## Chapter 2—The Economy: Myth and Reality

---

### TRUE/FALSE

1. The United States is the largest national economy in the world.

ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

2. The U.S. economy is unique for both its size and prosperity.

ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

3. The *factors of production* include all goods and services produced in an economy.

ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

4. *Outputs* include goods but not services.

ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

5. Population density varies little between the fifty states.

ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

6. Prosperity in the United States is evenly distributed across the fifty states.

ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

7. In the United States, all property is privately owned.

ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

8. Gross domestic product is the money value of all final goods and services produced in an economy in a year.

ANS: T                      PTS: 1                      DIF: Moderate                      NAT: Analytic

LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

9. Gross domestic product is the money value of manufacturing production in a year.

ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

10. GDP is a measure of the total output of an economy.

ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

11. Real GDP is the dollar value of all goods and services produced in an economy.

ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

12. Government production accounts for about half of all GDP in the United States.

ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: The role of government                      TOP: The American Economy: A Thumbnail Sketch

13. The United States is one of the most marketized economies in the world.

ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

14. The United States is one of the least marketized economies in the world.

ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

15. The U.S. economy is relatively open in terms of economic activity related to international trade.

ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

16. The U.S. economy is relatively closed in terms of economic activity related to exports and imports.

ANS: T                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

17. An open economy produces most of the goods and services that it needs, with few imports and exports.

ANS: F                    PTS: 1                    DIF: Easy                    NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

18. An open economy is one in which exports and imports constitute a large share of GDP.

ANS: T                    PTS: 1                    DIF: Moderate                    NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

19. The U.S. economy rarely grows.

ANS: F                    PTS: 1                    DIF: Easy                    NAT: Analytic  
LOC: Measuring the Economy                    TOP: The American Economy: A Thumbnail Sketch

20. Real GDP per capita in the U.S. grows over time.

ANS: T                    PTS: 1                    DIF: Moderate                    NAT: Analytic  
LOC: Reading and interpreting graphs                    TOP: The American Economy: A Thumbnail Sketch

21. In 2009, per capita real GDP was roughly half its value in 1960.

ANS: F                    PTS: 1                    DIF: Moderate                    NAT: Analytic  
LOC: Reading and interpreting graphs                    TOP: The American Economy: A Thumbnail Sketch

22. A recession is a period of time in which the total output of the economy falls.

ANS: T                    PTS: 1                    DIF: Easy                    NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

23. A recession is a period of time in which real GDP falls.

ANS: T                    PTS: 1                    DIF: Easy                    NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

24. The U.S. economy has grown steadily over the years.

ANS: F                    PTS: 1                    DIF: Easy                    NAT: Analytic  
LOC: Reading and interpreting graphs                    TOP: The American Economy: A Thumbnail Sketch

25. A recession is a period of time in which the total output of the economy rises.

ANS: F                    PTS: 1                    DIF: Easy                    NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

26. Unemployment in the United States varies considerably over time.
- ANS: T                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: The American Economy: A Thumbnail Sketch
27. Recessions are periods of declining economic activity.
- ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: The Study of economics, and definitions in economics  
 TOP: The American Economy: A Thumbnail Sketch
28. Over the last several years the United States has had lower unemployment rates than most European countries.
- ANS: T                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: The American Economy: A Thumbnail Sketch
29. Roughly 145 million people in the United States hold jobs.
- ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: Labor markets                      TOP: The Inputs: Labor and Capital
30. Teenage employment in the United States has risen in the last two decades.
- ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: The Inputs: Labor and Capital
31. A minority of American women work outside of the home.
- ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: The Inputs: Labor and Capital
32. Approximately half of all U.S. workers are employed by various levels of government.
- ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: The Inputs: Labor and Capital
33. The federal government employs more civilians than state and local governments.
- ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: Labor markets                      TOP: The Inputs: Labor and Capital
34. The majority of American workers are employed in the manufacturing sector.
- ANS: F                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: The Inputs: Labor and Capital
35. The majority of American workers are employed in the service sector of the economy.

