Chapter 2—Economic Activities: Producing and Trading

MULTIPLE CHOICE

1. Points outside (or beyond) the PPF are
 - a. attainable.
 - b. unattainable.
 - c. efficient.
 - d. inefficient.

ANS: B PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

2. Which of the following statements is true?
 - a. In a world of efficiently used scarce resources, more of one good necessarily means less of some other good.
 - b. The law of increasing opportunity costs assumes that all people have the same ability to produce goods.
 - c. Efficiency implies that it is impossible to get more of one good without getting less of another.
 - d. Even if a country has unemployed resources, it can still be operating on its production possibilities frontier (PPF).
 - e. a and c

ANS: E PTS: 1 DIF: Difficult NAT: Analytic
LOC: Efficiency and equity

3. Through war, many of the factories in country 1 are destroyed and many of its people are killed. As a result, the country's
 - a. production possibilities frontier (PPF) after the war is probably farther away from the origin than its PPF before the war.
 - b. PPF after the war is probably closer to the origin than its PPF before the war.
 - c. PPF after the war is probably the same PPF as before the war.
 - d. ability to produce goods and services has increased.
 - e. b and d

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

4. The economy moves from point A, where it produces 100X and 200Y, to point B, where it produces 200X and 150Y. It follows that
 - a. point A is an inefficient point.
 - b. point A may be an inefficient point.
 - c. point A may be an efficient point.
 - d. point B is an efficient point.
 - e. b and c

ANS: E PTS: 1 DIF: Difficult NAT: Analytic
LOC: Efficiency and equity

5. Both country 1 and country 2 are located on their respective production possibilities frontiers (PPFs), but country 1 produces twice the output that country 2 produces. It follows that
 - a. country 1's PPF lies further to the right than country 2's PPF.
 - b. country 1 has a smaller population than country 2.

- c. country 1 has a bigger population than country 2.
- d. country 1 is efficient and country 2 is inefficient.
- e. none of the above

ANS: A PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

6. When Claudia trades \$100 for good X, economists assume that she is
- a. trading something of less value to her for something of more value to her.
 - b. trading something of more value to her for something of less value to her.
 - c. trading something that gives her less utility for something that gives her more utility.
 - d. a and c
 - e. none of the above

ANS: D PTS: 1 DIF: Easy NAT: Analytic
 LOC: Gains from trade, specialization and trade

7. Before an exchange is made, a person is said to be in the
- a. *ex ante* position
 - b. *ex post* position
 - c. *ceteris paribus* position
 - d. current position
 - e. *ex calibre* position

ANS: A PTS: 1 DIF: Easy NAT: Analytic
 LOC: Gains from trade, specialization and trade

8. The _____ refer(s) to how much of one thing is traded for how much of something else.
- a. exchange process
 - b. terms of trade
 - c. duality prices
 - d. transaction costs
 - e. comparative advantage

ANS: B PTS: 1 DIF: Easy NAT: Analytic
 LOC: Gains from trade, specialization and trade

9. The terms of trade moved in the buyer's favor. It follows that the price _____ by the buyer fell and the price _____ by the seller _____.
- a. paid, received; increased
 - b. paid, received; decreased
 - c. received, paid; decreased
 - d. paid, received; stayed the same
 - e. none of the above

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Gains from trade, specialization and trade

10. Transaction costs are
- a. the costs associated with the time and effort needed to search out, negotiate, and consummate an exchange.
 - b. the costs a consumer pays in the *ex ante* position.
 - c. the costs a seller pays in the *ex post* position.
 - d. identical to the terms of exchange.
 - e. always higher for buyers than sellers.

ANS: A PTS: 1 DIF: Easy NAT: Analytic
LOC: Gains from trade, specialization and trade

11. Which of the following purchases is likely to have the highest transaction costs?
- a loaf of bread at the grocery store
 - the 100 shares of stock online
 - a book from an online bookseller
 - a house
 - a book from the university bookstore

ANS: D PTS: 1 DIF: Easy NAT: Analytic
LOC: Gains from trade, specialization and trade

12. If Carl and Jacob are not currently trading \$30 for a book, it may be because
- transaction costs are too high.
 - transaction costs are too low.
 - at least one of the two individuals does not think he would be made better off by the trade.
 - both individuals think they will be made worse off by the trade.
 - a, c, and d

ANS: E PTS: 1 DIF: Moderate NAT: Analytic
LOC: Gains from trade, specialization and trade NOT: NEW

13. If there is always a three-for-one tradeoff between goods X and Y, then the PPF between X and Y is
- a downward-sloping curve that is bowed outward.
 - a downward-sloping curve that is bowed inward.
 - a downward-sloping straight line.
 - an upward-sloping straight line.

