Chapter 02

Decisions and Processes: Value Driven Business

True / False Questions

1. Spotlight Analysis used technology to filter through millions of American's demographics and other patterns to micro-target votes for John McCain's 2008 political campaign.

True False

2. Behavioral grouping can be accomplished quickly and with great detail as demonstrated by Spotlight Analysis when they found the swing voters they coined as the barn raisers.

True False

3. One of the most important and challenging question confronting managers today is how to lay the foundation for tomorrow's success while competing to win in today's business environment.

True False

4. The structure of a typical organization is similar to a pyramid, with different levels that require one consistent type of information to assist with all managerial decision making.

True False

5. Operational decisions or semistructured decisions arise in situations where established processes offer potential solutions.

True False

6. Unstructured decisions occur in situations in which no procedures or rules exist to guide decision makers towards the correct choice.

True False

7. At the strategic decision-making level employees develop, control, and maintain core business activities.

True False

8. The construction of a new city subway station and the processing of monthly payroll are both considered types of projects as defined in your text.

True False

9. Key performance indicators can focus on external and internal measurements.

True False

10. The proportion of the market that a firm captures is called market share.

True False

11. Benchmarks are baseline values the system seeks to attain.

True False

12. Effectiveness MIS metrics include throughput, transaction speed, and system availability.

True False

13. Measuring the amount of website traffic is the best way to determine a websites success.

True False

14. MIS support systems rely on models for computational and analytical routines that mathematically express relationships among variables.

True False

15. Streamlining information encompasses all of the information contained within a single business process or unit of work, and its primary purpose is to support the performing of daily operational or structured decisions.

True False

16. Sensitivity analysis, what-if analysis, optimization analysis, and market basket analysis are the common DSS analysis techniques.

True False

17. Digital dashboards offer consolidation, drill-down, and slice-and-dice capabilities.

True False

18. Managers use transactional information when making structured decisions at the operational level.

True False

19. The manipulation of information to create business intelligence in support of strategic decision making is referred to as OLTP or online transaction processing.

True False

20. Intelligent systems are various commercial applications of artificial intelligence.

True False

21. A neural network is a category of efficiency metrics where it attempts to measure the way the human brain works.

True False

22. Investment companies use genetic effectiveness metrics to help in trading decisions.

True False

23. A shopping bot is one of the simplest examples of an intelligent agent.

True False

24. At Microsoft's headquarters, to eliminate congestion and save on other business expenses the company offered employees the option to work virtually from home.

True False

25. Business-facing processes or back-office processes are invisible to the external customer but essential to the effective management and operation of the business.

True False

26. When evaluating the 5-steps in the order-to-delivery business process, step one includes creating a campaign and checking inventory, which are both part of the sales function.

True False

27. Strategic planning is a customer-facing business process.

True False

28. Product delivery is a customer-facing business process.

True False

29. Improving the efficiency and effectiveness of its business processes will improve a firm's value chain.

True False

30. A business management system is a graphic description of a process, showing the sequence of process tasks, which is developed for a specific purpose and from a selected viewpoint.

True False

31. To-Be process models show the results of applying change improvement opportunities to the current (As-Is) process model.

True False

32. The primary goal of an As-Is process model is to simplify, eliminate, and improve the To-Be processes.

True False

33. Business processes should never drive MIS choices and should be based on business strategies and goals.

True False

34. Redundancy occurs when a task or activity is never repeated.

True False

35. Business process reengineering is the analysis and redesign of workflow within and between enterprises.

True False

36. Business process management systems evaluate and improve processes that include both person-to-person workflow and system-to-system communications.

True False

37. BPM systems include advanced features such as enhanced process modeling, simulation, execution, and monitoring, providing a high level of flexibility while reducing costs.

True False

Multiple Choice Questions

38. Which of the following is not a type of organizational information system?

- A. Executive information system
- B. Decisions support system
- C. Analysis processing system
- D. Transactional processing system

39. Which of the below is an important challenge facing managers today?

- A. Making business decision
- B. Solving business problems
- C. Competing to win in today's market
- D. All of the above

40. What must managers be able to do to compete in today's global marketplace?

- A. Make decisions to gain competitive advantages
- B. Make decision that can help forecast future business needs
- C. Make decision that can help forecast future business requirements
- D. All of the above

41. Which of the below is not considered a challenge facing most managers today?

- A. Managerial decisions must be made quickly
- B. Strategic decisions need to be made by applying analysis techniques
- C. Artificial intelligence is required by all managers to be successful
- D. Managerial decisions require large amounts of information to analyze

42. What was the name of the analysis that Spotlight Analysis did for Barack Obama's 2008 presidential campaign?

- A. Visualization
- B. Transactional data
- C. Data poaching
- D. Micro-targeting

43. Which of the following is not included in the decision-making process?

- A. Data Collection
- B. Solution Benchmarking
- C. Solution Generation
- D. Solution Test

44. When evaluating the six-step decision making process, what occurs during the solution implementation step?

- A. The process will begin again if the decisions made were incorrect
- B. Definition of the problem as clearly and precisely as possible
- C. Details of every solution possible including ideas that seem far fetched
- D. The solution that best solves the problem is selected

45. When evaluating the six-step decision making process, what occurs during the problem identification step?

- A. The process will begin again if the decisions made were incorrect
- B. Definition of the problem as clearly and precisely as possible
- C. Details of every solution possible including ideas that seem far fetched
- D. The solution that best solves the problem is selected

46. When evaluating the six-step decision making process, what occurs during the solution selection step?

- A. The process will begin again if the decisions made were incorrect
- B. Definition of the problem as clearly and precisely as possible
- C. Details of every solution possible including ideas that seem far fetched
- D. The solution that best solves the problem is selected

47. When evaluating the six-step decision making process, what occurs during the solution test step?

- A. The process will begin again if the decisions made were incorrect
- B. Definition of the problem as clearly and precisely as possible
- C. Details of every solution possible including ideas that seem far fetched
- D. None of the above

48. Which of the below represents the structure of a typical organization?

- A. Flat line
- B. Pyramid
- C. Circle
- D. Cube

49. Which of the below represents the three different levels of a company pyramid from the top to the bottom?

- A. Managerial-Strategic-Operational
- B. Strategic-Managerial-Operational
- C. Operational-Managerial-Strategic
- D. Strategic-Operational-Managerial

50. Which of the below would you include as decisions and responsibilities typically found at the managerial level of a company?

- A. Monthly Plans
- B. Monthly Budgets
- C. Weekly Schedule
- D. All of the above

51. Which of the below would you include as decisions and responsibilities typically found at the operational level of a company?

- A. Develop core business activities required to run the day-to-day operations
- B. Control core business activities required to run the day-to-day operations
- C. Maintain core business activities required to run the day-to-day operations
- D. All of the above

52. Data collection, solution generation, and solution implementation are all concepts associated with _____.

- A. The six-step problem solving process
- B. The six-step decision making process
- C. The four-step problem solving process
- D. The four-step decision making process

53. Review the below key terms. Which one defines an operational decision that involves situations where established processes offer potential solutions?

- A. Optimization analysis decision
- B. Artificial intelligence decision
- C. Structured decision
- D. Unstructured decision

54. Review the below statements. Which one does not represent an example of a structured decision?

- A. Reordering inventory
- B. Deciding to enter a new market
- C. Creating the employee weekly staffing schedule
- D. Creating the employee weekly production schedule

55. Which of the below is not considered a part of decision making at the managerial level?

- A. Developing overall business goals and objectives
- B. Creating a short-term budget
- C. Allocating resources to a department
- D. Monitoring performance of a project team

56. Which of the below key terms represents the types of decisions made at the operational, managerial, and strategic levels of a company?

- A. Structured decisions
- B. Unstructured decisions
- C. Semistructured decisions
- D. All of the above

57. The level where managers develop overall business strategies and monitor the performance of the organization and the competitive business environment is the _____ level.

- A. Operational
- B. Strategic
- C. Managerial
- D. Communications

58. Jenny Welch works at a retail store selling sports equipment. Her daily tasks include opening the store, creating the work schedules, processing payroll, overseeing sales and inventory, and training employees. At what level of the organizational pyramid would you categorize Jenny?

- A. Managerial
- B. Operational
- C. Strategic
- D. Owner

59. Andy Benton works at the local Starbucks coffee shop and his responsibilities include taking orders, fulfilling orders, and ringing in sales. At what level of the organizational pyramid would you categorize Andy?

- A. Strategic
- B. Owner
- C. Operational
- D. Managerial

60. Bill Schultz works at a high power investment firm in Los Angeles. Bill is responsible for promoting the firm's vision and creating the company-wide goals and strategies. He also monitors the overall strategic performance of the company and its direction for future business strategies. At what level of the organizational pyramid would you categorize Bill?

- A. Strategic
- B. Owner
- C. Operational
- D. Managerial

61. Chuck Norris has been hired to oversee all of the plans that the city of Denver has created to expand its train transportation system by adding six more lines to the metro area. Chuck will be responsible for planning the project, managing the processes, and finalizing each new line as it is completed. How would you categorize the majority of the decisions Chuck will have to make to complete his job?

- A. Unstructured decisions
- B. Semistructured decisions
- C. Structured decisions
- D. Strategic decisions

62. CSF's and KPI's are two core metrics used to evaluate results and measure the progress of a project for a business. Which of the below represents the acronyms for CSF and KPI?

- A. Continual success factors and key performance indicators
- B. Critical success factors and key project ideas
- C. Customer success findings and key project ideas
- D. Critical success factors and key performance indicators

63. What are measurements that evaluate results to determine whether a project is meeting its goals?

- A. Models
- B. Metrics
- C. Benchmarks
- D. Genetic algorithms

64. What are the crucial steps companies perform to achieve their goals and objectives and implement their strategies?

- A. Critical success factors
- B. Crucial success factors
- C. Key performance indicators
- D. Key performance factors

65. Which of the below is an example of a critical success factor?

- A. Increase customer satisfaction
- B. Number of new customers
- C. Number of new products
- D. Percentage of employee turnover

66. Which of the below statements is accurate?

- A. Key performance indicators can have no more than four critical success factors
- B. Critical success factors can have no more than four key performance indicators
- C. Key performance indicators can have several critical success factors
- D. Critical success factors can have several key performance indicators

67. Key performance indicators are the metrics a company uses to evaluate progress toward critical success factors. Which of the below represents a key performance indicator?

