

TEST BANK

(ex•ploring)

A Microsoft Office 2007 application with a focus on the user's learning objectives for the purpose of education.

Microsoft Office

Excel 2007

COMPREHENSIVE
SECOND EDITION

Grauer

Mulberry | Schooren

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

1) Excel has predefined _____ that can be used to produce calculated results. 1) _____
A) macros B) programs C) procedures D) formulas

Answer: D

2) A formula in Excel begins with a(n): 2) _____
A) \$. B) *. C) =. D) /.

Answer: C

3) Arithmetic operations, cell references, and _____ can be used in Excel formulas. 3) _____
A) constants B) programs C) procedures D) macros

Answer: A

4) Using the mouse to select a specific cell is: 4) _____
A) moving. B) accessing. C) pointing. D) sizing.

Answer: C

5) The _____ is found in the bottom right hand corner of an active cell. 5) _____
A) fill handle B) insertion point C) pointer D) sizing handle

Answer: A

6) The fill handle can be used to copy formulas or finish a(n) _____ series. 6) _____
A) date B) cell C) text D) object

Answer: C

7) The types of cell referencing available in Excel are mixed, absolute, and: 7) _____
A) stationery. B) relative. C) pragmatic. D) abstract.

Answer: B

8) To copy a formula across a range of cells and have the formula automatically update the cell row and column, use _____ cell referencing. 8) _____
A) abstract B) mixed C) absolute D) relative

Answer: D

9) To ensure that the reference to a specific cell does not change, use _____ cell referencing. 9) _____
A) abstract B) absolute C) relative D) mixed

Answer: B

10) If you have formula that must always reference Column A but the row needs to adjust as you copy your formula, you want to use a(n) _____ cell reference. 10) _____
A) relative B) absolute C) mixed D) abstract

Answer: C

11) =\$E2+C3-G\$4 is an example of a(n) _____ cell reference. 11) _____
A) absolute B) mixed C) constant D) relative

Answer: B

12) To change a relative cell reference to an absolute cell reference, use the _____ key. 12) _____
A) F7 B) Esc C) Insert D) F4

Answer: D

- 13) If you double-click a cell with a formula, Excel _____ the formula for easy editing. 13) _____
A) bolds B) highlights C) magnifies D) deletes
Answer: B
- 14) _____ are used to make difficult computations easier to calculate. 14) _____
A) Functions B) Features C) Algorithms D) Styles
Answer: A
- 15) To add numeric entries quickly in Excel, use the _____ function. 15) _____
A) SUM B) FINANCIAL C) COUNT D) TEXT
Answer: A
- 16) Functions are based on rules called: 16) _____
A) types. B) syntax. C) algorithms. D) procedures.
Answer: B
- 17) Values used in calculations in functions are: 17) _____
A) formulas. B) arguments. C) macros. D) procedures.
Answer: B
- 18) To easily select predefined functions in Excel, select the: 18) _____
A) Calculations Library. B) Status Link.
C) Function Wizard. D) Formula Bar.
Answer: C
- 19) The _____ dialog box contains a list of predefined functions available in Excel. 19) _____
A) Formula B) Insert Formula C) Syntax D) Insert Function
Answer: D
- 20) If you are not sure of the name of the function you want to use, type a(n) _____ in the 20) _____
Function dialog box and click Go.
A) ? B) keyword C) * D) math formula
Answer: B
- 21) B5:C10 is an example of a cell: 21) _____
A) style. B) location. C) macro. D) range.
Answer: D
- 22) To add a row of cells quickly, click on the _____ located in the Function Library group. 22) _____
A) Table B) Sort C) Undo D) AutoSum
Answer: D
- 23) To easily determine the arithmetic mean of a range of cells, use the _____ function. 23) _____
A) MEAN B) AVERAGE C) LOCATE D) STATISTICS
Answer: B
- 24) To find the smallest number in a range of cells, use the _____ function. 24) _____
A) AVERAGE B) LOW C) MIN D) MAX
Answer: C
- 25) To determine the highest score on a test from among list of student scores, use the _____ 25) _____
function.