ANS: C PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost NOT: NEW

14. Points inside (or below) the PPF are
- unattainable.
 - attainable and efficient.
 - attainable but inefficient.
 - attainable and neither efficient nor inefficient.

ANS: C PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

15. If the tradeoff between goods X and Y increases as more of good X is produced, the PPF between the two goods is
- a downward-sloping straight line.
 - circular.
 - an upward-sloping curve
 - a downward-sloping curve that is bowed outward.

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

16. Consider the following combinations of guns and butter that can be produced: 0 guns, 20,000 units of butter; 5,000 guns, 15,000 units of butter; 10,000 guns, 10,000 units of butter; 15,000 guns, 5,000 units of butter; 20,000 guns, 0 units of butter. The PPF between guns and butter is
- a downward-sloping bowed-out curve.

- b. a downward-sloping straight line.
- c. an upward-sloping straight line.
- d. It is impossible to answer this question without knowing which good would be plotted on the vertical axis.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

17. Which of the following statements is true?
- a. The concept of opportunity costs cannot be illustrated within a PPF framework.
 - b. If scarcity did not exist, neither would a PPF.
 - c. All PPFs are downward-sloping straight lines.
 - d. There are more attainable points than unattainable points in every PPF diagram.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

18. A PPF can
- a. shift outward but not inward.
 - b. shift inward but not outward.
 - c. shift inward or outward.
 - d. shift neither inward nor outward.

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

19. Consider two points on the PPF: point A, at which there are 10 apples and 20 pears, and point B, at which there are 7 apples and 21 pears. If the economy is currently at point A, the opportunity cost of moving to point B is
- a. 1 pear.
 - b. 7 apples.
 - c. 3 apples.
 - d. 21 pears.

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

20. Consider two points on the PPF: point A, at which there are 50 oranges and 100 apricots, and point B, at which there are 51 oranges and 98 apricots. If the economy is currently at point B, the opportunity cost of moving to point A is
- a. 2 apricots.
 - b. 1 orange.
 - c. 98 apricots.
 - d. 3 oranges.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

21. The point where the PPF intersects the vertical axis is
- a. unattainable.
 - b. attainable and efficient.
 - c. attainable but inefficient.
 - d. attainable and neither efficient nor inefficient.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Efficiency and equity

22. The point where the PPF intersects the horizontal axis is
- unattainable.
 - attainable and efficient.
 - attainable but inefficient.
 - attainable and neither efficient nor inefficient.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Efficiency and equity

23. Consider two straight-line PPFs. They have the same vertical intercept, but curve I is flatter than curve II. The opportunity cost of producing the good on the horizontal axis
- is greater along curve I.
 - is greater along curve II.
 - is the same along both curves.
 - cannot be compared for the two curves without more information.

ANS: B PTS: 1 DIF: Difficult NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

24. Consider two straight-line PPFs. They have the same vertical intercept, but curve I is flatter than curve II. The opportunity cost of producing the good on the vertical axis
- is greater along curve I.
 - is greater along curve II.
 - is the same along both curves.
 - cannot be compared for the two curves without more information.

ANS: A PTS: 1 DIF: Difficult NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

25. Suppose the economy goes from a point on its unchanging PPF to a point down and to the left of it. This could be due to
- a gain of resources.
 - a loss of resources.
 - technological improvement in the production of both goods.
 - a new law that interferes with economic efficiency.

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Efficiency and equity

26. Suppose the economy goes from a point on its unchanging PPF to a point directly "south" of it. This could be due to
- a gain of resources.
 - a loss of resources.
 - technological improvement in the production of both goods.
 - an increase in unemployment of some resources.