- A. Create high-quality products
- B. Reduce product costs
- C. Percentage of help desk calls answered in the first minute
- D. Hire the best business professionals

68. CSF's and KPI's are the two core metrics used within a business to track progress or success. What is the relationship between CSFs and KPIs?

- A. CSF's are business strategy elements where KPI's measure the progress of the CSF's
- B. CSF's build the business environment where KPI's explain how to build the CSF's
- C. KPI's are used first where CSF's are applied after
- D. KPI's promote employees on their performance where CSF's demote employees based on their performance level

69. Market share measures a firm's external performance relative to that of its competitors. Which of the following represents how a firm measures market share?

- A. Multiplying the firm's sales by the industries total sales
- B. Dividing the firm's sales by the total market sales for the entire industry
- C. Subtracting your competitors sales from your total sales
- D. Subtracting the industries total sales from the firm's total sales

70. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to calculate her company's market share. When evaluating the prior year numbers, she found that her firm achieved total sales of \$3 million and the entire industry had \$30 million in sales. What is Anne-Marie's current market share?

- A. 1%
- B. 10%
- C. 18%
- D. 20%

71. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to ensure the company has 10 percent market share by the end of the year. When evaluating the current sales numbers she determines that her sales division has total sales of \$3 million and the entire industry has total sales of \$50 million. What additional sales must Anne-Marie's division meet to ensure they have 10 percent of the market by the end of the year?

- A. \$1 million
- B. \$2 million
- C. \$5 million
- D. \$10 million

72. What type of measurement is using market share as a KPI?

- A. Fuzzy logic measurement
- B. External measurement
- C. Neural network measurement
- D. Internal measurement

73. Which of the below represents an internal KPI that indicates the earning power of a project?

- A. Market share
- B. Return on intelligent
- C. Sensitivity analysis
- D. Return on investment

74. Todd Haitz is the marketing manager for the National Basketball Association. Todd analyzes and tracks his marketing campaigns to determine the best success rate per project for increasing ticket sales. Todd uses an internal KPI to track his marketing campaign success. Which of the below would be an internal KPI Todd would use to track his marketing campaigns?

- A. Marketing campaign ROI
- B. Marketing campaign percentage of fans purchasing Sports Illustrated magazine
- C. Marketing campaign advertiser revenue sales
- D. Marketing campaign market share

75. What could a manager use to measure the success of an MIS project?

- A. Effectiveness MIS metrics, efficiency MIS metrics
- B. Effectiveness MIS metrics, expert MIS metrics
- C. Expert MIS metrics, executive MIS metrics
- D. All of the above

76. What type of metrics measure throughput, transaction speed, and system availability?

- A. Efficiency MIS metrics
- B. Effectiveness MIS metrics
- C. ROI
- D. Benchmarks

77. What types of metrics measure customer satisfaction?

- A. Efficiency MIS metrics
- B. Effectiveness MIS metrics
- C. Both efficiency and effectiveness MIS metrics
- D. Both ROI and market share

78. According to Peter Drucker, what are managers who do things right addressing?

- A. Efficiency
- B. Effectiveness
- C. Both efficiency and effectiveness
- D. Customer satisfaction only

79. According to Peter Drucker, what are managers who do the right things addressing?

- A. Efficiency
- B. Effectiveness
- C. Both efficiency and effectiveness
- D. Customer satisfaction only

80. Which of the following is a type of effectiveness MIS metric?

- A. Transaction speed
- B. System availability
- C. Usability
- D. Throughput

81. Which of the following is a type of efficiency MIS metric?

- A. Customer satisfaction
- B. Conversion rates
- C. Financial transactions
- D. Web traffic

82. Which term is used to describe the ease with which people perform transactions and/or find information?

- A. Usability
- B. Customer satisfaction
- C. Financial
- D. Conversion rates

83. What is measured by such benchmarks as satisfaction surveys, percentage of existing customers retained, and increases in revenue dollars per customer?

- A. Usability
- B. Customer satisfaction
- C. Financial
- D. Conversion rates

84. What would a company like eBay or Amazon be constantly benchmarking?
- A. MIS efficiency
 - B. MIS effectiveness
 - C. MIS efficiency and MIS effectiveness
 - D. Usability metrics only
85. When considering the graph depicting the interrelationships between efficiency and effectiveness, where does an organization ideally want to operate?
- A. Upper right-hand corner
 - B. Lower right-hand corner
 - C. Upper left-hand corner
 - D. Lower left-hand corner
86. Which of the following would efficiency MIS metrics measure?
- A. Response time
 - B. System availability
 - C. Transaction speed
 - D. All of the above
87. Which of the following are the four common types of effectiveness MIS metrics?
- A. Unstructured decisions, customer satisfaction, conversion rates, financial
 - B. Usability, customer service, conversion rates, fiscal year revenue
 - C. Usability, customer satisfaction, conversion rates, financial
 - D. Usability, customer satisfaction, conversion rates, affordability

88. Drew Savage is an MIS manager for an international consulting firm. Drew travels to different European countries where he implements news response tracking systems. Some of the metrics he uses to track the performance of his system include tracking the response time it takes to respond to Twitter posts mentioning the news station, as well as the speed and accuracy of content posted on numerous websites and social media sites. What type of metrics is Drew using to measure his system?

- A. Customer satisfaction metrics
- B. Efficiency metrics
- C. Effectiveness metrics
- D. Benchmarking metrics

89. Efficiency MIS metrics focus on the extent to which a firm is using its resources in an optimal way, while effectiveness MIS metrics focus on _____.

- A. Understanding how successful a firm is at achieving its goals and objectives
- B. Analyzing if a firm is doing the right things
- C. Setting the right goals and ensuring they are accomplished
- D. All of the above

90. Which of the below describes the efficiency MIS metric of throughput?

- A. The number of hours a system is available for users
- B. The time it takes to respond to user interactions such as a mouse click
- C. The amount of information that can travel through a system at any point in time
- D. The ease with which people perform transactions and/or find information

91. Which of the following tracks the number of customers an organization touches for the first time and persuades to purchase its products or services?

- A. Customer satisfaction
- B. Usability
- C. Conversion rates
- D. Financial

92. What does usability effectiveness MIS metrics measure?
- A. The ease with which people perform transactions and find information
 - B. The number of customers an organization "touches" for the first time and persuades to purchase its products or services
 - C. The amount of time a system takes to perform a transaction
 - D. The number of hours a system is available for users
93. A common mistake that many managers tend to make is focusing on only one type of metrics because they are easier to measure. Which type of metrics do they focus on?
- A. Effectiveness MIS metrics
 - B. Efficiency MIS metrics
 - C. Endurance MIS metrics
 - D. Product sales metrics
94. When analyzing the interrelationships between efficiency and effectiveness, where would a company ideally want to operate?
- A. With high efficiency
 - B. The upper right-hand corner of the interrelationship graph
 - C. With high effectiveness
 - D. All of the above
95. What is the process of continuously measuring system results, comparing those results to optimal system performance, and identifying steps and procedures to improve system performance?
- A. Benchmarking
 - B. Bottlenecking
 - C. Consolidation
 - D. Cycle time

96. Which of the below is not included as part of a benchmark?
- A. Benchmarks help assess how an MIS project performs over time
 - B. When measured against MIS projects, benchmarks can provide feedback so managers can control the system
 - C. Benchmarks help to establish baseline values the system seeks to attain
 - D. Benchmarks perform all of the above
97. As a manager for your company some of your responsibilities include measuring metrics and overseeing company strategies. You observe some critical success factors and see large increases in productivity. What would you suspect would be the primary reason for the large increases in productivity?
- A. Decreases in effectiveness
 - B. Increases in effectiveness
 - C. Increases in executive roles
 - D. Decreases in efficiency
98. Which of the following represents the top-down (executives to analysts) organizational levels of information technology systems?
- A. TPS, DSS, EIS
 - B. DSS, TPS, EIS
 - C. EIS, DSS, TPS
 - D. None of the above, it varies from organization to organization
99. Which of the following is an incorrect enterprise view of information technology?
- A. Processes are analytical for executives and transactional for analysts
 - B. Granularity is coarse for executives and fine for analysts
 - C. Processing is OLTP for executives and OLAP for analysts
 - D. None of the above
100. What can a model accomplish?
- A. Calculate risks
 - B. Understand uncertainty
 - C. Manipulate time
 - D. All of the above

101. What is consolidation?

- A. Involves the aggregation of information and features simple roll-ups to complex groupings of interrelated information
- B. The ability to look at information from different perspectives
- C. Enables users to get details, and details of details, of information
- D. Finds the inputs necessary to achieve a goal such as a desired level of output

102. What is drill-down capability?

- A. Involves the aggregation of information and features simple roll-ups to complex groupings of interrelated information
- B. The ability to look at information from different perspectives
- C. Enables users to get details, and details of details, of information
- D. Finds the inputs necessary to achieve a goal such as a desired level of output

103. What is slice-and-dice capability?

- A. Involves the aggregation of information and features simple roll-ups to complex groupings of interrelated information
- B. The ability to look at information from different perspectives
- C. Enables users to get details, and details of details, of information
- D. Finds the inputs necessary to achieve a goal such as a desired level of output

104. What compiles information from multiple sources and tailors it to meet user needs?

- A. Drill-down
- B. Sensitivity analysis
- C. What-if analysis
- D. Digital dashboard

105. What are various commercial applications of artificial intelligence?

- A. Drill-down
- B. Sensitivity analysis
- C. Digital dashboard
- D. Intelligent system

106. What is a category of AI that attempts to emulate the way the human brain works?

- A. Intelligent system
- B. Artificial intelligence
- C. Expert systems
- D. Neural network

107. Which of the following is the most commonly used form of AI in the business arena?

- A. Intelligent system
- B. Artificial intelligence
- C. Expert system
- D. Neural network

108. What is a special-purpose knowledge-based information system that accomplishes specific tasks on behalf of its users?

- A. Intelligent system
- B. Artificial intelligence
- C. Neural network
- D. Intelligent agent

109. What do cargo transport systems, book distribution centers, the video game market, a flu epidemic, and an ant colony have in common?