A) AutoSum B) MAX C) CALCULATE D) AVERAGE

Answer: B

26) If you need to determine how many cells in a range are NOT blank, use the _____ function. 26) _____

A) COUNT B) MAX C) ANALYZE D) COUNTA

Answer: D

27) To determine the middle number in a range of cells, use the _____ function. 27) _____

A) COUNT B) AVERAGE C) MAX D) MEDIAN

Answer: D

28) To determine the length of time an employee has worked for you, use one of the _____ functions to calculate the difference between the employee's start date and the present date. 28) _____

A) DATE B) ANALYZE C) TODAY D) NOW

Answer: A

29) To display the current date on each page of an Excel worksheet, use the _____ function. 29) _____

A) TODAY B) CURRENT C) SET D) PRESENT

Answer: A

30) The _____ function obtains its time and date from the computer's clock. 30) _____

A) NOW B) ACCESS C) CURRENT D) TODAY

Answer: A

31) The Function _____ feature is a drop-down list of available Excel functions that start with the letters that you enter. 31) _____

A) List B) AutoComplete C) Retrieve D) Find

Answer: B

32) To copy formatting from a cell to a range of cells, use the: 32) _____

A) AutoFormat. B) Format Painter.
C) AutoStyle. D) Copy and Paste commands.

Answer: B

33) To make a decision between two items, use _____ functions to help determine your choice. 33) _____

A) Count B) Statistical C) Logical D) Decision

Answer: C

34) The _____ function returns a result based on a condition. 34) _____

A) IF B) FIND C) MAX D) TODAY

Answer: A

35) A(n) _____ is tested in an IF function to determine if it is true or false. 35) _____

A) condition B) feature C) option D) formula

Answer: A

36) To use text as a condition in an IF function, it must be enclosed in: 36) _____

A) parentheses. B) brackets.
C) quotation marks. D) single quote marks.

Answer: C

37) The _____ function can be used to find an answer located in a vertical table. 37) _____

A) FIND B) VLOOKUP C) HLOOKUP D) SEARCH
Answer: B

38) The VLOOKUP function can return a formula, text, or: 38) _____
A) value. B) range. C) macro. D) constant.
Answer: A

39) The _____ number is the number of the column in the lookup table that contains the return values. 39) _____
A) column index B) random C) lookup value D) lookup table
Answer: A

40) The lowest value for a category in a lookup table that will still produce a corresponding result for a lookup function is the: 40) _____
A) breakpoint. B) final point. C) results point. D) start point.
Answer: A

41) To find information in rows based on values in a table of data, you can use the _____ function. 41) _____
A) FIND B) HLOOKUP C) VLOOKUP D) IF
Answer: B

42) Excel's _____ function can be used to calculate your monthly mortgage payment if purchasing a new home. 42) _____
A) TODAY B) PMT C) MIN D) IF
Answer: B

43) The PMT function has three arguments: the amount of the loan, the interest rate per period, and the: 43) _____
A) square footage of the home you are purchasing.
B) number of periods.
C) payment amount.
D) future value of the loan.
Answer: B

44) When entering the amount of a loan in the PMT function, it should be entered as a(n) _____ number. 44) _____
A) positive B) decimal C) negative D) abstract
Answer: C

45) To find out how much money you would make on an investment of \$1,000.00 with a periodic interest rate of 5%, use the _____ function. 45) _____
A) PV B) FV C) PMT D) IF
Answer: B

46) The name that displays in _____ comes from the name that was registered in the Microsoft Office 2007 software. 46) _____
A) comments B) macros
C) Office Assistants D) file names
Answer: A

47) To display cell formulas, click the _____ + ~ keys. 47) _____

A) END
Answer: C

B) F4

C) CTRL

D) SHFT

48) _____ functions search through data in a table for a match.

A) PMT
Answer: D

B) AVERAGE

C) FV

D) LOOKUP

48) _____

49) Parameters in an IF function can be _____, a value, a formula, or a nested function.

A) syntax
Answer: D

B) arguments

C) wildcards

D) text

49) _____

50) The lowest value in a(n) _____ table is breakpoint.

A) compressed
Answer: C

B) text

C) lookup

D) horizontal

50) _____

TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.

51) Formulas can be used in Excel to perform mathematical calculations.

Answer: True False

51) _____

52) Mathematical precedence is not a consideration when creating Excel formulas.

Answer: True False

52) _____

53) Cell references CANNOT be used in Excel formulas.

Answer: True False

53) _____

54) Formulas in Excel begin with a parenthesis.

Answer: True False

54) _____

55) You can use the mouse to point to a cell to select it as a reference for a formula.

Answer: True False

55) _____

56) The fill handle is used to easily copy formatting from one cell to a range of cell.

Answer: True False

56) _____

57) The fill handle can be used to finish a series of dates.

Answer: True False

57) _____

58) Relative cell referencing in Excel enables you to easily copy formulas from one cell to the next.

Answer: True False

58) _____

59) To make a cell reference absolute, add a % sign to the row and column reference.

