## TEST BANK

RUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.  1) Nutrition knowledge has no influence on our food choices.	1)
Answer: True 👨 False	
<ol> <li>Diet, genes, and physical activity influence your risk for disease.</li> <li>Answer: True False</li> </ol>	2)
3) Vitamins are inorganic compounds.	3)
Answer: True o False	
4) Supplements provide the same health benefit as nutrients and nonnutrients from food.	4)
Answer: True False	
5) A single food can be good for you even if it does not provide all the nutrients.	5)
Answer: True False	,
6) The American diet is very healthy.	6)
Answer: True 👩 False	,
7) Heart disease, kidney disease, and respiratory disease are the three leading causes of death in	7)
the United States and can be prevented through good nutrition.	,,
Answer: True False	
8) Even with all the diet information available to Americans, our body weights are increasing.	8)
Answer: True False	o)
O) Flores garage of American coefficient from tood incorreits had an oral tood to get deile	0)
9) Eleven percent of Americans, suffering from food insecurity, lack enough food to eat daily. Answer: True False	9)
10) Rates of obesity are highest in people with the highest incomes.	10)
Answer: True False	/
11) The heady classes metabolism and beards calculated during newledge of hunger	11\
11) The body slows metabolism and hoards calories during periods of hunger. Answer:  True False	11)
12) Low-cost foods tend to taste better.  Answer: True False	12)
Answer: True False	
13) Water helps maintain your body temperature and acts as a lubricant for your joints, eyes, mou	ith, 13)
and intestinal tract. Answer: True False

59) The diet-related number-o	ne cause of death in the	a United States is		59)

A) stroke. Answer: B	B) heart disease.	C) diabetes.	D) kidney disease	e.
60) Which foods are more likely to satisfy our taste buds?				
A) cookies	B) chicken	C) carrots	D) apples	
Answer: A				

## ESSAY. Write your answer in the space provided or on a separate sheet of paper.

61) What is the difference between a macronutrient and a micronutrient?

Answer: A macronutrient is needed in larger quantities than a micronutrient. Vitamins and minerals are micronutrients, and the energy nutrients (carbohydrates, fats, and proteins) are macronutrients.

62) What are the essential nutrients and why do you need them?

Answer: The essential nutrients are carbohydrates, fats, proteins, vitamins, minerals, and water. They are all equally important to the body because they work together to support growth and reproduction, to supply energy, and to help repair and maintain the body. The body cannot make these essential nutrients and thus they must come from the diet.

63) Poor people have less money to buy food yet obesity is highest among people with the lowest income. Explain.

Answer: Foods with the lowest cost tend to be high in fat and sugar, high in calories, and low in essential nutrients. People lacking money are forced to buy cheap food. The result is a diet abundant in calories, resulting in weight gain while leaving the individual malnourished.
