17.	Rh incompatibility occurs when a woman who does not have this factor - and is thus Rh positive - is carrying an Rh-negative fetus.
	ANS: F PTS: 1 DIF: Bloom's: Remember REF: 2.2 Prenatal Development, Textbook OBJ: LO17: Explain what is meant by critical periods of vulnerability during prenatal development
	MSC: TYPE: Difficult
18.	Vitamins have been shown to be completely safe for pregnant women to take.
	ANS: F PTS: 1 DIF: Bloom's: Remember REF: 2.2 Prenatal Development, Textbook
	OBJ: LO16: Discuss nutrition in prenatal development MSC: TYPE: Medium
19.	During transition, the cervix is nearly fully dilated, and the head of the fetus begins to move into the vagina.
	ANS: T PTS: 1 DIF: Bloom's: Remember
	REF: 2.3 Childbirth, Textbook Video - A Birth, Online OBJ: LO20: Describe events that indicate that a baby is ready to be born MSC: TYPE: Medium
20.	Cuban Americans have the lowest child mortality rate.
	ANS: T PTS: 1 DIF: Bloom's: Remember REF: 2.3 Childbirth, Textbook Reading - Global Birthrates, Online OBJ: LO25: Discuss global differences in maternal and child mortality. MSC: TYPE: Medium
MUL	TIPLE CHOICE
1.	According to Figure 2.1 in the text, which of the following is the smallest unit? a. cell c. nucleus b. chromosome d. DNA
	ANS: D PTS: 1 DIF: Bloom's: Understand
	REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO1: Define chromosomes and genes MSC: TYPE: Medium
2.	Which of the following utilizes partnering to create a DNA strand?
	a. mitosisb. meiosisc. ovulationd. reduction division
	ANS: B PTS: 1 DIF: Bloom's: Understand REF: 2.1 Genetic Influences on Development, Textbook
	OBJ: LO2: Describe mitosis and meiosis MSC: TYPE: Medium
3.	How can a genetic code be altered? a. Through mitosis c. Through mutation b. Through meiosis d. Through reduction division
	ANS: C PTS: 1 DIF: Bloom's: Understand
	REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO2: Describe mitosis and meiosis MSC: TYPE: Medium

4.	David and Sharon just had a baby boy. Sharon jokes that David arranged a boy on purpose. The doctor laughs, and then explains that which of the following is ultimately responsible for the baby boy's gender? a. The 22nd pair of autosomes c. The 23rd pair of chromosomes
	b. The 46 pairs of chromosomes d. The 23 pairs of autosomes
	ANS: C PTS: 1 DIF: Bloom's: Apply REF: 2.1 Genetic Influences on Development, Textbook
	OBJ: LO2: Describe mitosis and meiosis MSC: TYPE: Medium
5.	Lisa is writing a research paper on twins and in the research process, finds out that which of the following women would be most likely to have twins? a. A 25-year-old woman with twin cousins b. A 40 year-old woman with a mother who was a twin c. A 30-year-old woman with a father who was a twin d. A 35-year-old woman thinking about taking fertility drugs
	ANS: B PTS: 1 DIF: Bloom's: Apply REF: 2.1 Genetic Influences on Development, Textbook
	OBJ: LO3: Differentiate between identical and fraternal twins MSC: TYPE: Medium
6.	 Kali and Kelly are identical twins. What caused this? a. A single zygote split into two. b. A single zygote was fertilized twice. c. Two separate zygotes were fertilized by the same sperm. d. Two separate zygotes were fertilized at two separate times within the same month.
	ANS: A PTS: 1 DIF: Bloom's: Analyze REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO3: Differentiate between identical and fraternal twins MSC: TYPE: Medium
7.	Which of the following would be an example of a dominant trait? a. blonde hair b. blue eyes c. red hair d. brown eyes
	ANS: D PTS: 1 DIF: Bloom's: Apply REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO4: Define dominant and recessive traits, and provide examples of each MSC: TYPE: Medium
8.	If one parent has brown eyes, and the child has a recessive allele for blue eyes from both parents, what is likely to happen? a. The child will have brown eyes. b. The child will have green eyes. c. The child will have blue eyes. d. The child will have either brown eyes or blue eyes.
	ANS: C PTS: 1 DIF: Bloom's: Analyze REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO4: Define dominant and recessive traits, and provide examples of each MSC: TYPE: Medium
9.	Which of the following is an example of a recessive trait? a. Curly hair c. Lactose tolerance