- A. They are all expert systems and thus share some characteristics
- B. They are all genetic algorithm systems and thus share some characteristics
- C. They are all neural network systems and thus share some characteristics
- D. They are all complex adaptive systems and thus share some characteristics

110. Which industry has been relying on neural network technology for over two decades?

- A. Food service
- B. Hotels
- C. Finance
- D. Healthcare

111. Which type of AI system assigns values of 0 and 1 to vague or ambiguous information?

- A. Genetic algorithms
- B. Artificial intelligence
- C. Fuzzy logic
- D. Intelligent agents

112. What is a simplified representation or abstraction of reality?

- A. Model
- B. Metric
- C. Redundancy
- D. Sensitivity Analysis

113. What can a manager use a model to do?

- A. Calculate risk
- B. Change variables
- C. Understand uncertainty
- D. All of the above

114. What would managers use to make structured decisions at the operational level?

- A. Transactional information
- B. Analytical information
- C. An EIS system
- D. Intelligent system

115. Which of the below would create transactional information?

- A. Projecting future sales growth
- B. Making an airline reservation
- C. A semistructured decision to hire more employees
- D. Generating payroll reports

116. What are the three primary types of management information systems available to support decision making across the company levels?

- A. Transaction Processing Systems, Decision Support Systems, Executive Information Systems
- B. Analytical Information, Decision Support Systems, Executive Information Systems
- C. Transaction Processing Systems, Drill-Down Systems, Expert Systems
- D. What-If Analysis, Sensitivity Analysis, Goal-Seeking Analysis

117. A transaction processing system (TPS) is the basic business system that assists operational level analysts when making structured decisions. Which of the below is not an example of a TPS?

- A. Target's internal company payroll system
- B. Comfort Dental patient diagnosis system
- C. First Bank's overall accounting system
- D. Stewart Sport's order entry system

118. What is the flow that a systems thinking approach using a TPS would follow?

- A. Streamlining (Input)-CRUD, Calculate (Process)-Reports (Output)
- B. Source Documents (Input)-Optimization Analysis (Process)-(Feedback)-(Output)
- C. Source Documents (Input)-CRUD, Calculate (Process)-Reports (Output)-(Feedback)
- D. Selling Documents (Input)-Cycle Time (Process)-Reports (Output)-(Feedback)

119. Online transaction processing (OLTP) is the capturing of transaction and event information using technology to _____.

- A. Update existing information to reflect the new information
- B. Store the information
- C. Process the information according to defined business rules
- D. All of the above

120. Which of the below does not represent an example of analytical information?

- A. Trends and product statistics
- B. Unstructured long-term decisions
- C. Five year sales report
- D. Future growth projections

121. Decision support systems or DSS's model information using OLAP, which provides assistance in evaluating and choosing among different courses of action. Which of the below does not represent an example of a DSS in business?

- A. An insurance company using a system to gauge risk of providing insurance to drivers who have imperfect driving records.
- B. A medical doctor may enter symptoms into a system to aid them in diagnosing and treating patients.
- C. A manufacturing digital dashboard showing visualizations of inventory and production.
- D. A dentist entering symptoms into a system to help diagnose and treat patients.

122. What is the MIS system that manipulates information to create business intelligence in support of strategic decision making?

- A. Online transaction processing (OLTP)
- B. Online analytical processing (OLAP)
- C. Digital dashboard
- D. Visualization

123. When viewing systems thinking, source documents are the original transaction records. What would the source documents for a medical doctor's payroll system include?

- A. Employee time sheets
- B. Employee benefit reports
- C. Employee wage rates
- D. All of the above

124. Which of the below represent the four main DSS analysis techniques outlined in the chapter?

- A. What-If Analysis, Sensitivity Analysis, Goal-Seeking Analysis, Optimization Analysis
- B. Workflow Analysis, Sensitivity Analysis, Growth Analysis, Organizational Analysis
- C. What-If Analysis, Structured Analysis, Goal-Seeking Analysis, Optimization Analysis
- D. What-If Analysis, Sensitivity Analysis, Growth Analysis, Organizational Analysis

125. Tom Watson is a manager for a McDonald's restaurant. Many of his key responsibilities include analyzing data and making key decisions for the success of his store. Tom's store has been experiencing decreased sales for breakfast services over the past 3 months. Tom is unsure why breakfast revenues are down while lunch and dinner revenues remain unchanged. Tom believes that he can drive revenue up by implementing a few different breakfast promotions such as free coffee or hash browns with the purchase of a meal. Tom performs an extensive analysis of how continuous changes in breakfast promotions could impact his daily revenue. What type of DSS analysis is Tom performing?

- A. Optimization analysis
- B. Sensitivity analysis
- C. Transaction analysis
- D. Goal-seeking analysis

126. What is the DSS analysis that checks the impact of a change in a variable or assumption on the model?

- A. Optimization analysis
- B. Goal-seeking analysis
- C. Sensitivity analysis
- D. What-if analysis

127. Online transaction processing (OLTP) and online analytical processing (OLAP) are similar MIS strategies used to help with business decision making. What is the primary difference between OLTP and OLAP?

- A. OLTP is used at the operational level; OLAP is used at the managerial level
- B. OLTP is used to capture transactional and event data; OLAP is used to manipulate information
- C. OLTP is used to support structured decisions; OLAP is used to support semistructured decisions
- D. All of the above

128. An optimization analysis finds the optimum value for a target variable by repeatedly changing other variables, subject to specified constraints. What can a manager determine by changing revenue and cost variables in an optimization analysis?

- A. Calculate the highest potential profits
- B. Calculate employee benefit payments
- C. Use this as an extension for a digital dashboard
- D. Create production schedules

129. What is the analysis that works in reverse to what-if and sensitivity analysis by finding the inputs necessary to achieve a goal such as a desired level of output?

- A. Solutions based analysis
- B. Optimization system
- C. Goal-seeking analysis
- D. Revenue analysis

130. Decision making at the executive or strategic level require business intelligence and knowledge to support the uncertainty and complexity of the business. What is a specialized DSS that supports senior-level executives and unstructured decisions requiring judgment, evaluation, and insight?

- A. OLTP
- B. Executive Information System (EIS)
- C. Transaction Support System (TSS)
- D. Decision Support System (DSS)

131. Executives of a company deal less with details of the operational activities and deal more with the higher meaningful aggregations of information or "coarser" information. What refers to the level of detail in the model?

- A. Drill-down
- B. Visualization
- C. Granularity
- D. Consolidation

132. How does a DSS typically differ from an EIS?

- A. EIS requires data from external sources to support unstructured decisions where a DSS typically uses internal sources to support semistructured decisions
- B. DSS typically uses external sources and EIS use internal sources to support decisions
- C. A DSS never uses external sources
- D. EIS always uses internal sources to support structured decisions

133. What is a graphical display of patterns and complex relationships in large amounts of data?

- A. Visualization
- B. Model
- C. Table
- D. Digital spreadsheet

134. What is a common tool that is used to support visualizations and tracks KPIs and CSFs by compiling information from multiple sources?

- A. Models
- B. Digital dashboards
- C. Neural networks
- D. Verified graphs

135. Which of the below is offered by a digital dashboard?

- A. Consolidation
- B. Drill-down
- C. Slice-and-Dice
- D. All of the above

136. Which of the below would not be found in a digital dashboard for a manufacturing team?

- A. A graph of stock market prices
- B. A running line graph of planned versus actual production for the past 24 hours
- C. An excel spreadsheet with cost analysis data
- D. A hot list of key performance indicators, refreshed every 15 minutes

137. As the product manager for the eatery division at Whole Foods, Jerry is responsible for analyzing sales data to help him manage his team. Today Jerry is analyzing his data using many different perspectives to identify different ways to improve his division. Which of the following common digital dashboard capabilities is Jerry using to analyze his department's success?

- A. Slice-and-Dice
- B. Competitive tables
- C. Drill-down
- D. Consolidation

138. As the product manager for the eatery division at Whole Foods, Jerry is responsible for analyzing sales data to help him manage his team. Today Jerry is analyzing his data using aggregation techniques allowing him to see simple roll-ups to complex groupings of interrelated information. Which of the following common digital dashboard capabilities is Jerry using to analyze his department's success?

- A. Slice-and-Dice
- B. Competitive tables
- C. Drill-down
- D. Consolidation

139. As the product manager for the eatery division at Whole Foods, Jerry is responsible for analyzing sales data to help him manage his team. Today Jerry is analyzing his data by looking at details, and details of details of information. Which of the following common digital dashboard capabilities is Jerry using to analyze his departments success?

- A. Slice-and-Dice
- B. Competitive tables
- C. Drill-down
- D. Consolidation

140. Van Lines Inc. is a large corporation operating in all 50 states. Jim Poulous is the regional manager overseeing the western division, which includes Utah, Colorado, Idaho, Montana, Wyoming, and Nevada. Jim receives data from his managers in each state which he loads into his digital dashboard for analysis of his entire western division. What digital dashboard capability is Jim primarily using?

- A. Drill-down
- B. Slice-and-dice
- C. Intelligent system
- D. Consolidation

141. Artificial Intelligence stimulates human thinking and behavior, such as the ability to reason and learn. What is the ultimate goal of AI?

- A. To build an intelligent system
- B. To build an intelligent agent
- C. To build a system that can mimic human intelligence
- D. To build a system that can mimic an expert agent

142. Which of the following is an example of an intelligent system?

- A. The Firefighter Robot that can extinguish flames at chemical plants
- B. Shell Oil's Smart Pump robot that pumps gas for the customer
- C. A robot that cleans and sweeps at a local airport
- D. All of the above

143. Which of the below does not represent a category of AI?

- A. Genetic algorithms
- B. Neural networks
- C. Expert systems
- D. Consolidation

144. What is a system that uses computerized advisory programs to imitate the reasoning processes of experts in solving difficult problems?

- A. Expert system
- B. Virtual reality
- C. Neural network
- D. Genetic algorithm

145. Which of the below categories of AI is used extensively in the finance industry to analyze situations where the logic or rules are unknown?

- A. Expert system
- B. Virtual reality
- C. Neural network
- D. Genetic algorithm

146. Which of the following is not a feature of a neural network?

- A. Neural networks can cope with huge volumes of information with many variables
- B. Neural networks can function without complete or well-structured information
- C. Neural networks can analyze linear relationships only
- D. Neural networks can learn and adjust to new circumstances on their own

147. What is the mathematical method of handling imprecise or subjective information?

- A. Fuzzy logic
- B. Virtual reality
- C. Expert system
- D. Genetic algorithm

148. Sears department stores used to plant employees in competitor stores to perform research and analysis. Recently the company implemented a system that can search competitor websites and provide comparisons of price, promotions, and availability and the system is saving time, money, and resources. What type of system did Sears implement?