- ANS: T                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Reading and interpreting graphs              TOP: The Inputs: Labor and Capital
36. Workers earn less than half of the income generated by the production process.
- ANS: F                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Labor markets                                      TOP: The Inputs: Labor and Capital
37. Workers earn more than half of the income generated by the production process.
- ANS: T                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Labor markets                                      TOP: The Inputs: Labor and Capital
38. The total market value of capital assets in the United States is over \$30 trillion dollars.
- ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: The Study of economics, and definitions in economics  
 TOP: The Inputs: Labor and Capital
39. Profits account for about 30 cents out of each dollar spent on goods in the United States.
- ANS: F                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: The Study of economics, and definitions in economics  
 TOP: The Inputs: Labor and Capital
40. Consumer spending accounts for about 70 percent of GDP.
- ANS: T                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Productivity and growth                      TOP: The Outputs: What Does America Produce?
41. American households spend more of their incomes on goods than on services.
- ANS: F                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Utility and consumer choice                      TOP: The Outputs: What Does America Produce?
42. There are about 5 million business firms in the Unites States.
- ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: Oligopoly                      TOP: The Central Role of Business Firms
43. The nationality of a company and a product is easily determined.
- ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: International trade and finance                      TOP: The Central Role of Business Firms
44. Multinational businesses produce and sell goods around the world.
- ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: International trade and finance                      TOP: The Central Role of Business Firms

45. Government is unnecessary in a free enterprise economy such as the United States.
- ANS: F                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: The role of government                      TOP: What's Missing from the Picture? Government
46. One important role for government as referee is in defining and enforcing property rights.
- ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: The role of government                      TOP: What's Missing from the Picture? Government
47. *Antitrust laws* are designed to promote competition.
- ANS: T                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Monopolistic Competition                      TOP: What's Missing from the Picture? Government
48. Government spending plays no role in meeting our social and public needs.
- ANS: F                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: The role of government                      TOP: What's Missing from the Picture? Government
49. National defense made up the largest portion of federal expenditures in 2009.
- ANS: F                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: Monetary and fiscal policy                      TOP: What's Missing from the Picture? Government
50. Government in the United States spends more as a percentage of GDP than in most other industrialized nations.
- ANS: F                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: What's Missing from the Picture? Government
51. The personal income tax is the single largest source of revenue for the federal government.
- ANS: T                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: What's Missing from the Picture? Government
52. The corporate income tax is the single largest source of revenue for the federal government.
- ANS: F                      PTS: 1                      DIF: Moderate              NAT: Analytic  
 LOC: Monetary and fiscal policy                      TOP: What's Missing from the Picture? Government
53. The federal government receives most of its revenue from personal income taxes and payroll taxes.
- ANS: T                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: Monetary and fiscal policy                      TOP: What's Missing from the Picture? Government
54. Transfer payments are money received as grants from government.

ANS: T                   PTS: 1                   DIF: Easy                   NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: What's Missing from the Picture? Government

55. A tax is progressive if the ratio of taxes to income rises as income rises.

ANS: T                   PTS: 1                   DIF: Moderate                   NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: What's Missing from the Picture? Government

56. A tax is progressive if it raises a greater fraction of total tax revenue every year.

ANS: F                   PTS: 1                   DIF: Moderate                   NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: What's Missing from the Picture? Government

57. A tax must be progressive if an individual with a higher income pays more dollars in taxes than an individual with a lower income.

