrowed feelingsd. blockages	59 D,F,O a
311.	In Ellis's A-B-C approach, C stands fora. controlc. cognitive distortionsb. consequencesd. contentedness	59 D,F,O b
312.	For Ellis, the key factor in abnormal behavior is a person'sa. early childhoodc. genetic historyb. conditions of worthd. beliefs	59 E,F,O d
313.	For Ellis, irrational beliefs lead to distress through a process calleda. sensitizationc. catastrophizingb. self-efficacyd. introjection	59 M,F,O c
314.	The creator of rational-emotive behavior therapy isa. Beckc. Ellisb. Kellyd. Bandura	59 M,F,O c
315.	Phil visits a therapist for treatment of his depression. The therapist tells him that his problems arise from a series of irrational beliefs about himself and about life which he has developed over the years. She says that to overcome the depression, Phil must replace his irrational beliefs with rational self-talk. Phil's therapist is most similar to	59 D,A,O a
316.	Rachel goes to a therapist for treatment of her test anxiety. Her therapist tells her that her test anxiety results from self-defeating attitudes, irrational self-talk, and judging herself entirely on the basis of her flaws rather than her strengths. Rachel's therapist is using the treatment model. a. psychoanalytic c. humanistic	59 E,A,O b
317.	<ul> <li>b. cognitive</li> <li>d. sociocultural</li> </ul> Monica goes to a therapist for treatment of her test anxiety. Her therapist tells her that her test anxiety results from self-defeating attitudes, irrational self-talk, and faulty cognitions. Monica's therapist is most like <ul> <li>a. Albert Ellis</li> <li>b. Abraham Maslow</li> <li>c. Carl Jung</li> <li>d. Carl Rogers</li> </ul>	59 D,A,O a

318.		. Aaron Beck I. Alfred Adler	59 M,F,O c
319.	Raul visits a therapist for treatment of his dep problem stems from a series of cognitive error his successes and pessimistically assumes the most similar to in the way she concep a. Skinner	rs and distortions in which he minimizes worst about his future. Raul's therapist is	59 D,A,O b
		1. Maslow	
320.	Which of the following is NOT one of the fou emphasized by Aaron Beck?		59 D,F,O
		<ul><li>magnification</li><li>relativistic thinking</li></ul>	d
321.	Which of the following is NOT one of the fou emphasized by Aaron Beck?		59 D,F,O
		<ul><li>magnification</li><li>absolutist thinking</li></ul>	b
322.			59 D,A,O a
323.	all of his other subjects, Mark continues to foo himself miserable. According to Beck, Mark a. overgeneralization	in his English class. Although he has "A's" in cus on his one average grade and he is making 's emotional distress is due to c. selective abstraction d. absolutist thinking	59 D,A,O c
324.	emotional distress is due to a. magnification	<ul><li>they are laid off, Beck would suggest that their</li><li>selective abstraction</li><li>absolutist thinking</li></ul>	59 D,A,O b
325.	ε		59 M,A,O d
326.	ε	s seeing the world in black and white terms. c. magnification d. overgeneralization	59 E,F,O a

329.	<ul> <li>Cognitive therapists have largely focused on</li> <li>a. treatment of depression and anxiety</li> <li>b. development of treatment approaches</li> <li>c. development of conceptual models</li> <li>d. treatment of schizophrenia</li> </ul>	60 M,F,O a
The S	Sociocultural Perspective	
330.	Sociocultural theorists seek causes of behavior that may reside in all but which of the following? a. ethnicity, gender, and social class c. failures of society b. roles of social and cultural factors d. psychosocial stages of development	60 E,F,O d
331.	<ul> <li>According to radical psychosocial theorists like Thomas Szasz,</li> <li>a. there is no such thing as a psychological disorder or mental illness</li> <li>b. mental illness is a result of the hardships that people encounter in society</li> <li>c. mental illness is due to the stress of living in a fast paced society</li> <li>d. mental illness is purely a biological phenomenon</li> </ul>	60 M,F,O a
332.	The largest non-White population group in the United States for 2007 isa. Hispanic Americansc. African Americansb. Asian Americansd. Native Americans	60 M,F,O a
333.	In the most recent population census, nearly U.S. residents described themselves asmultiracial.a. one millionc. seven millionb. three milliond. twelve million	61 D,F,O c
334.	In the United States and Canada, the most impoverished ethnic group isa. African Americansc. Hispanic Americansb. Native Americansd. Asian Americans	62 M,F,O b
335.	<ul> <li>The highest suicide rate in the United States is among</li> <li>a. male African American adolescents and young adults</li> <li>b. female Hispanic American adolescents</li> <li>c. elderly Caucasian males</li> <li>d. Native American adolescents and young adults</li> </ul>	62 D,F,O d
336.	<ul> <li>The depression that is so common among native peoples in America appears to reflect the loss of a relationship with the world based on</li> <li>a. maintaining harmony with nature</li> <li>b. cultural isolation from European whites</li> <li>c. spiritual and demonological rituals</li> <li>d. maintaining intertribal unity</li> </ul>	62 E,F,O a
337.	<ul> <li>According to the sociocultural perspective, which of the following statements is NOT true?</li> <li>a. People from lower socioeconomic groups are more likely to be institutionalized for psychiatric problems.</li> <li>b. Because mental illness is biological in nature, social stressors are not as significant as once thought.</li> <li>c. Living in poverty subjects people to greater social stress, thus creating a greater risk to develop severe behavior problems.</li> <li>d. Problem behaviors such as alcoholism may lead people to drift downward in social status.</li> </ul>	61-63 E,F,O b