- A. Shopping algorithm
- B. Shopping network
- C. Shopping logic
- D. Shopping bot

149. What is the process of learning from ecosystems and adapting their characteristics to human and organization situations?

- A. Data collection
- B. Artificial intelligence
- C. Biomimicry
- D. Intelligent system

150. Which of the following is a special-purpose knowledge based information system that accomplishes specific tasks on behalf of its users?

- A. Intelligent agent
- B. Executive agent
- C. Expert agent
- D. Modeling system

151. Which of the below offers a disadvantage for working virtually?

- A. Increases in worker productivity
- B. Increases in feelings of seclusion
- C. Decreases in expenses for the company
- D. Alleviation of congested roadways

152. What is an optimizing system that can find and evaluate solutions with many more possibilities, faster and more thoroughly than a human?

- A. Genetic algorithm
- B. Expert system
- C. Intelligent agent
- D. Virtual reality

153. Bob Silver loves playing a game called World of Warcraft where he has the capability to create his own character and even his own life-like environment. Which AI system would you categorize World of Warcraft?

- A. Multi-agent system
- B. Expert system
- C. Virtual reality
- D. Fuzzy logic system

154. Which of the following offers an example of an intelligent agent that uses a multi-agent system?

- A. A cargo transport system
- B. Book distribution center
- C. A flu epidemic
- D. All of the above

155. What types of business decisions would an EIS use AI for?

- A. Semistructured decisions
- B. Multistructured decisions
- C. Structured decisions
- D. Unstructured decisions

156. Which of the below business ideas is not using AI?

- A. Best Buy implements a software system that will determine how many customers are needed to increase gross profits to \$5 million
- B. McDonald's unveiling a robot that cleans and tidies the restaurant, while also asking guests if it can take their trays to the trash
- C. Starbucks creates a system that works like a hand and lifts and moves the mixing pots for the coffees to and from the coffee machines to the counters
- D. Golf courses create an automated golf cart that can offer swing suggestions, club suggestions, and even navigate the course for the driver

157. Which of the below business processes would you find in the marketing and sales division?

- A. Ordering inventory
- B. Enrolling employees in health care benefits
- C. Promoting of discounts
- D. Creating financial statements

158. Which of the following departments is primarily responsible for promoting discounts, attracting customers, and communicating marketing campaigns?

- A. Accounting and Finance
- B. Marketing and Sales
- C. Operations Management
- D. Human Resources

159. Which of the following represents a business process you would find in the operations management department?

- A. Ordering inventory
- B. Processing sales
- C. Promoting discounts
- D. Paying of accounts payable

160. Most business processes are cross-functional or cross-departmental processes that span the entire organization. Which of the below does not represent a cross-functional business process?

- A. Order-to-delivery process
- B. Loan processing
- C. Taking a product from concept to market
- D. Processing payroll

161. The accounting and finance department performs processes such as creating financial statements, paying accounts payables, and collecting accounts receivables. What form of processes do these represent?

- A. Customer-facing processes
- B. Business-facing processes
- C. Industry-specific customer facing processes
- D. All of the above

162. What form of processes include loan processing for a bank, claims processing for an insurance company, reservation processing for a hotel, and baggage handling for an airline?

- A. Customer-facing processes
- B. Business-facing processes
- C. Industry-specific customer-facing processes
- D. All of the above

163. What type of process includes order processing, customer service processing, sales processing, customer billing processing, and order shipping processing?

- A. Customer-facing processes
- B. Business-facing processes
- C. Industry-specific customer facing processes
- D. All of the above

164. Which of the below represents business processes you would find in the human resources department?

- A. Hiring employees
- B. Enrolling employees in benefit plans
- C. Tracking vacation and sick time
- D. All of the above

165. What is the difference between customer-facing processes and business-facing processes?

- A. Business-facing processes are front-office processes, customer-facing processes are back-office processes
- B. Customer-facing processes are front-office processes, business-facing processes are back-office processes
- C. Customer-facing processes are back-office processes, and industry-specific customer-facing processes are back-office processes
- D. Customer-facing processes are back-office processes, and industry-specific customer-facing processes are front-office processes

166. Which of the below is a customer-facing process?

- A. Communicating with customers
- B. Strategic goal setting
- C. Providing performance feedback and rewards
- D. Purchasing raw materials

167. Which of the following represents a business-facing process?

- A. Loan processing
- B. Order processing
- C. Strategic planning
- D. Customer billing

168. When considering the 5-steps of the order-to-delivery business process, creating campaigns and checking inventory are included in which of the following?

- A. Step 4-Sales
- B. Step 1-Marketing
- C. Step 3-Operations management
- D. Step 2-Customer service

169. Which of the following processes focuses on the entire customer order process and operates across functional departments?

- A. Order to delivery process
- B. Customer billing process
- C. Customer loan process
- D. All of the above

170. Which of the below processes would be found in the operations management department?

- A. Creating production schedules
- B. Communicating marketing campaigns
- C. Hiring employees
- D. Processing sales

171. Which of the following should a business follow for success?

- A. Technology choices should drive business processes
- B. Business processes should drive technology choices
- C. Technology choices should drive business strategies and goals
- D. All of the above depending on the industry

172. Business process modeling or mapping, is the activity of creating a detailed flowchart or process map of a work process that shows its inputs, tasks, and activities in a _____ sequence.

- A. Unstructured
- B. Semistructured
- C. Structured
- D. Unilateral

173. Jessica Ulta works as an employee for City Service Credit Union and is responsible for consulting on loans, talking clients through the loan process, and providing loans to members. What type of processes does Jessica primarily work with?

- A. Business-facing processes
- B. Industry-specific customer facing processes
- C. Customer-facing process
- D. Industry-specific business-facing processes

174. Sarah Schin was recently hired by Bank West as the Global Director of Human Resources. Her job duties include determining employment policies as well as overseeing all hiring, firing, and training of employees. What type of processes does Sarah's new job demonstrate?

- A. Business-facing processes
- B. Industry-specific customer facing processes
- C. Customer-facing process
- D. Industry-specific business-facing processes

175. What is a model that represents the current state of the operation without any specific improvements or changes to existing processes?

- A. As-Is process models
- B. To-Be process models
- C. Competitive business process models
- D. Workflow model

176. What is the business process model that ensures the process is fully and clearly understood before the details of a process solution are decided upon?

- A. As-is process model
- B. Business process reengineering model
- C. Customer facing process
- D. To-Be process model

177. What is the difference between the As-Is process model and the To-Be process model?

- A. The As-Is process model begins with what the process problem is, and the To-Be process model displays how the problem will be solved
- B. The process models are not related
- C. Both process models determine when to solve the problem
- D. The As-Is process model begins with where to implement the solution, and the To-Be process model displays why the problem needs to be fixed

178. What is the primary goal of the As-Is process model?

- A. To outline the process elements for the To-Be process
- B. To create process choices for the As-Is process
- C. To simplify, eliminate, and improve the To-Be process
- D. To analyze the To-Be process elements

179. The local florist in town is Cheryl Steffan who has been in business for over 20 years. Recently, Cheryl has noticed several complaints about delivery errors. Cheryl decides to investigate the errors in her business delivery process and finds that most of the inaccuracies occur during order taking. Cheryl decides to implement an electronic ordering system to help improve order efficiency and effectiveness. What method did Cheryl follow to solve her delivery issues?

- A. Modeled the As-Is process, fixed the errors, and then created the To-Be process
- B. Modeled the To-Be process, fixed the errors, and then created the As-Is process
- C. Moved directly to implementing the To-Be process without analyzing the As-Is process
- D. Moved directly to implementing the As-Is process without analyzing the To-Be process

180. What is the primary goal of using As-Is and To-Be process models?

- A. To determine employee specific errors
- B. To determine measurement metrics
- C. To determine the best way to solve a problem
- D. To determine what the problem is and then how to solve the problem

181. Review the below list of key terms and determine which one typically occurs during operational business process improvement.

- A. Automation
- B. Streamlining
- C. Reengineering
- D. Improvement

182. Review the below list of key terms and determine which one typically occurs during managerial business process improvement.

- A. Automation
- B. Streamlining
- C. Reengineering
- D. Improvement

183. Review the below list of key terms and determine which one typically occurs during strategic business process improvement.

- A. Automation
- B. Streamlining
- C. Reengineering
- D. Improvement

184. Which of the below examples indicates when the time is right to initiate a business process change?

- A. The market being served makes a distinctive shift
- B. The company is below industry benchmarks on its core processes
- C. The company strategically passes or leapfrogs the competition on key decisions to regain competitive advantage
- D. All of the above

185. What does BPR assume about the current process in the extreme?

- A. Current process is irrelevant
- B. Current process is broken
- C. Current process must be overhauled from scratch
- D. All of the above

186. Which of the below processes attempts to understand and measure the current process and make improvements?

- A. Business process mapping
- B. Business process reengineering
- C. Business process improvement
- D. Business process model

187. Transaction processing systems are primarily used to automate business processes. Automation increases efficiency and effectiveness, while reducing head count which in turn reduces the overall operational _____.

- A. Costs
- B. Systems
- C. Revenues
- D. Intelligence

188. Several factors can accelerate the need for a company to make business improvement processes. What is the most prevalent factor?

- A. Market shifts
- B. Technology
- C. Discoveries
- D. Bottlenecking

189. What improves managerial level business processes?

- A. Performance measures
- B. Bottlenecks
- C. Redundancy
- D. Streamlining

190. What is the point when resources reach full capacity and cannot handle any additional demands?

- A. Optimization analysis
- B. Bottlenecks
- C. Redundancy
- D. Swim lane

191. Which of the following represents an example of a technology that actually disrupts and slows workflow?

- A. Email
- B. Twitter
- C. Facebook
- D. All of the above

192. Automating a business process that contains _____ or _____ will magnify or amplify these problems if they are not corrected first.

- A. Bottlenecks or regulations
- B. Redundancies or regulations
- C. Bottlenecks or redundancies
- D. Redundancies or swim lanes

193. FedEx is a great example of a company that created a competitive advantage through combining _____.

- A. MIS and traditional distribution and logistics processes
- B. Logistic processes and an As-Is process model
- C. Artificial intelligence and distribution processes
- D. Swim lanes and logistic processes

194. What is the analysis and redesign of workflow within and between enterprises?

- A. Critical success factors (CSFs)
- B. Benchmarking metrics
- C. Business process reengineering (BPR)
- D. Decision support interfaces (DSI)

195. Changing business processes with MIS outlines how to improve the three levels of business processes which include operational, managerial, and strategic. From operational to strategic, what are the three major improvement strategies that the author describes?