	ANS: D PTS: 1 DIF: REF: 2.1 Genetic Influences on Development, To OBJ: LO4: Define dominant and recessive traits, MSC: TYPE: Medium	
10.	· · · · · · · · · · · · · · · · · · ·	mewhere in the first 22 pairs of autosomes? Sex-linked syndrome Down syndrome
	ANS: D PTS: 1 DIF: REF: 2.1 Genetic Influences on Development, To OBJ: LO5: Discuss chromosomal disorders	Bloom's: Understand extbook MSC: TYPE: Medium
	Obj. LOS. Discuss enfoliosomal disorders	MSC. 111E. Medium
11.	Which of the following causes Down's syndrome a. The 46 chromosomes c. b. An excess 21st chromosome d.	An excess 23rd chromosome
	REF: 2.1 Genetic Influences on Development, To	
	OBJ: LO5: Discuss chromosomal disorders	MSC: TYPE: Medium
12.	Which of the following would be a disease that we a. Phenylketonuria c. b. Huntington's disease d.	Sickle-cell anemia
	REF: 2.1 Genetic Influences on Development, To	Bloom's: Apply extbook : TYPE: Medium
13.	Which of the following individuals is most likely	to have sickle-cell anemia?
	a. A Jewish child c.	A White child
		A Latin American adult
	ANS: B PTS: 1 DIF: REF: 2.1 Genetic Influences on Development, To OBJ: LO6: Discuss genetic disorders MSC	Bloom's: Apply extbook : TYPE: Medium
14.	Which of the following would result in mental reta	
	a. Phenylketonuriab. Huntington's diseasec.d.	
	ANS: A PTS: 1 DIF:	Bloom's: Apply
	REF: 2.1 Genetic Influences on Development, To OBJ: LO6: Discuss genetic disorders MSC	extbook : TYPE: Medium
15.	Which of the following genetic disorders results in adulthood?	n respiratory complications and death in young
	a. Tay-Sachs diseaseb. Cystic fibrosisc.d.	Muscular dystrophy Hemophilia
	ANS: B PTS: 1 DIF: REF: 2.1 Genetic Influences on Development, To OBJ: LO6: Discuss genetic disorders MSC	Bloom's: Apply extbook : TYPE: Medium

d. Lack of dimples

b. Type A blood

16.	Which of the following individuals has the greatest chance of contracting a sex-linked genetic abnormality? a. A male with a mother with muscular dystrophy b. A female with a mother with muscular dystrophy c. A male with a father with muscular dystrophy d. A female with a father with muscular dystrophy
	ANS: A PTS: 1 DIF: Bloom's: Analyze REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO6: Discuss genetic disorders MSC: TYPE: Medium
17.	Which of the following would be a procedure that would be used on a pregnant woman over 40-years-old?
	a. genetic counselingb. amniocentesisc. sonogramd. ultrasound
	ANS: B PTS: 1 DIF: Bloom's: Understand REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO7: Describe prenatal testing methods for chromosomal and genetic abnormalities MSC: TYPE: Medium
18.	Angela and Greg would like to know the gender of their baby, but they want to do so as safely as possible. Which of the following procedures would you recommend? a. amniocentesis c. ultrasound b. CVS d. genetic counseling
	ANS: C PTS: 1 DIF: Bloom's: Analyze REF: 2.1 Genetic Influences on Development, Textbook Reading - Sex Selection, Online OBJ: LO7: Describe prenatal testing methods for chromosomal and genetic abnormalities MSC: TYPE: Medium
19.	Which of the following is used sparingly as it carries the greatest risk of miscarriage? a. CVS c. amniocentesis b. ultrasound d. early amniocentesis
	ANS: A PTS: 1 DIF: Bloom's: Understand REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO7: Describe prenatal testing methods for chromosomal and genetic abnormalities MSC: TYPE: Medium
20.	Which of the following genetic diseases would not be revealed with a parental blood test before pregnancy? a. Tay-Sachs disease c. Cystic fibrosis
	b. Huntington's disease d. Sickle-cell anemia
	ANS: B PTS: 1 DIF: Bloom's: Understand REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO8: Differentiate between genotypes and phenotypes MSC: TYPE: Medium
21.	Pamela's father was a calm, quiet man. Pamela tends to be calm and quiet as well, unless she is playing soccer, her favorite sport. What does her aggressiveness on the field indicate? a. The effects of her chromosomes c. The effects of her phenotypes b. The effects of her genotypes d. The effects of her environment
	ANS: C PTS: 1 DIF: Bloom's: Evaluate REF: 2.1 Genetic Influences on Development, Textbook

