

### Chapter 2 A Review of the Accounting Cycle

#### **MULTIPLE CHOICE**

- 1. In an accrual accounting system
  - a. all accounts have normal debit balances.
  - b. a debit entry is recorded on the left-hand side of an account.
  - c. liabilities, owner's capital, and dividends all have normal credit balances.
- d. revenues are recorded only when cash is received.
- ANS: B PTS: 1 DIF: Easy OBJ: LO 2
- TOP: AICPA FN-Measurement MSC: AACSB Analytic
  - 2. A common business transaction that would *not* affect the amount of owners' equity is
    - a. signing a note payable to purchase equipment.
    - b. payment of property taxes.
    - c. billing of customers for services rendered.
    - d. payment of dividends.
- ANS: A PTS: 1 DIF: Medium OBJ: LO 2
- TOP: AICPA FN-Measurement MSC: AACSB Analytic
  - 3. Failure to record the expired amount of prepaid rent expense would not
    - a. understate expense.
    - b. overstate net income.
    - c. overstate owners' equity.
    - d. understate liabilities.

ANS: D PTS: 1 DIF: Medium OBJ: LO 3

#### TOP: AICPA FN-Measurement MSC: AACSB Analytic

- 4. On June 30, a company paid \$3,600 for insurance premiums for the current year and debited the amount to Prepaid Insurance. At December 31, the bookkeeper forgot to record the amount expired. The omission has the following effect on the financial statements prepared December 31:
  - a. overstates owners' equity.
  - b. overstates assets.
  - c. understates net income.
  - d. both (a) and (b).

#### ANS: D PTS: 1 DIF: Medium OBJ: LO 3

43. Bannister Inc.'s fiscal year ended on November 30, 2008. The accounts had not been adjusted for the fiscal year ending November 30, 2008. The balance in the prepaid insurance account as of November 30, 2008, was \$35,200 (before adjustment at Nov. 30, 2008) and consisted of the following policies:

Policy	Date of	Date of	Balance in
<u>Number</u>	<b>Purchase</b>	<b>Expiration</b>	Account
279248	7/1/2008	6/30/2009	\$14,400
694421	12/1/2006	11/30/2008	9,600
800616	4/1/2007	3/31/2009	11,200
			\$35,200

The adjusting entry required on November 30, 2008, would be

a.	Insurance	Expense	24,000	
	Prepaid	Insurance		24,000
b.	Insurance	Expense	9,600	
	Prepaid	Insurance		9,600
c.	Insurance	Expense	11,200	
	Prepaid	Insurance		11,200
d.	Insurance	Expense	16,400	
	Prepaid	Insurance		16,400

#### ANS: A

#279248:

\$14,400 balance represents twelve months of coverage left since no adjustment has been made at Nov. 30, 2008. 14,400/12 = 1,200/12 month. Policy was purchased on 7/1/08, so five months have expired, or  $1,200 \times 5$  mos. = \$6,000 that should be expensed for year ending 11/30/2008.

#### #694421:

The entire balance of **\$9,600** should be expensed for the year ending **11/30,2008** since the policy expired on Nov. 30, 2008, and the \$9,600 balance represents the final year of prepaid insurance remaining to be expensed, assuming again that no adjustments have been made at Nov. 30, 2008, for the year then ended.

#### #800616:

The balance of \$11,200 represents 16 months of coverage left at the **beginning** of fiscal year 2008. \$11,200/16 = \$700. 12 months of prepaid insurance should be expensed for the fiscal year ending 11/30/2008. 12 months x \$700 = \$8,400 to be expensed for the year ending 11/30/2008.

Total amount to be expensed at 11/30/2008:

#279248	\$ 6,000
#694421	\$ 9,600
#800616	<u>\$ 8,400</u>
Total	<u>\$24,000</u>

4. The following account balances pertain to the Henryville Manufacturing Co. at September 30, 2008 (before adjusting entries).