- A. Automation-streamlining-reengineering
- B. Artificial intelligence-streamlining-reengineering
- C. Automation-workflow-reinvention
- D. Automation-consolidating-restructuring

196. Which of the below represents the four main steps in the business process reengineering?

- A. Set project problem, study competition, create new products, and implement solution
- B. Set project scope, study competition, create new products, and implement solution
- C. Set project scope, study competition, create new processes, and implement solution
- D. Study competition, set project scope, create new processes, and implement solutions

197. Which of the following explains why a company would implement a BPR strategy?

- A. To encourage competition
- B. To decrease customers
- C. To create value for the customer
- D. All of the above

198. What is the system that focuses on evaluating and improving the processes that include both person-to-person workflow and system-to-system communications?

- A. Business process management (BPM) systems
- B. Semistructured systems
- C. Virtual reality
- D. All of the above

Fill in the Blank Questions

199. _____ decisions are considered operational, and involve situations where established processes offer potential solutions.

200. The typical structure of a business organization is similar to a pyramid and consists, from top to bottom, of strategic, managerial, and _____ levels.

201. At the _____ level, of a business structure, employees are continuously evaluating company operations to hone the firm's abilities to identify, adapt to, and leverage change.

202. The _____ level, of a business structure, is where employees develop, control, and maintain core business activities required to run the day-to-day activities.

203. The President and Vice-President of a company are typically found in the _____ level of the business structure.

204. Situations in which a few established processes help to evaluate potential solutions, but not enough to lead to a definite recommended decision are considered _____ decisions.

205. A _____ is a temporary activity a company undertakes to create a unique product, service, or result.

206. The crucial steps companies perform to achieve their goals and objectives and implement their strategies are called _____ success factors.

207. _____ MIS metrics measure the impact MIS has on business processes and activities including customer satisfaction and customer conversion rates.

208. _____ MIS metrics measure the performance of the IT system itself including throughput, speed, availability, etc.

209. _____ focuses on how well an organization is achieving its goals and objectives.

210. _____ focuses on the extent to which an organization is using its resources in an optimal way.

211. _____ are baseline values the system seeks to attain.

212. _____ is a process of continuously measuring system results, comparing those results to optimal system performance, and identifying steps and procedures to improve system performance.

213. _____ is the amount of information that can travel through a system at any point in time.

214. System _____ is the number of hours a system is available for use by customers and employees.

215. _____ seeking analysis finds the inputs necessary to achieve a goal such as a desired level of output.

216. The basic business system that serves the operational level (analysts) and assists in making structured decisions is called _____ processing system.

217. Using systems thinking, we can see that the inputs for a transaction processing system are _____ documents, the original transaction record.

218. _____ support systems model information using OLAP which provides assistance in evaluating and choosing among different courses of action.

219. Executive information systems are starting to take advantage of _____ intelligence to support strategic decision making, by stimulating human thinking and behavior.

220. A shopping _____ is software that will search several retailer websites and provide a comparison of each retailer's offerings including price and availability.

221. Citibank uses _____ networks to find opportunities in financial markets by carefully examining historical stock market data.

222. At Microsoft's headquarters in Washington they have implemented a _____ workforce to help alleviate congestion, save on real estate, and potentially increase worker production.

223. The _____ facing processes are also called front-office processes that result in a product or service received by an external customer.

224. A _____ lane layout arranges the steps of a business process into a set of rows depicting the various elements.

225. Business process modeling or _____ is the activity of creating a detailed flowchart or process of a work process that shows its inputs, tasks, and activities in a structured sequence.

226. A _____ occurs when resources reach full capacity and cannot handle any additional demands.

227. The primary types of business process change from the operational level to the strategic level are _____, streamlining, and reengineering.

228. Business process reengineering is the analysis and _____ of workflow within and between enterprises.

229. A(n) _____ is a simplified representation or abstraction of reality.

230. A decision support system models _____ to support managers and business professionals during the decision-making process.

231. _____ analysis occurs when users change the value of one variable repeatedly and observe the resulting changes in other variables.

232. What-if analysis checks the impact of a _____ in an assumption on the proposed solution.

233. _____ logic is a mathematical method of handling imprecise or subjective information.

234. _____ systems are various commercial applications of artificial intelligence.

235. Artificial intelligence simulates _____ intelligence such as the ability to reason and learn.

236. _____ systems are computerized advisory programs that imitate the reasoning processes of experts in solving difficult problems.

237. A(n) _____ agent is a special-purpose knowledge-based information system that accomplishes specific tasks on behalf of its users.

238. Customer facing processes result in a product or service that is received by an organization's _____ customer.

Essay Questions

239. Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

240. Define critical success factors (CSFs) and key performance indicators (KPIs), and explain how managers use them to measure the success of MIS projects.

241. Classify the different operational support systems, managerial support systems, and strategic support systems, and explain how managers can use these systems to make decisions and gain competitive advantages.

242. Describe artificial intelligence, and identify its five main types.

243. Explain the value of business processes for a company, and differentiate between customer-facing and business-facing process.

244. Demonstrate the value of business process modeling, and compare As-Is and To-Be models.

245. Differentiate among business process improvements, streamlining, and reengineering.

246. Describe business process management and its value to an organization.

Chapter 02 Decisions and Processes: Value Driven Business **Answer Key**

True / False Questions

1. Spotlight Analysis used technology to filter through millions of American's demographics and other patterns to micro-target votes for John McCain's 2008 political campaign.

FALSE

The work Spotlight Analysis did was for Barack Obama's 2008 political campaign, utilized technology to filter through millions of American's demographics and other living patterns to micro-target them on their specific likes to help win their vote.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Opening Case Study

2. Behavioral grouping can be accomplished quickly and with great detail as demonstrated by Spotlight Analysis when they found the swing voters they coined as the barn raisers.

TRUE

Behavioral grouping can now be accomplished quickly and with great detail as was done by Spotlight Analysis when they researched the swing voter group they coined as the barn raisers.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Opening Case Study

3. One of the most important and challenging question confronting managers today is how to lay the foundation for tomorrow's success while competing to win in today's business environment.

TRUE

The most important and most challenging question confronting managers today is how to lay the foundation for tomorrow's success while competing to win in today's business environment.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Making Business Decisions

4. The structure of a typical organization is similar to a pyramid, with different levels that require one consistent type of information to assist with all managerial decision making.

FALSE

The structure of a typical organization is similar to a pyramid, with different levels that require different types of information to assist decision making, problem solving, and opportunity capturing.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Making Business Decisions

5. Operational decisions or semistructured decisions arise in situations where established processes offer potential solutions.

FALSE

Operational decisions are considered structured decisions not semistructured decisions, which arise in situations where established processes offer potential solutions.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Making Business Decisions

6. Unstructured decisions occur in situations in which no procedures or rules exist to guide decision makers towards the correct choice.

TRUE

Unstructured decisions occur in situations in which no procedures or rules exist to guide decision makers toward the correct choice.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Making Business Decisions

7. At the strategic decision-making level employees develop, control, and maintain core business activities.

FALSE

At the operational decision-making level employees develop, control, and maintain core business activities required to run the day-to-day operations.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Making Business Decisions

8. The construction of a new city subway station and the processing of monthly payroll are both considered types of projects as defined in your text.

FALSE

A project is considered a temporary activity a company undertakes to create a unique product, service, or result. The subway station construction is a project, however payroll processing is not a project and does not create a unique product, service, or result.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Medium

Topic Area: Metrics Measuring Business Success

9. Key performance indicators can focus on external and internal measurements.

TRUE

Key performance indicators (KPI's) can focus on external and internal measurements.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

10. The proportion of the market that a firm captures is called market share.

TRUE

The proportion of the market that a firm captures is called market share.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

11. Benchmarks are baseline values the system seeks to attain.

TRUE

Benchmarks are baseline values the system seeks to attain.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

12. Effectiveness MIS metrics include throughput, transaction speed, and system availability.

FALSE

Efficiency MIS metrics include throughput, speed, and availability.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

13. Measuring the amount of website traffic is the best way to determine a websites success.

FALSE

A large amount of website traffic does not indicate large revenues or website success.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

14. MIS support systems rely on models for computational and analytical routines that mathematically express relationships among variables.

TRUE

MIS support systems rely on models for computational and analytical routines that mathematically express relationships among variables.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

15. Streamlining information encompasses all of the information contained within a single business process or unit of work, and its primary purpose is to support the performing of daily operational or structured decisions.

FALSE

Transactional information encompasses all of the information contained within a single business process or unit of work, and its primary purpose is to support the performing of daily operational or structured decisions.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

16. Sensitivity analysis, what-if analysis, optimization analysis, and market basket analysis are the common DSS analysis techniques.

FALSE

Sensitivity analysis, what-if analysis, optimization analysis, and goal-seeking analysis are the common DSS analysis techniques.

AACSB: Reflective Thinking

43. Which of the following is not included in the decision-making process?

- A. Data Collection
- B. Solution Benchmarking**
- C. Solution Generation
- D. Solution Test

The six-step decision making process is 1) problem identification, 2) data collection, 3) solution generation, 4) solution test, 5) solution selection, and 6) solution implementation.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Easy

Topic Area: Making Business Decisions

44. When evaluating the six-step decision making process, what occurs during the solution implementation step?

- A. The process will begin again if the decisions made were incorrect**
- B. Definition of the problem as clearly and precisely as possible
- C. Details of every solution possible including ideas that seem far fetched
- D. The solution that best solves the problem is selected

The six-step decision making process is 1) problem identification, 2) data collection, 3) solution generation, 4) solution test, 5) solution selection, and 6) solution implementation. The final step is where the solution solves the problem or if wrong decisions were made then the process begins again.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

45. When evaluating the six-step decision making process, what occurs during the problem identification step?

- A. The process will begin again if the decisions made were incorrect
- B. Definition of the problem as clearly and precisely as possible**
- C. Details of every solution possible including ideas that seem far fetched
- D. The solution that best solves the problem is selected

The six-step decision making process is 1) problem identification, 2) data collection, 3) solution generation, 4) solution test, 5) solution selection, and 6) solution implementation. During the problem identification step you must define the problem as clearly and precisely as possible.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-01 Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Level: Medium

Topic Area: Making Business Decisions

46. When evaluating the six-step decision making process, what occurs during the solution selection step?

- A. The process will begin again if the decisions made were incorrect
- B. Definition of the problem as clearly and precisely as possible
- C. Details of every solution possible including ideas that seem far fetched**
- D. The solution that best solves the problem is selected

The six-step decision making process is 1) problem identification, 2) data collection, 3) solution generation, 4) solution test, 5) solution selection, and 6) solution implementation. During the solution selection step you select the solution that best solves the problem and meets the needs of the business.