Answer: True False

59) _____

60) A mixed cell reference is a combination of absolute and relative cell referencing.

Answer: True False

60) _____

61) Double-clicking a cell with text enables you to edit the information directly in the cell.

Answer: True False

61) _____

62) The order that mathematical operations are performed affect the results of a formula.

Answer: True False

62) _____

- 63) Formulas can be used in Excel to format ranges of cells. 63) _____
Answer: True False
- 64) Arrow keys can be used to point to and select a cell. 64) _____
Answer: True False
- 65) The fill handle can be is used to copy formulas. 65) _____
Answer: True False
- 66) The fill handle is 2-headed pointer that is used to copy formulas from one cell to the next. 66) _____
Answer: True False
- 67) Excel uses relative cell referencing for all formulas. 67) _____
Answer: True False
- 68) The default type of cell referencing used in Excel is absolute cell referencing. 68) _____
Answer: True False
- 69) A mixed cell reference adjusts the reference to the column OR row that you have copied the formula to. 69) _____
Answer: True False
- 70) =\$E1+B\$2 is an example of a relative cell reference. 70) _____
Answer: True False
- 71) The F5 key can be used to cycle through the three types of cell referencing. 71) _____
Answer: True False
- 72) Double clicking a cell that contains a formula in Excel highlights the components of the formula. 72) _____
Answer: True False
- 73) It is better to type specific values into formulas instead of cell references. 73) _____
Answer: True False
- 74) Functions are formulas that have been already been created for ease of use. 74) _____
Answer: True False
- 75) The SUM function adds the values within a range of cells. 75) _____
Answer: True False
- 76) Functions contain arguments which are its rules for creation. 76) _____
Answer: True False
- 77) Arguments in functions are the set of rules that govern how the function operates. 77) _____
Answer: True False
- 78) The Function Wizard can be used to help you locate a function. 78) _____
Answer: True False
- 79) Using a function such as SUM increases the accuracy of a calculation. 79) _____
Answer: True False

- 80) A statistical function is appropriate to use in budget spreadsheets. 80) _____
Answer: True False
- 81) To determine the lowest score on a test from within a range of students, you would use the AVERAGE function. 81) _____
Answer: True False
- 82) If you wanted to find the part in inventory that you had the least quantity of, use the MIN function. 82) _____
Answer: True False
- 83) AVERAGE, MIN and MAX functions are considered logical functions. 83) _____
Answer: True False
- 84) To determine the number of cells that contain a specific criterion, use the COUNTA function. 84) _____
Answer: True False
- 85) If you wanted to find out the most common age range of students in your class, use the MEDIAN function. 85) _____
Answer: True False
- 86) Functions that can be used to help you evaluate data over a period of time are DATE functions. 86) _____
Answer: True False
- 87) The NOW functions displays only the current date. 87) _____
Answer: True False
- 88) The NOW function updates the date and time in a worksheet each time it is opened. 88) _____
Answer: True False
- 89) If you fail to include the parentheses with the TODAY function, you will encounter an error. 89) _____
Answer: True False
- 90) Function AutoComplete can be used to create functions. 90) _____
Answer: True False
- 91) When Format Painter is active, a paint brush replaces the mouse pointer. 91) _____
Answer: True False
- 92) Logical functions help in decision making. 92) _____
Answer: True False
- 93) The IF function requires a condition be met before a value is returned. 93) _____
Answer: True False
- 94) The VLOOKUP function analyzes a value and looks up this value in a horizontal table to return a result. 94) _____
Answer: True False
- 95) To find out the monthly cost to purchase a new car, use the PMT function. 95) _____
Answer: True False

- 96) To determine how much money you would have in your savings account five years from today, you could use the PV function. 96) _____
 Answer: True False
- 97) The breakpoint is the largest numeric value in a LOOKUP table. 97) _____
 Answer: True False
- 98) Absolute references should be used for the lookup table in LOOKUP functions. 98) _____
 Answer: True False
- 99) The number of payments in a PMT function is entered in years. 99) _____
 Answer: True False
- 100) When you point to the fill handle, a crosshair appears. 100) _____
 Answer: True False