	OBJ: LO8: Differentiate between genotypes and phenotypes MSC: TYPE: Difficult
22.	Which of the following people would Ann be closest to genetically? a. her grandmother c. her aunt b. her brother d. her cousin
	ANS: B PTS: 1 DIF: Bloom's: Understand REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO8: Differentiate between genotypes and phenotypes MSC: TYPE: Medium
23.	Paul and Peter seem identical in almost every way. They have the same taste in music. They have the same facial expressions and features. They drive the same car, and they work in the same professional field. Since they did not grow up together, what explanation is there for this? a. There is an environmental basis for their behaviors. b. They are dizygotic twins. c. They have a strong instinctive connection. d. There is a strong genetic basis for their behaviors.
	ANS: D PTS: 1 DIF: Bloom's: Analyze REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO9: Explain how twin studies and adoption studies are used to sort out the effects of nature and nurture. MSC: TYPE: Difficult
24.	Who of the following would be more likely to share autism? a. male siblings c. DZ twins b. female siblings d. MZ twins
	ANS: D PTS: 1 DIF: Bloom's: Apply REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO9: Explain how twin studies and adoption studies are used to sort out the effects of nature and nurture MSC: TYPE: Medium
25.	Nancy and Sarah were separated at birth and raised in separate households. They did not have contact with each other and were not aware that they were twins. Researchers studied them to see if there were any similarities in their behaviors and traits. What is this type of research called? a. twin studies c. kinship studies b. trait studies d. adoption studies
	ANS: A PTS: 1 DIF: Bloom's: Analyze REF: 2.1 Genetic Influences on Development, Textbook OBJ: LO9: Explain how twin studies and adoption studies are used to sort out the effects of nature and nurture MSC: TYPE: Difficult
26.	 How do sperm reach the ovum? a. They travel randomly through the cervix and uterus to the fallopian tube with the released ovum. b. They follow the scent of released chemicals through the cervix to the fallopian tube containing a released ovum. c. They follow the scent of released chemicals through the fallopian tube to the cervix where the ovum has been released. d. They travel randomly through the fallopian tube to the cervix where the ovum has been released. ANS: B PTS: 1 DIF: Bloom's: Analyze REF: 2.2 Prenatal Development, Textbook
	· ····· · · · · · · · · · · · · · · ·