AACSB: Reflective Thinking

66. Which of the below statements is accurate?

- A. Key performance indicators can have no more than four critical success factors
- B. Critical success factors can have no more than four key performance indicators
- C. Key performance indicators can have several critical success factors
- D.** Critical success factors can have several key performance indicators

One CSF can have several KPIs.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

67. Key performance indicators are the metrics a company uses to evaluate progress toward critical success factors. Which of the below represents a key performance indicator?

- A. Create high-quality products
- B. Reduce product costs
- C. Percentage of help desk calls answered in the first minute**
- D. Hire the best business professionals

Examples of KPI's are 1) turnover rates of employees, 2) percentage of help desk calls answered in the first minute, 3) number of product returns, 4) number of new customers, and 5) average customer spending.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

68. CSF's and KPI's are the two core metrics used within a business to track progress or success. What is the relationship between CSFs and KPIs?

- A. CSF's are business strategy elements where KPI's measure the progress of the CSF's**
- B. CSF's build the business environment where KPI's explain how to build the CSF's
- C. KPI's are used first where CSF's are applied after
- D. KPI's promote employees on their performance where CSF's demote employees based on their performance level

The relationship between CSF's and KPI's is critical for a business. Critical success factors (CSF's) are elements crucial for a business strategy's success, where key performance indicators (KPI's) measure the progress of the CSF's.

AACSB: Reflective Thinking

AACSB: Technology

Level: Medium

Topic Area: Metrics Measuring Business Success

69. Market share measures a firm's external performance relative to that of its competitors. Which of the following represents how a firm measures market share?

- A. Multiplying the firm's sales by the industries total sales
- B. Dividing the firm's sales by the total market sales for the entire industry**
- C. Subtracting your competitors sales from your total sales
- D. Subtracting the industries total sales from the firm's total sales

To calculate market share you divide the firm's sales by the total market sales for the entire industry.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Medium

Topic Area: Metrics Measuring Business Success

70. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to calculate her company's market share. When evaluating the prior year numbers, she found that her firm achieved total sales of \$3 million and the entire industry had \$30 million in sales. What is Anne-Marie's current market share?

- A. 1%
- B. 10%**
- C. 18%
- D. 20%

Market share is the proportion of the market that a firm captures. It is calculated by dividing the firm's sales by the total market sales for the entire industry. 3 million divided by 30 million is 10 percent.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Medium

Topic Area: Metrics Measuring Business Success

71. Anne-Marie Cole runs the sales division for a local auto insurance firm. One of her key duties is to ensure the company has 10 percent market share by the end of the year. When evaluating the current sales numbers she determines that her sales division has total sales of \$3 million and the entire industry has total sales of \$50 million. What additional sales must Anne-Marie's division meet to ensure they have 10 percent of the market by the end of the year?

- A. \$1 million
- B. \$2 million**
- C. \$5 million
- D. \$10 million

Market share is the proportion of the market that a firm captures. It is calculated by dividing the firm's sales by the total market sales for the entire industry. 10 percent of \$50 million is \$5 million. Since Anne-Marie already has \$3 million she needs an additional \$2 million in sales.

88. Drew Savage is an MIS manager for an international consulting firm. Drew travels to different European countries where he implements news response tracking systems. Some of the metrics he uses to track the performance of his system include tracking the response time it takes to respond to Twitter posts mentioning the news station, as well as the speed and accuracy of content posted on numerous websites and social media sites. What type of metrics is Drew using to measure his system?

- A. Customer satisfaction metrics
- B. Efficiency metrics**
- C. Effectiveness metrics
- D. Benchmarking metrics

Efficiency metrics include 1) throughput, 2) transaction speed, 3) system availability, 4) information accuracy, and 5) response time.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Hard

Topic Area: Metrics Measuring Business Success

89. Efficiency MIS metrics focus on the extent to which a firm is using its resources in an optimal way, while effectiveness MIS metrics focus on _____.

- A. Understanding how successful a firm is at achieving its goals and objectives
- B. Analyzing if a firm is doing the right things
- C. Setting the right goals and ensuring they are accomplished
- D.** All of the above

Efficiency MIS metrics focus on the extent to which a firm is using its resources in an optimal way, doing things right, and getting the most from each resource. Effectiveness MIS metrics focus on how well a firm is achieving its goals and objectives, doing the right things, setting the right goals and objectives and ensuring they are accomplished.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Medium

91. Which of the following tracks the number of customers an organization touches for the first time and persuades to purchase its products or services?

- A. Customer satisfaction
- B. Usability
- C. Conversion rates**
- D. Financial

The effectiveness metrics that tracks the number of customers an organization touches for the first time and persuades to purchase its products or services is conversion rates.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

92. What does usability effectiveness MIS metrics measure?

- A. The ease with which people perform transactions and find information**
- B. The number of customers an organization "touches" for the first time and persuades to purchase its products or services
- C. The amount of time a system takes to perform a transaction
- D. The number of hours a system is available for users

The usability effectiveness metrics measures the ease with which people perform transactions and find information.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

93. A common mistake that many managers tend to make is focusing on only one type of metrics because they are easier to measure. Which type of metrics do they focus on?

- A. Effectiveness MIS metrics
- B. Efficiency MIS metrics**
- C. Endurance MIS metrics
- D. Product sales metrics

A common mistake that many managers tend to make is focusing on efficiency MIS metrics because they are easier to measure.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Medium

95. What is the process of continuously measuring system results, comparing those results to optimal system performance, and identifying steps and procedures to improve system performance?

- A. Benchmarking**
- B. Bottlenecking
- C. Consolidation
- D. Cycle time

The process of continuously measuring system results, comparing those results to optimal system performance, and identifying steps and procedures to improve system performance is benchmarking.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Level: Easy

Topic Area: Metrics Measuring Business Success

96. Which of the below is not included as part of a benchmark?

- A. Benchmarks help assess how an MIS project performs over time
- B. When measured against MIS projects, benchmarks can provide feedback so managers can control the system
- C. Benchmarks help to establish baseline values the system seeks to attain
- D. Benchmarks perform all of the above**

The role of benchmarks within a company include 1) to help assess how an MIS project performs over time, 2) when measured against MIS projects, can provide feedback so managers can control the system, and 3) to establish baseline values the system seeks to attain.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-02 Define critical success factors (CSFs) and key performance indicators (KPIs); and explain how managers use them to measure the success of MIS projects.

Topic Area: Support Enhancing Decision Making with MIS

116. What are the three primary types of management information systems available to support decision making across the company levels?

- A. Transaction Processing Systems, Decision Support Systems, Executive Information Systems**
- B. Analytical Information, Decision Support Systems, Executive Information Systems
- C. Transaction Processing Systems, Drill-Down Systems, Expert Systems
- D. What-If Analysis, Sensitivity Analysis, Goal-Seeking Analysis

The three primary types of management information systems available to support decision making across the company levels are 1) transaction processing systems, 2) decision support systems, and 3) executive information systems.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

117. A transaction processing system (TPS) is the basic business system that assists operational level analysts when making structured decisions. Which of the below is not an example of a TPS?

- A. Target's internal company payroll system
- B. Comfort Dental patient diagnosis system**
- C. First Bank's overall accounting system
- D. Stewart Sport's order entry system

A transaction processing system (TPS) is the basic business system that assist operational level analysts make structured decisions. The most common examples of a TPS include 1) a company payroll system, 2) an operational accounting system, and 3) an order entry system. Example B is an example of a DSS or decision support system.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Hard

Topic Area: Support Enhancing Decision Making with MIS

118. What is the flow that a systems thinking approach using a TPS would follow?

- A. Streamlining (Input)-CRUD, Calculate (Process)-Reports (Output)
- B. Source Documents (Input)-Optimization Analysis (Process)-(Feedback)-(Output)
- C. Source Documents (Input)-CRUD, Calculate (Process)-Reports (Output)-(Feedback)**
- D. Selling Documents (Input)-Cycle Time (Process)-Reports (Output)-(Feedback)

A transaction processing system or TPS is the basic business system that assists operational level analysts make structured decisions. An example of the process of a systems thinking utilizing a TPS follows this flow is 1) source documents (Input), 2) CRUD, calculate, summarize (Process), 3) reports (Output), and 4) feedback.

AACSB: Reflective Thinking

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Medium

Topic Area: Support Enhancing Decision Making with MIS

119. Online transaction processing (OLTP) is the capturing of transaction and event information using technology to _____.

- A. Update existing information to reflect the new information
- B. Store the information
- C. Process the information according to defined business rules
- D. All of the above**

Online transaction processing (OLTP) is the capture of transaction and event information using technology to 1) update existing information to reflect the new information, 2) store the information, and 3) process the information according to defined business rules.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Medium

Topic Area: Support Enhancing Decision Making with MIS

120. Which of the below does not represent an example of analytical information?

- A. Trends and product statistics
- B. Unstructured long-term decisions**
- C. Five year sales report
- D. Future growth projections

Examples of analytical information are trends, sales, product statistics, and future growth projections. Managers use analytical information when making important semistructured decisions.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Medium

Topic Area: Support Enhancing Decision Making with MIS

121. Decision support systems or DSS's model information using OLAP, which provides assistance in evaluating and choosing among different courses of action. Which of the below does not represent an example of a DSS in business?

- A. An insurance company using a system to gauge risk of providing insurance to drivers who have imperfect driving records.
- B. A medical doctor may enter symptoms into a system to aid them in diagnosing and treating patients.
- C.** A manufacturing digital dashboard showing visualizations of inventory and production.
- D. A dentist entering symptoms into a system to help diagnose and treat patients.

Decision support systems or DSS's model information using OLAP, which provides assistance in evaluating and choosing among different courses of action. Examples include A) an insurance company using DSS's to gauge risk of providing insurance to drivers who have imperfect driving records, and B and D) a medical doctor may enter symptoms into a DSS to aid them in diagnosing and treating patients.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Hard

Topic Area: Support Enhancing Decision Making with MIS

122. What is the MIS system that manipulates information to create business intelligence in support of strategic decision making?