ANS: F                   PTS: 1                   DIF: Easy                   NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: What's Missing from the Picture? Government

58. Education accounts for the largest share of state and local government spending.

ANS: T                   PTS: 1                   DIF: Easy                   NAT: Analytic  
LOC: Monetary and fiscal policy                   TOP: What's Missing from the Picture? Government

59. The government's budget accounts for about 80 percent of GDP in the United States.

ANS: F                   PTS: 1                   DIF: Easy                   NAT: Analytic  
LOC: Reading and interpreting graphs                   TOP: What's Missing from the Picture? Government

60. In a mixed economy, there is some public influence over the workings of free markets.

ANS: T                   PTS: 1                   DIF: Easy                   NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: Conclusion: It's a Mixed Economy

61. A mixed economy is one that combines public and private ownership of property.

ANS: T                   PTS: 1                   DIF: Easy                   NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: Conclusion: It's a Mixed Economy

62. The United States is an example of a mixed economy.

ANS: T                   PTS: 1                   DIF: Easy                   NAT: Analytic  
LOC: Understanding and Applying Economic Models

TOP: Conclusion: It's a Mixed Economy

## MULTIPLE CHOICE

1. The United States economy is
  - a. the third largest in the world.
  - b. larger than all other national economies combined.
  - c. second largest in the world, behind Japan.
  - d. largest in the world.

ANS: D                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

2. How does the U.S. economy rank in size?
  - a. first in economic output
  - b. second in economic output
  - c. third in economic output
  - d. fourth in economic output
  - e. fifth in economic output

ANS: A                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

3. The United States has the largest economy in the world because
  - a. it has the most land to work with.
  - b. it has a large population.
  - c. American workers are very productive.
  - d. both b and c are correct.

ANS: D                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

4. Inputs, or factors of production, include
  - a. labor.
  - b. machinery.
  - c. natural resources.
  - d. all of the above.

ANS: D                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

5. On a world scale, how populous is the U.S. economy?
  - a. first
  - b. second
  - c. third
  - d. fourth
  - e. fifth

ANS: C                      PTS: 1                      DIF: Easy                      NAT: Analytic

6. The working population of the United States is approximately
- 145 million
  - 290 million
  - 300 million
  - 1.3 billion

ANS: A

PTS: 1

DIF: Moderate

NAT: Analytic

LOC: Labor markets

TOP: The American Economy: A Thumbnail Sketch

7. If California were a separate economy, it would be the \_\_\_\_ largest economy on earth.
- second
  - third
  - fifth
  - eighth

ANS: D

PTS: 1

DIF: Moderate

NAT: Analytic

LOC: Measuring the Economy

TOP: The American Economy: A Thumbnail Sketch

8. Capitalism and free enterprise are common, and the United States
- has just begun to move in that direction after years of central planning.
  - has gone further in that direction than almost any other country.
  - is becoming more "free," but is not as capitalistic as many others.
  - is considering a major change to "free up" its economy as many others have.
  - is leading the move toward greater central planning and control.

ANS: B

PTS: 1

DIF: Easy

NAT: Analytic

LOC: Markets, market failure, and externalities

TOP: The American Economy: A Thumbnail Sketch

9. Government ownership of property and resources in the United States is
- about as common as it is in European countries.
  - widespread; the United States is a leader in the amount of government ownership of resources.
  - relatively rare; the United States is mostly privatized.
  - rare, but has been increasing rapidly as the United States catches up to other countries.

ANS: C

PTS: 1

DIF: Moderate

NAT: Analytic

LOC: Markets, market failure, and externalities

TOP: The American Economy: A Thumbnail Sketch

10. Gross domestic product is
- the largest industry in an economy.
  - the money value of all final goods and services produced in a year.
  - the volume of goods and services which are subject to international trade.
  - goods and services produced by private companies.
  - non-market production of goods and services.

ANS: B

PTS: 1

DIF: Moderate

NAT: Analytic

LOC: The Study of economics, and definitions in economics

TOP: The American Economy: A Thumbnail Sketch

11. The United States produces \_\_\_\_ of what it consumes, and consumes \_\_\_\_ of what it produces.
- little, little
  - little, most
  - most, little
  - most, most

ANS: D                      PTS: 1                      DIF: Moderate              NAT: Analytic  
LOC: Supply and demand                      TOP: The American Economy: A Thumbnail Sketch

12. In 2009, about what percentage of goods and services sold in the United States was imported?
- 4%
  - 13%
  - 20%
  - 88%

