where  $r$  is the radius of the track in miles and  $\theta$  is the elevation in degrees. Find the maximum speed for a racetrack with an elevation of  $28^\circ$  and a radius of 0.5 miles. Round to the nearest mile per hour.

A) 35,921 mph

B) 12,347 mph

C) 159 mph

D) 191 mph

Answer: C

164) The path of a projectile fired at an inclination  $\theta$  to the horizontal with an initial speed  $v_0$  is a parabola. The range  $R$  of the projectile, the horizontal distance that the projectile travels, is found

$$R = \frac{v_0^2 \sin 2\theta}{g}$$

by the formula where  $g = 32.2$  feet per second per second or  $g = 9.8$  meters per second per second. Find the range of a projectile fired with an initial velocity of 124 feet per second at an angle of  $34^\circ$  to the horizontal. Round your answer to two decimal places.