- A. Online transaction processing (OLTP)
- B.** Online analytical processing (OLAP)
- C. Digital dashboard
- D. Visualization

Online analytical processing (OLAP) is the manipulation of information to create business intelligence in support of strategic decision making.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Topic Area: Support Enhancing Decision Making with MIS

123. When viewing systems thinking, source documents are the original transaction records. What would the source documents for a medical doctor's payroll system include?

- A. Employee time sheets
- B. Employee benefit reports
- C. Employee wage rates
- D. All of the above**

When viewing systems thinking, source documents are the original transaction records. Source documents for a medical doctor's payroll system, for example, would include 1) employee time sheets, 2) employee benefit reports, and 3) wage rates.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Medium

Topic Area: Support Enhancing Decision Making with MIS

124. Which of the below represent the four main DSS analysis techniques outlined in the chapter?

- A. What-If Analysis, Sensitivity Analysis, Goal-Seeking Analysis, Optimization Analysis**
- B. Workflow Analysis, Sensitivity Analysis, Growth Analysis, Organizational Analysis
- C. What-If Analysis, Structured Analysis, Goal-Seeking Analysis, Optimization Analysis
- D. What-If Analysis, Sensitivity Analysis, Growth Analysis, Organizational Analysis

The four main DSS analysis techniques outlined in the chapter are 1) what-if analysis, 2) sensitivity analysis, 3) goal-seeking analysis, and 4) optimization analysis.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

125. Tom Watson is a manager for a McDonald's restaurant. Many of his key responsibilities include analyzing data and making key decisions for the success of his store. Tom's store has been experiencing decreased sales for breakfast services over the past 3 months. Tom is unsure why breakfast revenues are down while lunch and dinner revenues remain unchanged. Tom believes that he can drive revenue up by implementing a few different breakfast promotions such as free coffee or hash browns with the purchase of a meal. Tom performs an extensive analysis of how continuous changes in breakfast promotions could impact his daily revenue. What type of DSS analysis is Tom performing?

- A. Optimization analysis
- B. Sensitivity analysis**
- C. Transaction analysis
- D. Goal-seeking analysis

Sensitivity analysis which is a special case of what-if analysis, is the study of the impact on other variables when one variable is changed repeatedly. For example, changing revenue in small increments to determine its effects on other variables would help a manager understand the impact of various revenue levels on other decision factors.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Topic Area: Support Enhancing Decision Making with MIS

126. What is the DSS analysis that checks the impact of a change in a variable or assumption on the model?

- A. Optimization analysis
- B. Goal-seeking analysis
- C. Sensitivity analysis
- D. What-if analysis**

A What-If analysis checks the impact of a change in a variable or assumption on the model.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

127. Online transaction processing (OLTP) and online analytical processing (OLAP) are similar MIS strategies used to help with business decision making. What is the primary difference between OLTP and OLAP?

- A. OLTP is used at the operational level; OLAP is used at the managerial level
- B. OLTP is used to capture transactional and event data; OLAP is used to manipulate information
- C. OLTP is used to support structured decisions; OLAP is used to support semistructured decisions
- D.** All of the above

Online transaction processing (OLTP) is the capturing of transaction and event information using technology to (1) process the information according to defined business rules, (2) store the information, and (3) update existing information to reflect the new information. It is used at the operational level and to support structured decisions. Online analytical processing (OLAP) is the manipulation of information to create business intelligence in support of strategic decision making. It is used at the managerial level and to support semistructured decisions.

Level: Medium

Topic Area: Support Enhancing Decision Making with MIS

128. An optimization analysis finds the optimum value for a target variable by repeatedly changing other variables, subject to specified constraints. What can a manager determine by changing revenue and cost variables in an optimization analysis?

- A. Calculate the highest potential profits
- B. Calculate employee benefit payments
- C. Use this as an extension for a digital dashboard
- D. Create production schedules

An optimization analysis finds the optimum value for a target variable by repeatedly changing other variables, subject to specified constraints. By changing revenue and cost variables in an optimization analysis, managers can calculate the highest potential profits.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Medium

Topic Area: Support Enhancing Decision Making with MIS

129. What is the analysis that works in reverse to what-if and sensitivity analysis by finding the inputs necessary to achieve a goal such as a desired level of output?

- A. Solutions based analysis
- B. Optimization system
- C. Goal-seeking analysis
- D. Revenue analysis

A goal-seeking analysis works in reverse to what-if and sensitivity analysis, and finds the inputs necessary to achieve a goal such as a desired level of output.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

130. Decision making at the executive or strategic level require business intelligence and knowledge to support the uncertainty and complexity of the business. What is a specialized DSS that supports senior-level executives and unstructured decisions requiring judgment, evaluation, and insight?

- A. OLTP
- B. Executive Information System (EIS)**
- C. Transaction Support System (TSS)
- D. Decision Support System (DSS)

An EIS or an Executive information system is a specialized DSS that supports senior-level executives and unstructured, long-term, nonroutine decisions requiring judgment, evaluation, and insight.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

131. Executives of a company deal less with details of the operational activities and deal more with the higher meaningful aggregations of information or "coarser" information. What refers to the level of detail in the model?

- A. Drill-down
- B. Visualization
- C. Granularity**
- D. Consolidation

Granularity refers to the level of detail in the model or the decision-making process.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

Level: Easy

Topic Area: Support Enhancing Decision Making with MIS

132. How does a DSS typically differ from an EIS?

- A.** EIS requires data from external sources to support unstructured decisions where a DSS typically uses internal sources to support semistructured decisions
- B. DSS typically uses external sources and EIS use internal sources to support decisions
- C. A DSS never uses external sources
- D. EIS always uses internal sources to support structured decisions

A DSS (decision support system) differs from an EIS (executive information system) primarily because EIS require data from external sources to support unstructured decisions where a DSS typically uses internal sources to support semistructured decisions.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

136. Which of the below would not be found in a digital dashboard for a manufacturing team?

- A. A graph of stock market prices
- B. A running line graph of planned versus actual production for the past 24 hours
- C. An excel spreadsheet with cost analysis data**
- D. A hot list of key performance indicators, refreshed every 15 minutes

Examples of potential features included in a dashboard designed for a manufacturing team include 1) a hot list of key performance indicators, refreshed every 15 minutes, 2) a running line graph of planned versus actual production for the past 24 hours, 3) a table showing actual versus forecasted product prices and inventories, 4) a list of outstanding alerts and their resolution status, and 5) a graph of stock market prices.

AACSB: Reflective Thinking

AACSB: Technology

137. As the product manager for the eatery division at Whole Foods, Jerry is responsible for analyzing sales data to help him manage his team. Today Jerry is analyzing his data using many different perspectives to identify different ways to improve his division. Which of the following common digital dashboard capabilities is Jerry using to analyze his department's success?

- A. Slice-and-Dice**
- B. Competitive tables
- C. Drill-down
- D. Consolidation

Slice-and-dice is the ability to look at information from different perspectives.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

140. Van Lines Inc. is a large corporation operating in all 50 states. Jim Poulous is the regional manager overseeing the western division, which includes Utah, Colorado, Idaho, Montana, Wyoming, and Nevada. Jim receives data from his managers in each state which he loads into his digital dashboard for analysis of his entire western division. What digital dashboard capability is Jim primarily using?

- A. Drill-down
- B. Slice-and-dice
- C. Intelligent system
- D.** Consolidation

Consolidation is the aggregation of data from simple roll-ups to complex groupings of interrelated information. For example, data for different sales regions can then be rolled up to a regional level.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-03 Classify the different operational support systems; managerial support systems; and strategic support systems; and explain how managers can use these systems to make decisions and gain competitive advantages.

141. Artificial Intelligence stimulates human thinking and behavior, such as the ability to reason and learn. What is the ultimate goal of AI?

- A. To build an intelligent system
- B. To build an intelligent agent
- C.** To build a system that can mimic human intelligence
- D. To build a system that can mimic an expert agent

The ultimate goal of AI is to build a system that can mimic human intelligence.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-04 Describe artificial intelligence; and identify its five main types.

Level: Easy

Topic Area: The Future Artificial Intelligence

142. Which of the following is an example of an intelligent system?
- A. The Firefighter Robot that can extinguish flames at chemical plants
 - B. Shell Oil's Smart Pump robot that pumps gas for the customer
 - C. A robot that cleans and sweeps at a local airport
 - D.** All of the above

Intelligent systems are various commercial applications of artificial intelligence. They perform numerous business functions such as 1) performing tasks as boosting productivity in factories by monitoring equipment and signaling when preventative maintenance is required, 2) at Manchester Airport, the robot cleaner alerts passengers to security, nonsmoking areas, and cleans the floors daily, 3) Shell Oil's Smart Pump keeps drivers in their cars, while the robot pumps gas, 4) Matsushita's courier robot navigates hospital hallways, delivering files and supplies, and 5) The Firefighter Robot that can extinguish flames at chemical plants.

145. Which of the below categories of AI is used extensively in the finance industry to analyze situations where the logic or rules are unknown?

- A. Expert system
- B. Virtual reality
- C. Neural network
- D. Genetic algorithm

The finance industry is a veteran in the use of neural networks to emulate the way the human brain works by analyzing large quantities of information to establish patterns and characteristics in situations where the logic or rules are unknown.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-04 Describe artificial intelligence; and identify its five main types.

Level: Easy

Topic Area: The Future Artificial Intelligence

146. Which of the following is not a feature of a neural network?

- A. Neural networks can cope with huge volumes of information with many variables
- B. Neural networks can function without complete or well-structured information
- C. Neural networks can analyze linear relationships only**
- D. Neural networks can learn and adjust to new circumstances on their own

Neural networks' many features include 1) learning and adjusting to new circumstances on their own, 2) functioning without complete or well-structured information, 3) coping with huge volumes of information with many dependent variables, and 4) analyzing nonlinear relationships in information.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Topic Area: Evaluating Business Processes

160. Most business processes are cross-functional or cross-departmental processes that span the entire organization. Which of the below does not represent a cross-functional business process?

- A. Order-to-delivery process
- B. Loan processing
- C. Taking a product from concept to market
- D.** Processing payroll

Most business processes are cross-functional or cross-department processes that span the entire organization. The process of "order to delivery" focuses on the entire customer order process across functional departments. Another example is "product realization," which includes not only the way a product is developed, but also the way it is marketed and serviced. Other cross-functional business processing are taking a product from concept to market, acquiring customers, loan processing, providing post-sales service, claim processing, and reservation handling.