ANS: B                      PTS: 1                      DIF: Moderate              NAT: Analytic  
LOC: International trade and finance                      TOP: The American Economy: A Thumbnail Sketch

13. Imports from China represent \_\_\_\_ of total U.S. imports.
- less than 20%
  - approximately 40%
  - approximately 60%
  - more than 80%

ANS: A                      PTS: 1                      DIF: Moderate              NAT: Analytic  
LOC: International trade and finance                      TOP: The American Economy: A Thumbnail Sketch

14. Which of the following is the best definition of openness?
- The average of imports expressed as a share of GDP.
  - The average of goods traded in markets expressed as a share of GDP.
  - The average of imports and exports expressed as a share of GDP.
  - The average trade balance expressed as a share of GDP.
  - The average of exports expressed as a share of GDP.

ANS: C                      PTS: 1                      DIF: Moderate              NAT: Analytic  
LOC: The Study of economics, and definitions in economics  
TOP: The American Economy: A Thumbnail Sketch

15. How does the United States compare to other advanced, industrialized economies on the issue of openness?
- It is completely closed.
  - It is one of the less open of them.
  - It is about average in openness.
  - It is one of the more open of them.
  - It is the most open of them.

ANS: B                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: Reading and interpreting graphs                      TOP: The American Economy: A Thumbnail Sketch

16. As of 2009, annual imports to the U.S. were approximately \_\_\_\_ and annual exports from the U.S. were approximately \_\_\_\_.
- a. \$0.6 trillion; \$1.5 trillion
  - b. \$2.0 trillion; \$0.6 trillion
  - c. \$2.0 trillion; \$1.5 trillion
  - d. \$1.5 trillion; \$2.0 trillion
  - e. \$2.0 trillion; \$2.0 trillion

ANS: C                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: International trade and finance                      TOP: The American Economy: A Thumbnail Sketch

17. Which of the following is the most closed economy?
- a. the Netherlands
  - b. the United States
  - c. Germany
  - d. Russia
  - e. Canada

ANS: D                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: Reading and interpreting graphs                      TOP: The American Economy: A Thumbnail Sketch

18. Which of the following is the most open economy?
- a. Germany
  - b. the Netherlands
  - c. the United States
  - d. Japan
  - e. Canada

ANS: B                      PTS: 1                      DIF: Easy                      NAT: Analytic  
LOC: Reading and interpreting graphs                      TOP: The American Economy: A Thumbnail Sketch

19. Which of the following is the most closed economy?.
- a. Germany
  - b. Canada
  - c. Mexico
  - d. the United States

ANS: D                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: Reading and interpreting graphs                      TOP: The American Economy: A Thumbnail Sketch

20. Gross Domestic Product in 2009 was almost five times larger than it was in 1960 but it is important to note that
- a. none of the growth represented more output.
  - b. measurement of output omitted any effect of inflation.
  - c. the population grew substantially over the same time period.
  - d. graphs of output were unable to display such growth.

ANS: C                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

21. According to the data on real U.S. GDP,

- a. economic growth has been irregular, with periodic downturns.
- b. economic growth has been consistent, with few downturns.
- c. economic growth has been extremely rapid, but with major collapses.
- d. economic growth has been elusive, but downturns have been eliminated.

ANS: A                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Reading and interpreting graphs                      TOP: The American Economy: A Thumbnail Sketch

22. Economic progress is best measured by
- a. the growth rate of prices over time.
  - b. the growth rate of GDP per capita
  - c. the amount of time it takes a worker to work to afford certain goods and services.
  - d. the growth rate in the population.