27.	How many sperm cells are necessary to fertilize an ovum?
	a. 1 c. 1,000
	b. 100 d. 1,000,000
	ANS: A PTS: 1 DIF: Bloom's: Understand REF: 2.2 Prenatal Development, Textbook OBJ: LO10: Describe the development and release of ova MSC: TYPE: Easy
28.	What concept describes the time in which the sperm penetrates the ovum and unites with it? a. conception c. endometrium b. fertility d. implantation
	ANS: A PTS: 1 DIF: Bloom's: Apply REF: 2.2 Prenatal Development, Textbook Animation - Stages of Conception, Online OBJ: LO12: Define conception MSC: TYPE: Medium
29.	When are ova present in the female body? a. At birth b. In childhood before puberty c. During puberty d. During menstruation
	ANS: A PTS: 1 DIF: Bloom's: Understand REF: 2.2 Prenatal Development, Textbook Animation - Stages of Conception, Online OBJ: LO10: Describe the development and release of ova MSC: TYPE: Medium
30.	What is released during menstruation? a. The unfertilized egg and the lining of the fallopian tube b. The unfertilized egg and the cilia c. The unfertilized egg and the lining of the ovaries d. The unfertilized egg and the lining of the uterus
	ANS: D PTS: 1 DIF: Bloom's: Apply REF: 2.2 Prenatal Development, Textbook Animation - Stages of Conception, Online OBJ: LO10: Describe the development and release of ova MSC: TYPE: Medium
31.	 What is one explanation for why more boys than girls are conceived? a. The X sex chromosome swims faster than the Y sex chromosome. b. The Y sex chromosome swims faster than the X sex chromosome. c. There are more X sex chromosomes than Y sex chromosomes. d. There are more Y sex chromosomes than X sex chromosomes.
	ANS: B PTS: 1 DIF: Bloom's: Apply REF: 2.2 Prenatal Development, Textbook OBJ: LO12: Define conception MSC: TYPE: Medium
32.	 How do sperm cells develop? a. Through meiosis, with the X sex chromosomes splitting from the Y sex chromosomes to form 23 chromosomes. b. Through meiosis, with the X sex chromosomes splitting from the Y sex chromosomes to form 23 pairs of chromosomes. c. Through mitosis, with the X sex chromosomes splitting from the Y sex chromosomes to form 23 chromosomes.
	d. Through mitosis, with the X sex chromosomes splitting from the Y sex chromosomes to form 23 pairs of chromosomes.

MSC: TYPE: Difficult

OBJ: LO10: Describe the development and release of ova

	OBJ: LO11: Describe the development and travels of sperm MSC: TYPE: Medium
33.	 Which of the following is an obstacle sperm face in attempting to reach the ovum? a. Only a few viable sperm are ejaculated. b. Vaginal acidity kills many sperm. c. Most sperm travel randomly and do not go in the right direction. d. The cilia are designed to keep out foreign objects.
	ANS: B PTS: 1 DIF: Bloom's: Analyze REF: 2.2 Prenatal Development, Textbook OBJ: LO11: Describe the development and travels of sperm MSC: TYPE: Difficult
34.	 Why does only one sperm enter the ova? a. A chemical is released to prevent others from entering. b. More than one sperm enter the ova but do not fertilize the egg. c. The ova only has room for one sperm. d. The chemical used to attract sperm ceases once one sperm enters the ova.
	ANS: A PTS: 1 DIF: Bloom's: Analyze REF: 2.2 Prenatal Development, Textbook OBJ: LO11: Describe the development and travels of sperm MSC: TYPE: Difficult
35.	Adam and Maria have been trying to get pregnant for eight months. They are in your office and wonder when they will be able to go through infertility procedures. What do you advise? a. Infertility is normally diagnosed after trying for six months. b. Infertility is normally diagnosed after trying for eight months. c. Infertility is normally diagnosed after trying for ten months. d. Infertility is normally diagnosed after trying for twelve months.
	ANS: D PTS: 1 DIF: Bloom's: Analyze REF: 2.2 Prenatal Development, Textbook OBJ: LO12: Define conception MSC: TYPE: Difficult
36.	Which of the following would be one of the likeliest reasons for infertility in men? a. diabetes c. medication b. sexually transmitted infection d. low sperm count
	ANS: D PTS: 1 DIF: Bloom's: Understand REF: 2.2 Prenatal Development, Textbook OBJ: LO13: Discuss infertility MSC: TYPE: Medium
37.	Daniel and Sasha are very active and healthy. They eat right and exercise daily. Daniel often engages in long distance runs and then takes a hot bath before he and Sasha have sexual intercourse. When they visit a specialist about their inability to conceive, what is one issue that the physician will likely point out? a. The warm water from the bath would help Sarah conceive. b. Sarah is probably exercising too much. c. David's runs could be causing issues with conception. d. David needs to take a shower instead.

