SHORT ANSWER

1. Explain the increasing use of groups and teams in U.S. businesses.

ANS:

In recent years, U.S. businesses have shifted attention away from the employment of traditional organizational subunits toward the use of teams. Three main reasons for the shift are as follows:

- 1. Many businesses have downsized and eliminated layers of management. In a flatter organization, communication across the organizational chart becomes more important, and teams can assist with this.
- 2. Companies implementing TQM programs are reorganizing to distribute the decision-making power throughout the organization.
- 3. Companies have learned that more can be accomplished when people work cooperatively. The synergy that results in effective teams increases creativity and improves business solutions.

PTS: 1 DIF: Application REF: p. 56-57 OBJ: 2-4

NAT: AACSB Teams | AACSB Critical Thinking

2. Competition is a standard way of life in U.S. companies, both internally and externally. What happens in a company when this competitive attitude becomes a "win/lose" philosophy? How can management help develop a "win/win" philosophy toward internal competition?

ANS:

Excessive internal competition can replace the cooperation that is necessary for the success of the company. In fact this can cause communication to diminish or cease. Management can help change this internal competition by developing open communication and providing information to employees. Reward systems can also increase cooperation. The cooperative spirit can be developed if employees have an understanding and appreciation for others' importance and functions.

PTS: 1 DIF: Application REF: p. 57 OBJ: 2-4

NAT: AACSB Teams | AACSB Critical Thinking

3. In your management training classes, you have noticed that a significant number of trainees seem to be gaining little value from the sessions. Devise an activity that emphasizes how poor listening habits undermine effective communication.

ANS:

Trainees could be asked to role play the various poor listening habits and how the suggestions for effective listening could be used to overcome the poor listening habits. Role play could be recorded and critiqued by the individuals involved. Trainees could be given a checklist of poor listening habits to consider and identify those challenges that are most significant to the individual. Each person could then write a simple action plan for overcoming the bad listening habits.

PTS: 1 DIF: Application REF: p. 54-55 OBJ: 2-3 NAT: AACSB Communication: Interpersonal|AACSB Communication: Spoken|AACSB Critical Thinking

4. Describe five positive team roles. How does their presence in a team help conteract negative roles that might emerge?

ANS:

The following five team roles are essential to successful team functioning:

- 1. A facilitator (gatekeeper) makes sure everyone gets the chance to be heard.
- 2. A harmonizer keeps tensions low.
- 3. A recordkeeper maintains records of team events and activities.
- 4. A reporter interfaces between the group and external group and parties.
- 5. A leader assumes a directive role.

A facilitator can make sure the dominator and isolate roles do not emerge and keep digressors on track. The harmonizer can minimize the effect of a detractor. The recordkeeper can keep an airhead or free rider accountable for his/her actions. The reporter can help keep a socializer on task, and the leader can help coordinate the positive efforts of the team.

CASE

1. Negative Metacommunications

In the past few months, Rhamel has frequently called in sick to work. He has received medical treatment for a respiratory infection, but the infection continues to reoccur. He has missed several important deadlines and his sick leave is dwindling quickly. Rhamel's supervisor has been patient and supportive through this illness, but other employees have recently been asked to handle Rhamel's work in addition to their own workload. Co-workers have started to feel resentful and this is evident in their nonverbal communication with Rhamel when he is at work. Give two examples of negative metacommunication and three examples of kinesic messages that coworkers may communicate to Rhamel that express their frustration and resentment.

ANS:

Metacommunication examples can include comments such as:

- "Maybe you should go to another doctor who might solve this problem."
- "You need to take better care of yourself so that you are more resistant to sickness."

"Maybe you could do some of your work at home when you can't come to the office."

These kinds of statements imply criticism of Rhamel's choice of his doctor, overall level of fitness, and other important choices he has made about his work and job.

Kinesic messages from disgruntled co-workers could include the following:

Visual--frowns, avoiding eye contact, ignoring Rhamel, and not engaging in friendly conversation.

Vocal--sarcasm, unfriendly tone, terse verbal exchange of job-related information. No expressed interest in Rhamel's physical condition and prolonged illness.

2. Effective Communication with Telecommuter

Sue has worked from home for four years, taking phone orders for a national catalog retailer. Sue feels unappreciated for her efforts and detached from management and coworkers. In times past, Sue's performance had been very efficient, responsible, on-time, and reliable. Lately, however, her performance has faltered. Monitors listening in to her calls find she is not selling the new additional offers, as now is required. Using the theories discussed in the chapter as a basis for comment, how would you as Sue's supervisor motivate her to higher productivity and satisfaction?

ANS:

Even if you have not done this in the past, it is never too late to use positive *stroking*; tell Sue how much you appreciate her years of service and good work. *Listen* intently to her expression of frustration--ask specifically what troubles her about selling additional offers. By paying more attention to her needs, you may make her feel more appreciated. *Empower* her to be a better salesperson by explaining the rationale for the new offers and listening to her input about them. Including her in strategy development may make her more willing to sell.