ANS: B                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Productivity and growth                      TOP: The American Economy: A Thumbnail Sketch

23. Along with changes in the level of economic activity, measured by GDP, what other economic variable tends to rise and fall as a consequence?
- a. precipitation
  - b. regulation
  - c. circulation
  - d. unemployment

ANS: D                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: Measuring the Economy                      TOP: The American Economy: A Thumbnail Sketch

24. Why does unemployment tend to change when the level of output changes?
- a. Persons wish to buy things, and if output falls, people need to work less to earn the income to buy the smaller output.
  - b. Labor is an input, and if output falls, employers need fewer workers to make it, so the employment falls.
  - c. When output rises, persons are more interested in buying, and will work more to earn the income to buy things.
  - d. Persons face the option of buying or working, so that when they do more of one, the other necessarily falls.
  - e. When companies replace workers with machines, output rises, and people take time off from work to buy before returning to employment.

ANS: B                      PTS: 1                      DIF: Moderate                      NAT: Analytic  
 LOC: Labor markets                      TOP: The American Economy: A Thumbnail Sketch

25. Per capita GDP can be defined as
- a. GDP per working person.
  - b. GDP per unit of capital.
  - c. GDP per person.
  - d. GDP per unit of unemployment.

ANS: C                      PTS: 1                      DIF: Easy                      NAT: Analytic  
 LOC: The Study of economics, and definitions in economics  
 TOP: The American Economy: A Thumbnail Sketch

26. Economic fluctuations are defined as
- alternating periods of significant GDP growth and decline.
  - events only encountered in developing countries.
  - periods of stable economic growth.
  - alternating periods of unemployment falling above and below zero.

## ESSAY

1. The U.S. economy is the largest in the world. What two factors primarily explain this? What makes the U.S. economy unique?

ANS:

Sheer size of the country, with a population of over 300 million and a labor force of 145 million, contributes to the large production. But this cannot be the only element, or India's GDP would be three times as large. Efficiency is the second factor the U.S. economic system transforms inputs into output in a much more productive fashion. U.S. success is attributable to the free enterprise market system.

What makes the U.S. economy unique is its combination of prosperity and population. While there are several countries that are rich in terms of per capita GDP, they are relatively small because of their small population and geographic size. Other countries have immense populations, but have not achieved economic prosperity in terms of per capita GDP.

PTS: 1                    DIF: Moderate            NAT: Reflective            LOC: Measuring the Economy

2. Differentiate between an open and a closed economy? Do you agree that US economy is more open among the advanced industrial countries in the world?

ANS:

An economy is called relatively open if its exports and imports constitute a large share of its GDP. An economy is considered relatively closed if they constitute a small share.

No. The United States stands out as among the most closed economies of the advanced, industrial nations. We export and import a smaller share of GDP than nearly all advanced industrial nations.

PTS: 1                    DIF: Easy                    NAT: Analytic            LOC: Measuring the Economy

3. What important changes have occurred in the composition of the labor force since 1960? Is the popular image of the American worker as a factory worker accurate? Describe the types of jobs Americans are working in today.

ANS:

The most important change is the increasing participation of women, who composed 30 percent of the labor force in 1960 but now account for almost half. This has led to discussions of wage discrimination against women and questions of parental leave. A second trend is a declining percentage of teenagers in the labor force, after peaking in the early 1970s. Teenagers typically hold entry-level jobs, suggesting why these jobs must be increasingly filled by other segments of the labor force (McDonalds may be hiring the elderly not just for public relations but due to the unavailability of youthful workers).

In 2009, about 68 percent of American workers were employed in service-related industries, whereas only about 14 percent produced goods. Service workers included about 16.5 million in educational and health services, about 17.7 million in business and professional services, and over 15 million in retail trade. Manufacturing companies in the United States employed only 12 million people, and almost a third of those worked in offices rather than in the factory.

PTS: 1                    DIF: Moderate            NAT: Reflective  
LOC: Markets, market failure, and externalities

4. Between 1960 and 2009 U.S. GDP, measured in dollars of constant purchasing power, expanded about 5.0 times. However, the standard of living only increased by 2.7 times over this period. Explain the difference.

ANS:

GDP growth includes the effects of inflation and population growth, meaning there are more labor inputs in the economy. The standard of living is better measured by real GDP per capita. To obtain the standard of living from GDP, one must correct for the effect of population growth.

