[Question]

162. Explain debits and credits and their role in the accounting system.

Answer: Debit refers to the left side of an account and credit refers to the right side of an account, both are part of the double-entry accounting system. This system is based on the concept that all transactions and events affect at least two accounts. The double entry system is organized around the accounting equation which states that  $\text{assets} = \text{liabilities} + \text{equity}$ . Assets, expenses and dividends have normal debit balances and liabilities, common stock and revenues have normal credit balances

164. Explain the recording and posting processes.

Answer: Information from business transactions and events is recorded in the journal in the form of journal entries. The journal entries include the date, the account titles and debit and credit amounts. Journal entries may also include a further description of the transaction. During the posting process the debit and credit amounts recorded in the journal are transferred to the individual accounts in the ledger.

[Question]

165. What is a trial balance? What is its purpose?

Answer: The trial balance is a list of all of the accounts in the ledger with balances at a point in time. The list is organized by debit and credit balances. The purpose of the trial balance is to summarize the account totals and to verify the accuracy of the total debits and credits. If the total debits and credits are not equal, then the trial balance is out of balance which indicates an error in the accounting records. However, even if debits do equal credits this is no guarantee that no errors were made in recording and posting transactions.

[Question]

181. Josephine's Bakery had the following assets and liabilities at the beginning and end of the current year:

	Assets	Liabilities
Beginning of the year	\$114,000	\$68,000
End of the year	135,000	73,000

If the owners made no investments in the business and no dividends were paid during the year, what was the amount of net income earned by Josephine's Bakery during the current year?

Answer:

Beginning owner's equity = \$114,000 - \$68,000 = \$46,000

Ending owner's equity = \$135,000 - \$73,000 = \$62,000

Increase in owner's equity = \$62,000 - \$46,000 = \$16,000

Since there were no investments or dividends during the year, the net income is \$16,000.

[Question]

196. The following trial balance was prepared from the general ledger of Hal's Auto Repair.

HAL'S AUTO REPAIR Trial Balance October 31		
	<u>Debit</u>	<u>Credit</u>
Cash	\$ 975	
Accounts receivable	3,800	
Supplies	500	
Repair equipment	13,000	
Office equipment	6,600	
Accounts payable		\$ 4,510
Common stock		10,000
Retained earnings		13,000
Dividends	4,200	
Repair fees earned		10,875
Supplies expense	<u>8,600</u>	
Totals	<u>\$37,675</u>	<u>\$38,385</u>

Since the trial balance did not balance, you decided to examine the accounting records. You found that the following errors had been made:

1. A purchase of supplies on account for \$245 was posted as a debit to Supplies and as a debit to Accounts Payable.
2. An investment of \$500 cash by the owner was debited to Common Stock and credited to Cash.
3. In computing the balance of the Accounts Receivable account, a debit of \$600 was omitted from the computation.
4. One debit of \$300 to the Dividends account was posted as a credit.
5. Office equipment purchased for \$800 was posted to the Repair Equipment account.
6. One entire entry was not posted to the general ledger. The transaction involved the receipt of \$125 cash at the time repair services were performed.

Prepare a corrected trial balance for the Hal's Auto Repair as of October 31.

Answer:

HAL'S AUTO REPAIR Trial Balance October 31		
	<u>Debit</u>	<u>Credit</u>
Cash <sup>a</sup>	\$ 2,100	
Accounts receivable <sup>b</sup>	4,400	
Supplies	500	
Repair equipment <sup>c</sup>	12,200	
Office equipment <sup>d</sup>	7,400	
Accounts payable <sup>e</sup>		\$ 5,000
Common stock <sup>f</sup>		11,000
Retained earnings		13,000
Dividends <sup>g</sup>	4,800	
Repair fees earned <sup>h</sup>		11,000
Supplies expense	<u>8,600</u>	
Totals	<u>\$40,000</u>	<u>\$40,000</u>

- a. Cash: Balance \$975 + \$1,000 (2) + 125 (6) = \$2,100  
 b. Accounts Receivable: Bal. \$3,800 + 600 (3) = \$4,400  
 c. Repair Equipment: Bal. \$13,000 - 800 (5) = \$12,200  
 d. Office Equipment: Bal. \$6,600 + 800 (5) = \$7,400  
 e. Accounts Payable: Bal \$4,510 + 490 (1) = \$5,000  
 f. Common Stock = Bal. \$10,000 + 1,000 (2) = \$11,000  
 g. Dividends: Bal. \$4,200 + 600 (4) = \$4,800  
 h. Repair fees earned: Bal \$10,875 + 125 (6) = \$11,000