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost NOT: NEW

27. An increase in the quantity of resources
- shifts the PPF inward.
 - shifts the PPF outward.
 - moves the economy up a given PPF.
 - moves the economy down a given PPF.

ANS: B PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

28. A decrease in the quantity of resources
- shifts the PPF inward.
 - shifts the PPF outward.
 - moves the economy up a given PPF.
 - moves the economy down a given PPF.

ANS: A PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

29. The increased production of lamps comes at constant opportunity costs in terms of bookshelves. This means
- that it takes more resources to produce a lamp than a bookshelf.
 - that it takes fewer resources to produce a lamp than a bookshelf.
 - that for every lamp produced, the same number of bookshelves is forfeited.
 - that for every lamp produced, a different number of bookshelves is forfeited.

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

30. Which of the following is an illustration of the law of increasing opportunity costs?
- As more cars are produced, the opportunity cost of each additional car is greater than for the preceding unit.
 - As more cars are produced, the opportunity cost of each additional car is less than for the preceding unit.
 - As more cars are produced, the opportunity cost of each additional car is the same as for the preceding unit.
 - People pay lower prices for cars the higher the costs of producing cars.

ANS: A PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

31. The PPF between goods X and Y will be a downward-sloping
- straight line if increasing opportunity costs exist.
 - straight line if decreasing opportunity costs exist.
 - curve that is bowed outward if increasing opportunity costs exist.
 - curve that is bowed outward if constant opportunity costs exist.

ANS: C PTS: 1 DIF: Difficult NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

32. A PPF is more likely to be a downward-sloping curve that is bowed outward than a downward-sloping straight line because most resources are
- better suited for the production of some goods than others.
 - used efficiently.
 - relatively cheap at low levels of output.
 - used to produce consumption goods.

ANS: A PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

33. Economic growth causes the PPF to
- shift inward.

- b. shift outward.
- c. remain constant.
- d. go from a straight line to a curve.

ANS: B PTS: 1 DIF: Easy NAT: Analytic
LOC: Productivity and growth

34. efWhich of the following statements is false?
- a. If there are only two goods, guns and butter, it is possible to get more of both goods through economic growth.
 - b. If there are only two goods, guns and butter, it is possible to get more of both goods if the economy is currently operating at an inefficient point.
 - c. If there are only two goods, guns and butter, it is possible to get more of both goods if the economy is currently operating at an efficient point.
 - d. If there are only two goods, guns and butter, more of one means less of the other if the economy is currently operating at an efficient point.

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
LOC: Efficiency and equity

35. An economy exhibits productive efficiency if it produces
- a. more than enough food to feed everyone.
 - b. more goods and services in each successive year.
 - c. maximum output with given resources and technology.
 - d. enough output so that no one lives in poverty.

ANS: C PTS: 1 DIF: Easy NAT: Analytic
LOC: Efficiency and equity

36. If it is impossible to produce more of one good without getting less of another, then the economy is operating
- a. efficiently.
 - b. at less than peak performance.
 - c. inefficiently.
 - d. at technological inferiority.

ANS: A PTS: 1 DIF: Easy NAT: Analytic
LOC: Efficiency and equity

37. Which of the following statements is true?
- a. Productive inefficiency implies that it is possible to produce more of one good and no less of another, but only if additional resources are made available.
 - b. Productive efficiency implies that it is possible to produce more of one good and no less of another, even without additional resources.
 - c. Productive inefficiency implies that it is impossible to produce more of one good and no less of another.
 - d. Productive inefficiency implies that it is possible to produce more of one good and no less of another, even without additional resources.

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Efficiency and equity

38. Productive inefficiency implies that
- a. it is possible to obtain gains in one area without losses in another.
 - b. it is impossible to obtain gains in one area without losses in another.

- c. there are too many resources.
- d. there are too few resources.
- e. none of the above

ANS: A PTS: 1 DIF: Easy NAT: Analytic
LOC: Efficiency and equity

39. Productive efficiency implies that
- a. it is impossible to obtain gains in one area without losses in another.
 - b. it is possible to obtain gains in one area without losses in another.
 - c. there are too many resources.
 - d. there are too few resources.
 - e. none of the above

ANS: A PTS: 1 DIF: Easy NAT: Analytic
LOC: Efficiency and equity

40. Suppose the economy goes from a point on its unchanging PPF to a point directly to the left of it. This could be due to
- a. a gain of resources.
 - b. a loss of resources.
 - c. technological improvement in the production of both goods.
 - d. a new law that interferes with productive efficiency.