338.	According to sociocultural theorists, the linkage between low socioeconomic status and severe behavior problems may be explained by thea. diathesis-stress modelc. downward drift hypothesisb. theory of self-actualizationd. selective abstraction theory	63 E,F,O c
The B	Ciopsychosocial Perspective	
339.	The psychological model arguing that abnormal behaviors are often caused by a combinationof genetically inherited vulnerabilities and various life stresses is the model.a. diathesis-stressc. downward drift hypothesisb. perceived self-efficacyd. stress amplification	64 E,F,O a
340. <b>Box:</b> (	The diathesis-stress model was originally developed as an explanatory framework for understanding the development of a. personality disorders c. paranoia b. dissociative amnesia d. schizophrenia Controversies in Abnormal Psychology: Is It All in the Genes?	64 M,F,O d
		44
341.	We can now read the code that comprises a human's genetic composition because ofa. computerized technologyc. the new evolutionary theoryb. cracking the human genomed. our better understanding of DNA	E,F,O b
342.	In which disorder is genetics least likely to play an important role? a. antisocial personality disorder c. posttraumatic stress disorder b. alcoholism d. autism	44 D,C,R c
343.	<ul> <li>Using their new genetic knowledge, scientists aspire to successfully treat mental disorders by</li> <li>a. repairing genes</li> <li>b. developing patches to deliver medication</li> <li>c. cloning newborns</li> <li>d. finding compatible tissue donors</li> </ul>	
344.	The disorder with the strongest genetic contribution is arguablya.depressionc.borderline personality disorderb.posttraumatic stress disorderd.schizophrenia	44 M,F,O d
345.	The debate of heredity versus environment is also known asa. genes versus meansc. body versus soulb. Mendel versus Darwind. nature versus nurture	44 E,F,O d
346.	For monozygotic (identical) twins, if one twin develops schizophrenia, the odds that the othertwin will also develop schizophrenia are about percent.a. 25b. 50c. 75d. 100	44 D,F,N b
347.	<ul> <li>The contemporary view of the nature-nurture debate is best expressed in terms of</li> <li>a. neither nature nor nurture</li> <li>b. nature, not nurture</li> <li>c. nurture, not nurture</li> <li>d. nature and nurture acting together</li> </ul>	44 M,F,N d

## **True-False Questions**

348.	Every neuron has a cell body.	38,T
349.	Neural axons can extend several feet.	38,T
350.	Genetics play a large role in many forms of abnormal behavior.	38,T
351.	All neurons use hormones to communicate with each other.	38,F
352.	Neural messages electrically jump across the synaptic cleft like a spark.	38,F
353.	A transmitting neuron is known as presynaptic.	38,T
354.	Abnormal behavior is connected with chemical imbalances in the brain.	40,T
355.	The cerebellum contains the cerebral cortex.	42,F
356.	Auditory stimuli are processed in the temporal lobes.	43,T
357.	Recent research shows that most psychological disorders are caused by defective genes.	45,F
358.	Freud's psychoanalytic theory represents a cognitive model of mental functioning.	45,F
359.	Freud likened the mind to an immense iceberg, with only the tip rising into conscious awareness.	44,T
360.	The ego is the only psychic structure at birth.	46,F
361.	The superego serves as the moral guardian of personality.	46,T
362.	Freud believed we can view the unconscious mind directly.	46,F
363.	The ego is governed by the reality principle.	46,T
364.	The use of defense mechanisms is a sign of abnormal adjustment.	46,F
365.	Freud argued that sex drives were the dominant factors in the development of personality, except among children.	48,F
366.	Freud believed that fingernail biting and cigarette smoking as an adult are signs of early childhood conflict.	48,T
367.	Freud believed that an ancient Greek legend about a king who slew his father and married his mother contained insights into the nature of human development.	48,T
368.	Freud believed that resolving the Oedipus and Electra complexes were crucial for coping with anxiety during the genital stage of development.	48,F
369.	Modern psychodynamic theories place more emphasis on the id than Freud.	49,F
370.	Adler and Jung both believed that self-awareness plays a major role in the development of personality.	49,T