	<u>Debit</u>	Credit
Accounts Receivable	\$ 40,000	
Allowance for Doubtful Accounts		\$ 2,500
Inventory	99 <b>,</b> 700	
Prepaid Insurance	2,400	
Equipment	300,000	
Accumulated Depreciation		125,000
Notes Payable		48,000
Unearned Revenue		72,000

Additional information:

- (a) The controller and the credit manager agreed that, based on an aging of year-end accounts receivable, the allowance for doubtful accounts should be increased to \$4,300.
- (b) The credit manager determined that a customer account with a balance of \$850 was uncollectible (without regard to the information in (a) above).
- (c) The \$48,000 note payable is dated August 13, 2008, and bears interest at 12 percent per annum. The note and interest are payable at maturity on November 13, 2008. (Assume a 365-day year and round to the nearest dollar.)
- (d) The prepaid insurance balance arose from the payment of an annual premium on January 1, 2008.
- (e) The company maintains a perpetual inventory system. The inventory at September 30, 2008, was \$102,600 as determined by physical count.
- (f) The equipment is being depreciated over a 20-year estimated useful life.
- (g) The unearned revenue represents an amount received for a long-term equipment rental to the Northcrest Tool & Die Co. The cash (\$72,000) was received on April 26, 2008, and represents prepayment of a 1-year rental beginning May 1, 2008.

Prepare adjusting entries to Henryville Co.'s accounts at September 30, 2008. Each entry should be made in general journal format. Identify each entry by using the letter of the paragraph containing the additional information for the entry.

  - -- June 15, 2008, paid an annual casualty insurance premium of \$5,400 for a policy beginning July 1, 2008.
  - -- October 1, 2008, received advance payment of \$6,930 from a customer for a 9-month equipment rental.

Provide the appropriate journal entries to record the preceding transactions. Adjust the accounts at year-end assuming that no entries have been made between the transaction date and year-end and assuming that:

- (1) transactions were originally recorded in asset and liability accounts.
- (2) transactions were originally recorded in revenue and expense accounts.

## 48 Chapter 2/A Review of the Accounting Cycle

7. For each of the journal entries below, write a description of the underlying event. Assume that for prepaid expenses original debits are made to an expense account.

(a)	Allowance for Doubtful Accounts	XXX	
	Accounts Receivable		XXX
(b)	Interest Expense	XXX	
	Notes Payable	XXX	
	Cash		XXX
(c)	Cash	XXX	
	Unearned Revenue		XXX
(d)	Supplies on Hand	XXX	
	Supplies Expense		XXX
(e)	Cash	XXX	
	Accounts Receivable		XXX

#### ANS:

- (a) Write-off of an uncollectible account.
- (b) Cash payment on a note payable. Part of the payment is for principal and part is for interest.
- (c) Received cash in advance for products or services not yet delivered.
- (d) Adjusting entry to record supplies on hand.
- (e) Received customer payment on account.

PTS: 1 DIF: Easy OBJ: LO 2 TOP: AICPA FN-Measurement MSC: AACSB Analytic

8. The following data are from a comparison of the balance sheets of Brassie Company as of December 31, 2008, and December 31, 2007:

Accounts Receivable Inventory Accounts Payable (all accounts payable relate to inventory purchases)	increase decrease increase	\$7,600 4,500 2,400
Prepaid Insurance	decrease	1,350
Wages Payable	decrease	670

The following data are from Brassie's 2008 income statement:

Sales	\$200 <b>,</b> 000
Cost of Goods Sold	110,000
Insurance Expense	25,000
Wages Expense	40,000

During 2008:

- (a) How much cash was collected from customers?
- (b) How much cash was paid for inventory purchases?
- (c) How much cash was paid for insurance?
- (d) How much cash was paid for wages?

ANS:

- (a) \$200,000 \$7,600 = \$192,400
- (b) \$110,000 \$4,500 \$2,400 = \$103,100
- (c) \$25,000 \$1,350 = \$23,650
- (d) \$40,000 + \$670 = \$40,670

#### 50 $\Box$ Chapter 2/A Review of the Accounting Cycle

#### 10. The trial balance and transaction descriptions below are for Coachman Company:

#### Coachman Company Trial Balance February 1, 2008

	Debit	Credit
Cash	\$ 250	
Accounts Receivable	320	
Inventory	495	
Equipment	1,200	
Accumulated Depreciation		\$ 245
Accounts Payable		185
Mortgage Payable		900
Common Stock		300
Retained Earnings		635
	\$2,265	<u>\$2,265</u>

Summary transactions for February:

- (a) Collected \$100 on open account
- (b) Purchased \$130 inventory for \$20 cash and the remainder on open account.
- (c) Bought new equipment costing \$200 for \$50 cash, with the remainder due on a mortgage payable.
- (d) Paid \$85 on open account.
- (e) Recorded depreciation expense of \$35.
- (f) Sold goods costing \$90 for \$30 cash and \$120 on open account.