ANS: D PTS: 1 DIF: Easy NAT: Analytic
LOC: Efficiency and equity

41. Suppose a law prohibits Michael from entering into (what would normally be) a voluntary exchange with Calvin. Furthermore, suppose that if Michael did enter into an exchange with Calvin, no persons besides Michael and Calvin would be affected in any way, either positively or negatively. An economist would say the law is
- a. dictatorial.
 - b. productive efficient.
 - c. rational.
 - d. productive inefficient.

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Efficiency and equity

Exhibit 2-1

42. Refer to Exhibit 2-1. The PPF illustrates
- constant opportunity costs between guns and butter.
 - that guns are more important than butter.
 - increasing opportunity costs between guns and butter.
 - the opportunity cost of one unit of guns is four units of butter.
 - none of the above

ANS: A PTS: 1 DIF: Easy NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

43. Refer to Exhibit 2-1. The movement from point A to point B is a movement from
- a productive efficient point to a productive inefficient point.
 - a point with more guns and less butter to a point with more butter and even more guns.
 - a productive efficient point to another productive efficient point.
 - a productive inefficient point to an productive efficient point.

ANS: C PTS: 1 DIF: Easy NAT: Analytic
 LOC: Efficiency and equity

44. Refer to Exhibit 2-1. A movement from point D to point B is
- currently impossible, because the economy could not have been at point D in the first place since it lies to the right of the PPF.
 - a movement from a productive efficient point to a productive inefficient point.
 - a movement from a productive efficient point to another productive efficient point.
 - a movement from a productive inefficient point to another productive inefficient point.

ANS: A PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost NOT: NEW

45. Refer to Exhibit 2-1. If the economy is at point C, it follows that
- more guns and butter can be produced with available resources.
 - only more guns can be produced with available resources.
 - only more butter can be produced with available resources.
 - C is an unattainable point.

ANS: A PTS: 1 DIF: Easy NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

46. Refer to Exhibit 2-1. The opportunity cost of moving from point B to A is
- 10,000 units of butter.
 - 20,000 units of butter.
 - 50,000 units of guns.
 - the maximum amount of butter that can be produced with available resources.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

47. Refer to Exhibit 2-1. Scarcity exists
- at point C but not at point A.
 - neither at point C nor at point A.
 - at both point C and at point A.
 - at point A but not at point C.

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

48. In the United States, farming today is _____ productive compared to ninety-five years ago, resulting in there being _____ farmers today than at the turn of the century.
- about as; fewer
 - about as; more
 - much more; fewer
 - much more; more

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
LOC: Productivity and growth

49. Technological _____ in American agriculture has _____ other types of employment.
- improvement; drawn labor away from
 - improvement; released labor to go to
 - stagnation; drawn labor away from
 - stagnation; released labor to go to

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Productivity and growth

50. In the production possibilities framework, economic growth is depicted by
- a shift inward of the frontier or to the left.
 - a shift outward of the frontier or to the right.
 - the frontier becoming a straight line.
 - the frontier becoming bowed outward.

ANS: B PTS: 1 DIF: Easy NAT: Analytic
LOC: Productivity and growth

Exhibit 2-2

51. Refer to Exhibit 2-2. If PPF₂ is the relevant production possibilities frontier, then point _____ illustrates productive inefficiency.
- B
 - D
 - E
 - I

ANS: A PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Efficiency and equity

52. Refer to Exhibit 2-2. If PPF₂ is the relevant production possibilities frontier, then point _____ is unattainable.
- B
 - G
 - E
 - I

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

53. Refer to Exhibit 2-2. If PPF₂ is the relevant production possibilities frontier, then point _____ illustrates productive efficiency.
- B
 - E
 - I
 - both b and c

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Efficiency and equity

54. Refer to Exhibit 2-2. If PPF₂ is the relevant production possibilities frontier, a significant loss of resources may
- move this society from point D to point G on PPF₂.
 - move this society to PPF₁.
 - move this society to PPF₃.
 - not affect this society.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