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

- 101) A(n) _____ is used to calculate results. 101) _____
 Answer: formula
- 102) Arrows keys can be used to _____ to a cell reference to include it in a formula. 102) _____
 Answer: point
- 103) The _____ is a small black square used to easily duplicate formulas. 103) _____
 Answer: fill handle
- 104) When a formula is copied and the cell references automatically adjust, your formulas contain _____ cell references. 104) _____
 Answer: Relative
- 105) =\$C\$13 is an example of a(n) _____ cell reference. 105) _____
 Answer: Absolute
- 106) =Z\$21 + \$Z42 is an example of a(n) _____ cell reference. 106) _____
 Answer: mixed
- 107) If you created a formula that you did not want the column reference to change when you copied the formula, use a(n) _____ cell reference. 107) _____
 Answer: mixed
- 108) A(n) _____ is a predefined formula. 108) _____
 Answer: function
- 109) To SUM function is used to add a series of _____ values. 109) _____
 Answer: numeric
- 110) _____ are used as input values for functions. 110) _____
 Answer: Syntax
- 111) The AVERAGE function takes cell references separated by commas or a(n) _____ of cells as its argument. 111) _____
 Answer: range

- 112) The MIN, MAX and AVERAGE functions are under the category of _____ function. 112) _____
 Answer: statistical
- 113) If you are using the _____ function, when you make a change to the values in the range of cells that are the argument of the function, Excel will automatically recalculate and display the highest number. 113) _____
 Answer: MAX
- 114) If you wanted to know how many cells are blank, use the _____ function to determine what cells have a value and subtract that total from the total rows of data. 114) _____
 Answer: COUNTA
- 115) The MEDIAN function would return _____ as the midpoint value of =MEDIAN(1, 2, 3, 4, 5, 6, 7, 8, 9). 115) _____
 Answer: 5
- 116) The _____ function uses the computer system's current date for its argument value. 116) _____
 Answer: TODAY
- 117) The NOW function obtains its argument values from the _____. 117) _____
 Answer: computer clock
- 118) The IF function evaluates a(n) _____ and returns a result. 118) _____
 Answer: condition
- 119) The VLOOKUP function utilizes a(n) _____ table. 119) _____
 Answer: vertical
- 120) The PMT function takes as an input, PV, which is the loan's _____. 120) _____
 Answer: present value
- 121) The FV function takes three arguments, the _____, how long you will invest, and how much money you will invest each year. 121) _____
 Answer: interest rate
- 122) Double-clicking a cell that contains a formula will highlight the _____ of the formula for editing. 122) _____
 Answer: components
- 123) The circled item in the image below is the _____ function. 123) _____
-
- Answer: AutoSum
- 124) The Logical category of functions is used to make _____. 124) _____
 Answer: decisions
- 125) The _____ category of functions is used to analyze labels. 125) _____
 Answer: Text

126) Match the following five functions to their purpose:

- I. COUNT A. used to calculate arithmetic means
- II. COUNTA B. used to determine the highest value in a range of cells
- III. AVERAGE C. used to determine the number of cells with numbers
- IV. MAX D. used to determine monthly cost of loan
- V. PMT E. used to determine the number of cells that are not blank

Answer: C, E, A, B, D

126) _____

127) Match the following five terms to their examples or definitions:

- I. absolute cell reference A. =\$E\$1+\$C\$2
- II. mixed cell reference B. rules that apply to functions
- III. relative cell reference C. =E1+C2
- IV. argument D. inputs for functions
- V. syntax E. =\$E1+C\$2

Answer: A, E, C, D, B

127) _____

128) Match the following five terms to their meanings:

- I. pointing A. copy formulas
- II. fill handle B. copy format
- III. function C. select cells with mouse
- IV. formula D. predefined formulas
- V. format painter E. math expressions

Answer: C, A, D, E, B

128) _____

129) Match the following five purposes to their function:

- I. IF A. match value in table column
- II. VLOOKUP B. display current day and time
- III. HLOOKUP C. match value in table row
- IV. FV D. evaluates condition
- V. NOW E. predict future amount

Answer: B, E, C, A, D

129) _____

130) Match the following function to its category:

- I. HLOOKUP A. 1
- II. TODAY B. 2
- III. IF C. 3
- IV. PMT D. 4
- V. SUM E. 5

Answer: D, C, B, A, E

130) _____

- 1) D
- 2) C
- 3) A
- 4) C
- 5) A
- 6) C
- 7) B
- 8) D
- 9) B
- 10) C
- 11) B
- 12) D
- 13) B
- 14) A
- 15) A
- 16) B
- 17) B
- 18) C
- 19) D
- 20) B
- 21) D
- 22) D
- 23) B
- 24) C
- 25) B
- 26) D
- 27) D
- 28) A
- 29) A
- 30) A
- 31) B
- 32) B
- 33) C
- 34) A
- 35) A
- 36) C