What is Coachman's total equity at the end of February?

ANS:

	Retained	Earnings	
		Begin	635
(e)	35		
(f)	90	(f)	150
			660
			660

Total equity = Retained Earnings \$660 + Common Stock \$300 = \$960.

PTS: 1 DIF: Medium OBJ: LO 2 TOP: AICPA FN-Measurement MSC: AACSB Analytic

## 11. Account balances taken from the ledger of Middler Company on December 31, 2008, are as follows:

Accounts Payable	\$119,000
Accounts Receivable	139,200
Advertising Expense	12,000
Accumulated DepreciationBuildings	31,500
Allowance for Doubtful Accounts	2,550
Buildings	315,000
Capital Stock, \$10 par	450,000
Cash	45,750
Dividends	12,000
Freight-In	10,500
Insurance Expense	2,100
Interest Expense	5,295
Interest Revenue	1,335
Inventory, December 31, 2007	104,850
Land	78,000
Long-Term Investments	12,150
Mortgage Payable	43,500
Notes PayableShort-Term	24,000
Office Expense	28,800
Purchases	521,130
Purchase Discounts	12,150
Retained Earnings, December 31, 2007	13,695
Sales	745 <b>,</b> 000
Sales Discounts	24,750
Sales Returns	14,400
Selling Expense	94,050
Supplies Expense	3,450
Real Estate and Payroll Taxes	19,305

Adjustments on December 31, 2008, are required as follows:

- (a) The inventory on hand is \$135,915.
- (b) The allowance for doubtful accounts is to be increased to a balance of \$6,250.
- (c) Buildings are depreciated at the rate of 5 percent per year.
- (d) Accrued selling expenses are \$6,075.
- (e) There are supplies of \$1,050 on hand.
- (f) Prepaid insurance at December 31, 2008, totals \$1,290.
- (g) Accrued interest on long-term investments is \$360.
- (h) Accrued real estate and payroll taxes are \$1,170.
- (i) Accrued interest on the mortgage is \$240.
- (j) Income tax is estimated to be 30 percent of the income before income tax (round to nearest dollar).
- (1) Prepare an eight-column work sheet.
- (2) Prepare adjusting and closing entries.

Administrative Salaries Expense	52,000	
Office Expense	4,000	
<u>\$0</u>	603,440	\$603 <b>,</b> 440

(1) Prepare adjusting journal entries for the following items:

- (a) Adjust the Allowance for Doubtful Accounts to 8 percent of the accounts receivable.
- (b) Furniture and equipment is depreciated at 20 percent per year.
- (c) Insurance expired during the year, \$2,040.
- (d) Interest accrued on notes payable, \$2,688.
- (e) Sales salaries earned but not paid, \$1,920.
- (f) Advertising paid in advance, \$560.
- (g) Office supplies on hand, \$1,200, charged to Office Expense when purchased.
- (2) Prepare closing entries for Cassini after the above adjusting entries have been made. Additional information shows the inventory on December 31 was \$64,000.

- 13. The following ten items are independent of each other. For each item, indicate the amount of any cash flow that occurs or state that no cash flow resulted from the item.
  - 1. Prepaid rent decreased \$20,000 during the year. Rent expense recognized for the year amounted to \$30,000.
  - 2. Patent amortization recognized amounted to \$30,000.
  - 3. Net income was \$100,000; retained earnings increased \$60,000; and dividends payable decreased \$20,000.
  - 4. Wages payable decreased \$12,000 and wages expense for the year amounted to \$48,000.
  - 5. The balance in accounts receivable at the beginning of the year was \$600,000, and at the end of the year was \$175,000. Sales for the year were \$1,000,000. The balance of the allowance for doubtful accounts was \$20,000 at the beginning of the year and \$35,000 at the end of the year. Bad debt expense for the year was \$40,000.
  - 6. Sales on account for the year are \$1,000 and the balance in accounts receivable increased \$200 during the year. All sales are on account.
  - 7. Sale at a gain of \$500 of a plant asset costing \$4,000 with \$2,500 of accumulated depreciation.
  - 8. The balance in accumulated depreciation increased \$10,000 for the year. No disposals of plant assets occurred during the year.
  - 9. At the beginning of the fiscal year, merchandise inventory amounted to \$30,000. A physical count at year-end showed \$37,000 worth of inventory on hand. The balance of accounts payable at the beginning of the fiscal year was \$26,000 and at the end of the fiscal year was \$30,000. Cost of goods sold for the fiscal year was \$42,000. The company uses a perpetual inventory system.
  - 10. The retained earnings account decreased \$10,000. Net income for the fiscal year was \$15,000. Dividends payable decreased \$10,000.

