Skill: Analyzing

130) Compare and contrast the concepts of "mental health" and "emotional health". Give examples of each.

Answer: Mental health refers to the thinking part of psychosocial health while emotional health refers to the feeling part of psychosocial health. Examples will vary.

Diff: 3 Page Ref: 32-33
Skill: Analyzing

131) Define social bonds and social supports as they relate to social health.

Answer: Social bonds reflect the general degree and nature of our interpersonal contacts and interactions. The six main functions are to provide intimacy, feelings of belonging, opportunities for giving/receiving nurturance, reassurance of one's worth, assistance and guidance, and provide advice. Social supports refer to the relationships that bring positive benefits to the individual. They can be intangible (emotional support, encouragement) or tangible (housing, money).