Exhibit 2-3

55. Refer to Exhibit 2-3. If PPF₁ is the relevant production possibilities frontier, society may move to PPF₂ as a result of
- an increase in resources.
 - a decrease in resources.
 - an increase in technology.
 - both a and c
 - both b and c

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Productivity and growth

56. Refer to Exhibit 2-3. If PPF₁ is the relevant production possibilities frontier, society can choose points that lie only
- below PPF₁.
 - below or on PPF₁.
 - on PPF₂.
 - none of the above

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

57. Refer to Exhibit 2-3. If PPF₁ is the relevant production possibilities frontier, PPF₂ may depict
- economic growth.
 - an increase in resources.
 - an increase in technology.
 - both b and c
 - all of the above

ANS: E PTS: 1 DIF: Moderate NAT: Analytic
LOC: Productivity and growth

58. According to the law of increasing opportunity costs,
- the amount of money it takes to produce a good increases as more of the good is produced.
 - the risk involved in producing a good increases as more of the good is produced.
 - the market price of a good increases as more of the good is produced.
 - the opportunity cost of producing a good increases as more of the good is produced.
 - all of the above

ANS: D PTS: 1 DIF: Difficult NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

59. An efficient society
- produces at a point on its PPF.
 - can produce more of one good only by giving up some of an other good.
 - cannot produce unlimited amounts of a good.
 - still has to make choices.
 - all of the above

ANS: E PTS: 1 DIF: Moderate NAT: Analytic
LOC: Efficiency and equity

60. If resources are not "equally suited" for the production of two goods, the PPF is
- a straight line.
 - bowed outward.
 - upward sloping.
 - any of the above

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

61. A society is productive inefficient when
- it produces at a point inside or below its PPF.
 - it does not produce the maximum output with its given resources and technology.
 - it can produce more of one good without giving up some of another good.
 - both a and b
 - all of the above

ANS: E PTS: 1 DIF: Difficult NAT: Analytic
LOC: Efficiency and equity

62. With a constant opportunity cost between goods A and B, the PPF would
- be a straight line.
 - be a bowed-outward line.
 - be a bowed-inward line.
 - not exist.

ANS: A PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

63. Within the production possibilities framework, choice is depicted by the
- PPF itself.
 - PPF being bowed outward.
 - need to select among the points making up the frontier.
 - straight-line PPF.

ANS: C PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

64. If there is an increase in the amount of good B foregone as every additional unit of good A is produced, the PPF between A and B would
- be a straight line.
 - be a bowed-outward curve.
 - be a bowed-inward curve.

d. not exist.

ANS: B PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

65. The PPF is bowed outward as a result of
- constant opportunity costs.
 - increasing opportunity costs.
 - decreasing opportunity costs.
 - scarcity.
 - choice.

ANS: B PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

66. The PPF is a straight line as a result of
- constant opportunity costs.
 - increasing opportunity costs.
 - decreasing opportunity costs.
 - scarcity.
 - choice.

ANS: A PTS: 1 DIF: Easy NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

67. In an eight-hour day, Andy can produce either 24 loaves of bread or 8 pounds of butter. In an eight-hour day, John can produce either 8 loaves of bread or 8 pounds of butter. The opportunity cost of producing 1 pound of butter is
- $\frac{1}{3}$ hour for Andy and 1 hour for John.
 - 1 hour for Andy and 1 hour for John.
 - 3 loaves of bread for Andy and 1 loaf of bread for John.
 - $\frac{1}{3}$ loaves of bread for Andy and 1 loaf of bread for John.
 - none of the above

ANS: C PTS: 1 DIF: Difficult NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

68. An advance in technology commonly refers to the ability to produce
- the same output with a smaller quantity of resources.
 - more output with a fixed quantity of resources.
 - more output with a greater quantity of resources.
 - both a and b
 - both b and c

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Productivity and growth

Exhibit 2-4

69. Refer to Exhibit 2-4. The line joining points A and D is called the
- production function.
 - utility function.
 - production possibilities frontier.
 - demand curve.