		THOMSON
		SOUTH-WESTERN Chapter 2/A Review of the Accounting Cycle 57
ANS:		
	1.	Of the total rent expense, \$20,000 represented the expiration of prepaid rent paid for an earlier period while \$10,000 of rent was actually paid in cash during the current period.
	2.	No cash flow is associated with depreciation or amortization; these are noncash expenses.
	3.	Dividends declared equals \$100,000 - \$60,000 = \$40,000. Dividends payable decreased \$20,000 such that \$60,000 of dividends were paid.
	4.	Wages expense for the year was \$48,000 and wages payable decreased by \$12,000, which means that wages paid must have been \$60,000.
	5.	Begin with the allowance account and determine the amount of the accounts written off ( $20,000 + 40,000 - 35,000 = 25,000$ ). Go to the accounts receivable account and calculate the amount of cash collected on receivables ( $600,000 + 1,000,000 - 25,000 - 175,000 = 1,400,000$ ).
	6.	Sales exceeded cash collections by \$200 since accounts receivable increased resulting in cash flows of \$800.
	7.	Book value of the plant asset costing \$4,000 with \$2,500 accumulated depreciation is \$1,500. A gain of \$500 results from a selling price of \$1,500 book value + \$500 gain, or \$2,000, the amount of the cash flow in the transaction.
	8.	Depreciation expense for the year was \$10,000. There was no cash flow since depreciation is a noncash expense.
	9.	Cash payments to supplies equal \$45,000. This amount is determined by subtracting from cost of goods sold of \$42,000 the \$4,000 increase in accounts payable and adding the \$7,000 increase in inventory.
	10.	Dividends declared equals $15,000 + 10,000 = 25,000$ . Dividends payable decreased $10,000$ such that dividends paid equals $35,000$ .

#### 58 Chapter 2/A Review of the Accounting Cycle

#### 14. The following information is available for the Central Company:

#### Central Company Balance Sheet December 31, xxxx

ASSETS		
	Current Year	Prior Year
Cash	\$125,000	\$100,000
Accounts Receivable	515,000	500,000
Allowance for Doubtful		
Accounts	(70,150)	(60,000)
Inventory	660,000	500,000
Prepaid Expenses	80,000	72,000
Equipment	892,000	900,000
Less: Accumulated Depreciation	(460,000)	(452,500)
LIABILITIES		
Accounts Payable	430,000	370,000
Accrued Expenses	250,000	230,000
Income Tax Payable	58,000	50,000

#### Central Company Income Statement For Year Ending December 31, xxxx

Sales (all sales are on credit)	\$780,000
Cost of Goods Sold	450,000
Gross Profit	\$330,000
Operating Expenses:	
Bad Debt Expense	25,150
Depreciation Expense	11,500
Other Operating Expenses	160,000
Loss on Sale of Equipment	1,500
Income Tax Expense	43,000

Determine the amount of cash flow associated with each of the following items:

- 1. Cash receipts from customers.
- 2. Cash payments to suppliers.
- 3. Cash payments for other operating expenses.
- 4. Cash received from sale of equipment (no equipment purchases were made during the year and only one sale of equipment occurred during the years).
- 5. Cash paid for income taxes.