PTS: 1                    DIF: Moderate            NAT: Analytic            LOC: Measuring the Economy

5. List five major economic activities of government, and give an example of each.

ANS:

1. Government as referee. Example: enforcing contracts, or supervising truth-in-lending laws.
2. Regulating business. Example: anti-trust laws, environmental laws.
3. Expenditures. Example: government pensions, national defense.
4. Taxes. Example: income, sales, property taxes.
5. Government as redistributor. Example: poverty programs, social security.

PTS: 1                    DIF: Easy                    NAT: Analytic            LOC: The role of government

6. Is the image of the typical American worker as a blue-collar worker true? Substantiate your answer with facts.

ANS:

The Homer Simpson image of the typical American worker as a blue-collar worker is really quite misleading. The majority of American workers—like workers in all developed countries—produce services, not goods. In 2009, almost 68 percent of all non-farm workers in the United States were employed by private service industries, whereas only 14 percent produced goods. By contrast, manufacturing companies in the United States employed only 12 million people, and almost a third of those worked in offices rather than in the factory.

PTS: 1                    DIF: Moderate            NAT: Analytic            LOC: Labor markets

7. How does the United States compare to other nations on a per capita scale as far as government production and taxation?

ANS:

Government production as a share of GDP is relatively low compared with other countries. Perhaps more surprising is that U.S. citizens are perhaps the most lightly taxed, at 30 percent of GDP. The cry for "No more taxes" may reflect a concern with government inefficiency, but Americans are mistaken if they believe their tax burden is high compared to other countries.

PTS: 1                    DIF: Moderate            NAT: Reflective            LOC: Productivity and growth

8. It is often asserted that the United States no longer manufactures anything, instead it imports manufactured goods from countries like China. Critically evaluate this claim.

ANS:

If the claim were true then the share of GDP that the U.S. imports would have to be extremely high given the share of goods versus services in the U.S. economy. If we look at the data, only about 13 percent of U.S. GDP is imported and imports from China account for about one fifth of this. That means that over 80 percent of what Americans consume is made in the United States. Therefore this claim is false.

PTS: 1                    DIF: Moderate            NAT: Reflective  
LOC: International trade and finance

9. A nation's citizens often dislike the economy's distribution of income. Explain two methods for creating a more equal distribution of income.

ANS:

One method is to override the market distribution to force a more equal distribution of incomes. A second method, that is used to varying degrees in virtually all of the private-enterprise economies, is to use transfer payments, sums of money that individuals receive from the government without providing any goods or services in return. By taxing wealthier individuals and giving transfer payments to poorer individuals, a more equal distribution of after-tax income may be achieved.

PTS: 1                    DIF: Easy                    NAT: Reflective            LOC: Efficiency and equity

10. What you mean by business cycles? What are their consequences?

ANS:

Business cycles are periodic upswings and downswings in economic growth. One important consequence of these ups and downs in economic growth is that employment varies considerably from one year to the next.

PTS: 1                    DIF: Easy                    NAT: Analytic  
LOC: Markets, market failure, and externalities

11. All industrialized countries have become "service economies" in recent decades. Explain the reasons behind this shift.

ANS:

To a considerable degree, this shift to services reflects the arrival of the "Information Age." Activities related to computers, to research, to the transmission of information by teaching and publication, and other information-related activities are providing many of the new jobs. Technological change has also made it possible to produce more and more manufactured products using fewer and fewer workers. Such labor-saving innovation in manufacturing has allowed a considerable share of the labor force to move out of goods-producing jobs and into services.

12. Define the following terms:

- a. Recession
- b. Mixed economy
- c. Transfer payments
- d. Progressive taxation

ANS:

- a. A recession is a period of time during which the total output of the economy falls.
- b. A mixed economy is one with some public influence over the workings of free markets. There may also be some public ownership mixed in with private property.
- c. Transfer payments are sums of money that certain individuals receive as outright grants from the government rather than as payments for services rendered.
- d. A tax is progressive if the ratio of taxes to income rises as income rises.