Topic Area: Evaluating Business Processes

161. The accounting and finance department performs processes such as creating financial statements, paying accounts payables, and collecting accounts receivables. What form of processes do these represent?

- A. Customer-facing processes
- B.** Business-facing processes
- C. Industry-specific customer facing processes
- D. All of the above

The accounting and finance division in a company creates financial statements, pays the accounts payables, and collects accounts receivables. All of these processes are business-facing processes.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing processes.

Level: Medium

Topic Area: Evaluating Business Processes

162. What form of processes include loan processing for a bank, claims processing for an insurance company, reservation processing for a hotel, and baggage handling for an airline?

- A. Customer-facing processes
- B. Business-facing processes
- C. Industry-specific customer-facing processes**
- D. All of the above

Loan processing for a bank, claims processing for an insurance company, reservation processing for a hotel, and baggage handling for an airline are all examples of industry specific customer facing processes.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing processes.

163. What type of process includes order processing, customer service processing, sales processing, customer billing processing, and order shipping processing?

- A. Customer-facing processes**
- B. Business-facing processes
- C. Industry-specific customer facing processes
- D. All of the above

Order processing, customer service processing, sales processing, customer billing processing, and order shipping processing are all customer-facing processes.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing processes.

Level: Medium

Topic Area: Evaluating Business Processes

164. Which of the below represents business processes you would find in the human resources department?

- A. Hiring employees
- B. Enrolling employees in benefit plans
- C. Tracking vacation and sick time
- D. All of the above**

Some sample business processes included within the human resources division of a company include 1) hiring employees, 2) enrolling employees in health care or other benefit plans, and 3) tracking vacation and sick time.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing processes.

Level: Easy

Topic Area: Evaluating Business Processes

165. What is the difference between customer-facing processes and business-facing processes?

- A. Business-facing processes are front-office processes, customer-facing processes are back-office processes
- B. Customer-facing processes are front-office processes, business-facing processes are back-office processes**
- C. Customer-facing processes are back-office processes, and industry-specific customer-facing processes are back-office processes
- D. Customer-facing processes are back-office processes, and industry-specific customer-facing processes are front-office processes

Customer-facing processes, also called front-office processes, result in product service received by an organization's external customer. Business-facing processes, also called back-office processes, are invisible to the external customer but essential to the effective management of the business.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing processes.

176. What is the business process model that ensures the process is fully and clearly understood before the details of a process solution are decided upon?

- A. As-is process model
- B. Business process reengineering model
- C. Customer facing process
- D.** To-Be process model

The To-Be process model approach ensures that the process is fully and clearly understood before the details of a process solution are decided upon.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Knowledge

Learning Objective: 02-06 Demonstrate the value of business process modeling; and compare As-Is and To-Be models.

Level: Easy

Topic Area: Models Measuring Performance

177. What is the difference between the As-Is process model and the To-Be process model?

- A.** The As-Is process model begins with what the process problem is, and the To-Be process model displays how the problem will be solved
- B. The process models are not related
- C. Both process models determine when to solve the problem
- D. The As-Is process model begins with where to implement the solution, and the To-Be process model displays why the problem needs to be fixed

The business process modeling usually begins with a functional process representation. The differences between the two models is that the As-Is process model begins with what the process problem is and the To-Be process model displays how the problem will be solved.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Comprehension

Learning Objective: 02-06 Demonstrate the value of business process modeling; and compare As-Is and To-Be models.

179. The local florist in town is Cheryl Steffan who has been in business for over 20 years.

Recently, Cheryl has noticed several complaints about delivery errors. Cheryl decides to investigate the errors in her business delivery process and finds that most of the inaccuracies occur during order taking. Cheryl decides to implement an electronic ordering system to help improve order efficiency and effectiveness. What method did Cheryl follow to solve her delivery issues?

- A. Modeled the As-Is process, fixed the errors, and then created the To-Be process**
- B. Modeled the To-Be process, fixed the errors, and then created the As-Is process
- C. Moved directly to implementing the To-Be process without analyzing the As-Is process
- D. Moved directly to implementing the As-Is process without analyzing the To-Be process

The As-Is process model has the primary goals to simplify, eliminate, and improve the processes by defining the most efficient and effective process.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-06 Demonstrate the value of business process modeling; and compare As-Is and To-Be models.

184. Which of the below examples indicates when the time is right to initiate a business process change?

- A. The market being served makes a distinctive shift
- B. The company is below industry benchmarks on its core processes
- C. The company strategically passes or leapfrogs the competition on key decisions to regain competitive advantage
- D.** All of the above

The three conditions that indicate the time is right to initiate a business process change are 1) there has been a pronounced shift in the market the process was designed to serve, 2) the company is markedly below industry benchmarks on its core processes, and 3) to regain competitive advantage, the company must leapfrog competition on key dimensions.

Essay Questions

239. Explain the importance of decision making for managers at each of the three primary organization levels along with the associated decision characteristics.

Decision-making skills are essential for all business professionals, at every company level, who make decisions that run the business. At the operational level, employees develop, control, and maintain core business activities required to run the day-to-day operations. Operational decisions are considered structured decisions, which arise in situations where established processes offer potential solutions. Structured decisions are made frequently and are almost repetitive in nature; they affect short-term business strategies. At the managerial level, employees are continuously evaluating company operations to hone the firm's abilities to identify, adapt to, and leverage change. Managerial decisions cover short- and medium-range plans, schedules, and budgets along with policies, procedures, and business objectives for the firm. These types of decisions are considered semistructured decisions; they occur in situations in which a few established processes help to evaluate potential solutions, but not enough to lead to a definite recommended decision. At the strategic level, managers develop overall business strategies, goals, and objectives as part of the company's strategic plan. They also monitor the strategic performance of the organization and its overall direction in the political, economic, and competitive business environment. Strategic decisions are highly unstructured decisions, occurring in situations in which no procedures or rules exist to guide decision makers toward the correct choice. They are infrequent, extremely important, and typically related to long-term business strategy.

240. Define critical success factors (CSFs) and key performance indicators (KPIs), and explain how managers use them to measure the success of MIS projects.

Metrics are measurements that evaluate results to determine whether a project is meeting its goals. Two core metrics are critical success factors and key performance indicators. CSFs are the crucial steps companies perform to achieve their goals and objectives and implement their strategies and include creating high-quality products, retaining competitive advantages, and reducing product costs. KPIs are the quantifiable metrics a company uses to evaluate progress toward critical success factors. KPIs are far more specific than CSFs; examples include turnover rates of employees, percentage of help-desk calls answered in the first minute, and number of products returned. It is important to understand the relationship between critical success factors and key performance indicators. CSFs are elements crucial for a business strategy's success. KPIs measure the progress of CSFs with quantifiable measurements, and one CSF can have several KPIs. Of course, both categories will vary by company and industry. Imagine improved graduation rates as a CSF for a college.

241. Classify the different operational support systems, managerial support systems, and strategic support systems, and explain how managers can use these systems to make decisions and gain competitive advantages.

Being able to sort, calculate, analyze, and slice-and-dice information is critical to an organization's success. Without knowing what is occurring throughout the organization there is no way that managers and executives can make solid decisions to support the business. The different operational, managerial, and strategic support systems include: Operational: A transaction processing system (TPS) is the basic business system that serves the operational level (analysts) in an organization. The most common example of a TPS is an operational accounting system such as a payroll system or an order-entry system. Managerial: A decision support system (DSS) models information to support managers and business professionals during the decision-making process. Strategic: An executive information system (EIS) is a specialized DSS that supports senior level executives within the organization.

Topic Area: Support Enhancing Decision Making with MIS

242. Describe artificial intelligence, and identify its five main types.

Artificial intelligence (AI) simulates human thinking and behavior, such as the ability to reason and learn. The five most common categories of AI are: 1. Expert systems—computerized advisory programs that imitate the reasoning processes of experts in solving difficult problems. 2. Neural networks—attempts to emulate the way the human brain works. 3. Genetic algorithm—a system that mimics the evolutionary, survival-of-the-fittest process to generate increasingly better solutions to a problem. 4. Intelligent agents—a special-purpose knowledge-based information system that accomplishes specific tasks on behalf of its users. 5. Virtual reality—a computer-simulated environment that can be a simulation of the real world or an imaginary world.

Topic Area: The Future Artificial Intelligence

243. Explain the value of business processes for a company, and differentiate between customer-facing and business-facing process.

A business process is a standardized set of activities that accomplish a specific task, such as processing a customer's order. Business processes transform a set of inputs into a set of outputs (goods or services) for another person or process by using people and tools. Without processes, organizations would not be able to complete activities. Customer-facing processes result in a product or service that is received by an organization's external customer. Business-facing processes are invisible to the external customer but essential to the effective management of the business.

Learning Objective: 02-05 Explain the value of business processes for a company; and differentiate between customer-facing and business-facing processes.

Level: Hard

Topic Area: Evaluating Business Processes

244. Demonstrate the value of business process modeling, and compare As-Is and To-Be models.

Business process modeling (or mapping) is the activity of creating a detailed flowchart or process map of a work process showing its inputs, tasks, and activities, in a structured sequence. A business process model is a graphic description of a process, showing the sequence of process tasks, which is developed for a specific purpose and from a selected viewpoint. Business process modeling usually begins with a functional process representation of what the process problem is, or an As-Is process model. As-Is process models represent the current state of the operation that has been mapped, without any specific improvements or changes to existing processes. The next step is to build a To-Be process model that displays how the process problem will be solved or implemented. To-Be process models show the results of applying change improvement opportunities to the current (As-Is) process model. This approach ensures that the process is fully and clearly understood before the details of a process solution are decided upon.

AACSB: Reflective Thinking

AACSB: Technology

Bloom's: Analysis

Learning Objective: 02-06 Demonstrate the value of business process modeling; and compare As-Is and To-Be models.

Level: Hard

Topic Area: Models Measuring Performance

245. Differentiate among business process improvements, streamlining, and reengineering.

Business process improvement attempts to understand and measure the current process and make performance improvements accordingly. Streamlining improves business process efficiencies by simplifying or eliminating unnecessary steps. Bottlenecks occur when resources reach full capacity and cannot handle any additional demands; they limit throughput and impede operations. Streamlining removes bottlenecks, an important step if the efficiency and capacity of a business process are being increased. Business process reengineering (BPR) is the analysis and redesign of workflow within and between enterprises and occurs at the systems level or companywide level and the end-to-end view of a process.