#### ANS:

- Cash flows from sales to customers for the fiscal year equals the amount of cash collected on accounts receivable. The change in accounts receivable cannot be determined without considering the change in the allowance account. The allowance account had a beginning balance of \$60,000, bad debt expense for the year was \$25,150, and the ending balance of the allowance was \$70,150. The amount of accounts written off against the allowance for the year is \$60,000 + \$25,150 \$70,150 = \$15,000. The change in accounts receivable is determined by taking the beginning balance of receivables, adding credit sales, subtracting the amount of accounts written off, and subtracting the ending balance of accounts receivable. This computation is \$500,000 + \$780,000 \$15,000 = \$750,000, the amount of cash collected from customers.
- Cash payments to suppliers equals purchases minus increase in accounts payable.Purchases for the period equals cost of goods sold plus increase in inventory, or \$450,000 + (\$660,000 \$500,000) = \$610,000. Change in accounts payable equals \$430,000 \$370,000 = \$60,000. Purchases minus increase in accounts payable equals \$610,000 \$60,000 = \$550,000, the total cash payments to suppliers.
- 3. Cash payments for other operating expenses equals accrual basis operating expenses plus the increase in prepaid expenses minus the increase in accrued expenses, or \$160,000 + (\$80,000 \$72,000) (\$250,000 \$230,000) = \$148,000.
- 4. Cash received from the sale of equipment equals the original cost of the equipment sold minus the accumulated depreciation on the equipment sold plus the loss on the sale of the equipment. Since no equipment purchases were made during the year, the cost of the equipment sold is \$892,000 \$900,000 = \$8,000. Depreciation on the equipment sold equals the beginning balance of accumulated depreciation plus the depreciation expense during the period minus the ending balance of accumulated depreciation (\$452,500 + \$11,500 \$460,000 = \$4,000). The loss is given as \$1,500. As a result, \$8,000 \$4,000 (1,500) = \$2,500, the amount of the cash proceeds.
- 5. Cash paid for income taxes equals income tax expense minus the increase in income tax payable, or \$43,000 \$8,000 = \$35,000.

#### 60 🗌 Chapter 2/A Review of the Accounting Cycle

15. *Statement of Financial Accounting Concepts No. 1* states that one of the objectives of financial reporting is to help "current and potential investors and creditors (and other users) in assessing the amounts, timing, and uncertainty of future cash flows such as dividends or interest payments." Generally Accepted Accounting Principles (GAAP) require the use of the accrual basis of accounting.

Explain the difference between the accrual basis and the cash basis of accounting and why GAAP requires the accrual basis.

ANS:

Statement of Financial Accounting Concepts No. 1 assumes that investors and creditors are interested in cash-flow information when evaluating investment opportunities. Accrual information helps investors estimate future net cash flows and the risks associated with these flows. The accrual basis is required under Generally Accepted Accounting Principles (GAAP).

Accrual basis accounting requires that an event that alters the economic status of a firm as represented in the firm's financial statements be recognized in the period in which the event occurs rather than when cash is exchanged. The accrual basis focuses on transactions and related events with cash consequences. Under the accrual basis, revenues are recorded when they are earned and expenses when they are incurred. Recognition of expenses or revenues in the accounting records under the accrual basis often occurs before or after the payment or receipt of cash.

The earnings figure resulting from application of the accrual basis reflects changes in financial position rather than immediate cash consequences. Accrual basis earnings more fully reflect the resource changes affecting the firm's net assets for a period than does the cash basis. Financial statement users find earnings information valuable because profits determine the long-run success of a company. Accrual measures, including financial statement ratios, have been found by researchers to be more accurate predictors of business failure. Companies with poor operating cash flows can survive for extended periods of time if creditors are willing to renegotiate and restructure debt. Companies that are growing rapidly may have negative cash flows because these companies may need to invest heavily in capital expenditures.

Adjusting journal entries are required under the accrual basis to ensure that revenues are recorded when earned and expenses are recorded when incurred. For example, an adjusting journal entry records interest expense before cash is paid since the passage of time results in the obligation to ultimately pay interest.

A cash basis accounting system reports only the receipt and disbursement of cash. Cash basis accounting requires few, if any adjusting entries. Cash information is far from useless, however.

In the short run, cash flow information is most important since it indicates whether a borrower will produce sufficient cash to pay its liabilities. Creditors are interested in a company's past and future ability to generate positive cash flows.

Research has found that cash flow information increases the overall information content of financial statements. Cash flow information also has been shown to supply risk assessment information beyond that provided by accrual basis earnings information. For example, a company with a strong working capital position but with large amounts of inventories, prepaid expenses, and receivables might be in a weak cash position.

The increasing complexity of financial accounting principles and the increasing complexity of financial statements as a result of applying these principles has increased the demand by financial statement users for cash flow information. Under current accrual basis accounting principles, managers also have flexibility to choose among several reporting choices thus allowing the manipulation of earnings under current GAAP.

The prevailing view currently is that neither cash flow nor accrual basis information alone is sufficient for a complete understanding of a company's performance. The relationships between revenues and cash inflows and between expenses and cash outflows can be understood only by studying both types of information.