OBJ: LO10: Discuss the stages of prenatal development MSC: TYPE: Difficult

SHORT ANSWER

1. What is the cause of Turner syndrome and what are two characteristics of the syndrome?

ANS:

Turner syndrome occurs when a female has only one X sex chromosome. The ovaries are poorly developed and they produce little estrogen.

PTS: 1 DIF: Bloom's: Evaluate

REF: 2.1 Genetic Influences on Development, Textbook

OBJ: LO5: Discuss chromosomal disorders MSC: TYPE: Medium

2. Describe Huntington's Disease and identify three symptoms.

ANS:

Huntington's disease is a fatal, progressive degenerative disorder and a dominant trait, affecting approximately 1 in 18,000 Americans. Symptoms include uncontrollable muscle movements, loss of intellectual function, and personality change.

PTS: 1 DIF: Bloom's: Evaluate

REF: 2.1 Genetic Influences on Development, Textbook

OBJ: LO6: Discuss genetic disorders MSC: TYPE: Medium

3. Describe an ultrasound and its functionality.

ANS:

An ultrasound is a testing procedure that uses sound waves that are too high in frequency to be heard by the human ear to obtain information about the fetus. The ultrasound creates a picture of the fetus and track the fetus' growth.

PTS: 1 DIF: Bloom's: Evaluate

REF: 2.1 Genetic Influences on Development, Textbook

OBJ: LO6: Discuss genetic disorders MSC: TYPE: Medium

4. Differentiate between twin studies and adoption studies.

	N 1	1	
Δ			٠
$\boldsymbol{-}$	1.1	.,	

Twin studies looked at MZ twins separated at birth and raised in different homes. Adoption studies looked at children separated at an early age and reared by adoptive parents.

PTS: 1 DIF: Bloom's: Evaluate

REF: 2.1 Genetic Influences on Development, Textbook

OBJ: LO9: Explain how twin studies and adoption studies are used to sort out the effects of nature

and nurture MSC: TYPE: Difficult

5. How do fertility drugs act to create multiple births?

ANS:

Fertility drugs consist of hormones that cause women to ovulate. This could stimulate more than one ovum to ripen during a month.

PTS: 1 DIF: Bloom's: Evaluate

REF: 2.2 Prenatal Development, Textbook OBJ: LO13: Discuss infertility

MSC: TYPE: Medium

6. List the three periods of prenatal development and provide the ages related to each.

ANS:

Germinal stage - approximately the first two weeks

Embryonic stage - third through eighth weeks

Fetal stage - third month through birth

PTS: 1 DIF: Bloom's: Evaluate

REF: 2.2 Prenatal Development, Textbook

OBJ: LO15: Describe the stages of prenatal development MSC: TYPE: Medium

7. What is the ectoderm and why is it important?

ANS:

During the embryonic stage, the outer layer of cells of the embryonic disk, or ectoderm, develops into the nervous system, sensory organs, nails, hair, teeth, and outer layer of skin.

PTS: 1 DIF: Bloom's: Evaluate

REF: 2.2 Prenatal Development, Textbook

OBJ: LO15: Describe the stages of prenatal development MSC: TYPE: Difficult

8. Define teratogens and give two examples.

ANS

Teratogens are environmental agents that can harm the embryo or fetus. Two examples are marijuana and alcohol.

PTS: 1 DIF: Bloom's: Analyze

REF: 2.2 Prenatal Development, Textbook

OBJ: LO15: Describe the stages of prenatal development. MSC: TYPE: Difficult

9. Why do some physicians do an episiotomy?

ANS:

The purpose of an episiotomy is to prevent random tearing when the area between the birth canal and the anus becomes severely stretched.

PTS: 1 DIF: Bloom's: Apply REF: 2.3 Childbirth, Textbook

OBJ: LO21: Describe the three stages of childbirth MSC: TYPE: Medium

10. Name three reasons the maternal mortality rate in the United States is higher than it should be.

ANS:

States with above-average poverty rates, large rural populations, and below-average levels of education result in higher maternal mortality rates.

PTS: 1 DIF: Bloom's: Apply REF: 2.3 Childbirth, Textbook

OBJ: LO25: Discuss global differences in maternal and child mortality

MSC: TYPE: Medium