371.	Adler believed that we all encounter feelings of inferiority to some degree due to our small size during childhood.	49,T
372.	Whereas Freud's stages of development end with early adolescence, Erikson's stages explain development throughout adulthood and old age.	50,T
373.	According to psychoanalytic theory, neuroses develop when the id breaks through into consciousness and takes over personality.	51,F
374.	Freud equated psychological health with abilities to love and work.	51,T
375.	Both Adler and Jung equated psychological health with successfully compensating for feelings of inferiority.	51,F
376.	The learning perspectives of Watson and Skinner were the first major psychological theories of abnormal behavior.	52,F
377.	From the behavioral perspective, abnormal behavior is symptomatic of underlying biological or psychological problems.	52,F
378.	Behaviorists see us as products of environmental influences that shape and manipulate our behavior.	52,T
379.	Classical conditioning was discovered by accident.	53,T
380.	Punishment may suppress, but does not eliminate undesirable behavior.	55,T
381.	Rewarding desirable behavior is generally preferable to punishing misbehavior.	55,T
382.	Social-cognitive theory is an expansion of psychodynamic theory.	55,F
383.	One of the principle contributions of learning models is their emphasis on observable behavior.	55,T
384.	According to behaviorists, by being true to ourselves we live authentically.	56,F
385.	Rogers believed that parents help children when they show them conditional positive regard.	56,F
386.	Unlike the behavioral perspective, the humanistic perspective emphasizes that people have little or no free will.	56,F
387.	Children may acquire a distorted self-concept that mirrors what others expect them to be, but that does not reflect what they truly are.	57,T
388.	The self-actualizing force is directly measurable.	57,F
389.	Many cognitive theorists are influenced by the concepts of computer science.	58,T
390.	According to a leading cognitive theorist, emotional distress is caused by the beliefs people hold about negative life experiences, not by the experiences themselves.	59,T
391.	Albert Ellis is a leading sociocultural theorist.	59,F
392.	People can make themselves miserable by the way in which they interpret events.	59,T

393.	Cognitive perspectives have had little impact on the development of contemporary therapeutic approaches.	59,F
394.	Sociocultural theorists seek causes of abnormality in the failures of the individual.	60,F
395.	Black Americans have higher rates of psychological disorders than White European Americans, even when we account for income differences between these groups.	62,F
396.	A diathesis is a vulnerability or predisposition to a particular disorder.	64,T

# **Essay Questions**

397.	Describe the structure and functions of the neuron and explain how neurons communicate with each other.	38-40 F, Old
398.	Briefly describe the various parts of the nervous system, explaining what each does.	40-43 F, Old
399.	Describe the structures of the brain and their functions.	40-43 F, Old
400.	Summarize research findings on the role of genetics and environment in the development of psychological disorders.	44 F, New
401.	Describe the basic tenets of Freud's psychodynamic theory.	45-48 C, Old
402.	Describe Freud's views on the structure of personality and the functions of each of the structures he proposed.	46 C, Old
403.	Explain what defense mechanisms are and for what they are used. Also, identify and give an example of at least five of the defense mechanisms proposed by Freud.	46-47 C, Old
404.	Identify and briefly explain each of Freud's stages of psychosexual development.	47-48 C, Old
405.	Describe more recent psychodynamic theories, comparing and contrasting them to Freud's views.	49-50 C, Old
406.	Critically evaluate psychodynamic theories.	51-52 C, Old
407.	Describe behaviorism and the principles of classical conditioning.	52-54 C, Old
408.	Explain the principles of operant conditioning, clarifying the differences among positive reinforcers, negative reinforcers, and punishments, and primary and secondary reinforcers.	54-55 C, Old
409.	Describe social-cognitive theory and the role of expectancies on behavior.	55 C, Old
410.	Critically evaluate learning theories.	55-56 C, Old

411.	Outline the major tenets of humanistic philosophy.	56 C, Old
412.	Describe the views of Rogers regarding abnormal behavior.	56-57 C, Old
413.	Critically evaluate humanistic theory.	57-58 C, Old
414.	Discuss the information-processing approach, and the theoretical contributions of Ellis and Beck.	58-59 C, Old
415.	Critically evaluate cognitive theories.	59-60 C, Old
416.	Summarize the sociocultural perspective on abnormality, and evaluate its strengths and weaknesses.	60-63 C, Rev
417.	Summarize the biopsychosocial perspective on abnormality and evaluate its strengths and weaknesses.	63-66 C, New