ANS: C PTS: 1 DIF: Easy NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

70. Refer to Exhibit 2-4. This economy is
- efficient, if it operates at point B or C.
 - efficient, if it operates at point A or D.
 - inefficient, if it operates at point A or D.
 - inefficient regardless of the particular point.
 - both a and b

ANS: E PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Efficiency and equity

71. Refer to Exhibit 2-4. The opportunity cost of moving from point A to point B is
- 60,000 copiers.
 - 40,000 copiers.
 - 20,000 copiers.
 - 20,000 fax machines.
 - 40,000 fax machines.

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

72. Refer to Exhibit 2-4. As more fax machines are produced, the opportunity cost of producing them
- increases.
 - decreases.
 - remains constant.
 - first decreases and then increases.

ANS: C PTS: 1 DIF: Easy NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

Exhibit 2-5

73. Refer to Exhibit 2-5. The economy is currently operating at point F. The opportunity cost of moving to point E is
- 35 fax machines.
 - 55 fax machines.
 - zero.
 - not possible to determine.

ANS: C PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

74. Refer to Exhibit 2-5. As more fax machines are produced, the opportunity cost of producing them
- increases.
 - decreases.
 - remains constant.
 - first decreases and then increases.

ANS: A PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

75. Refer to Exhibit 2-5. "In order to produce one more television set, we must forfeit the production of one fax machine." This statement describes a movement from
- point C to point D.
 - point D to point E.
 - point E to point F.
 - point E to point D.
 - point D to point C.

ANS: E PTS: 1 DIF: Moderate NAT: Analytic
 LOC: Scarcity, tradeoffs, and opportunity cost

76. Refer to Exhibit 2-5. Which of the following labeled points are efficient?
- A, B, C, D, and E
 - B, C and D only
 - C only
 - All of the points are efficient.
 - None of the points are efficient.

ANS: A PTS: 1 DIF: Moderate NAT: Analytic

LOC: Efficiency and equity

77. Refer to Exhibit 2-5. Given available resources and technology, this economy can produce 50,000 television sets and 50,000 fax machines only if it chooses to
- have an egalitarian distribution of goods.
 - operate at both points C and D.
 - combine points C and D.
 - none of the above

ANS: D PTS: 1 DIF: Moderate NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

78. Some of our farm fields are being left unused. Does this have any implications for the economy's PPF diagram?
- No implications, because the PPF deals only with resources in use.
 - The PPF cannot be drawn if some resources are idle.
 - With unemployed resources, we are at a point inside the PPF.
 - The PPF would be upward sloping.

ANS: C PTS: 1 DIF: Easy NAT: Analytic

ESSAY

1. Give a definition of an advance in technology. Describe the effect of an advance in technology on the PPF.

ANS:

An advance in technology commonly refers to the ability to produce more output with a fixed amount of resources or the same amount of output with a smaller amount of resources. When technology advances the PPF shifts outward.

PTS: 1 DIF: Moderate NAT: Analytic LOC: Productivity and growth

2. Why is the PPF typically bowed-outward? Under what circumstances would the PPF be a straight line?

ANS:

The PPF is typically bowed-outward due to the law of increasing opportunity costs. As more of a product is produced, it becomes increasingly more difficult to find resources that are well-suited to producing that product. Therefore, the opportunity cost of producing more units grows and the PPF becomes steeper and steeper. The PPF is a straight line when the resources used to produce the two products are perfectly interchangeable, and thus the opportunity cost of producing more units is constant.

PTS: 1 DIF: Difficult NAT: Analytic
LOC: Scarcity, tradeoffs, and opportunity cost

3. Describe what *productive efficiency* means. How is productive efficiency represented by a PPF?

ANS:

An economy is producing efficiently if it is producing the maximum amount of output with a set amount of resources and technology. Efficiency is represented by all of the points that lie along the PPF.

PTS: 1 DIF: Moderate NAT: Analytic LOC: Efficiency and equity

4. Explain how the study of economics might be beneficial to a history major.

ANS:

Many historical events are linked to the economic issues of that era. Understanding economic terms and theories can help historians to more fully comprehend the intricacies of a historical event or period. In addition, an understanding of cause and effect relationships within economics can help a historian evaluate the conclusions drawn by other historians.

PTS: 1 DIF: Moderate NAT: Reflective thinking
LOC: The study of economics and definitions in economics
